Censorship Brian Jennings,2009-05-05 Talk radio is the American voter. -- Rush Limbaugh Freedom of speech. It is our most cherished privilege as Americans, guaranteed by the First Amendment to the U.S. Constitution since 1791. But at the dawn of a new presidential administration, an epic battle is looming -- a battle for our airwaves that could sharply curtail or silence altogether the freedom of expression that distinguishes America from the average dictatorship. The target of this battle is conservative talk radio. If key Democrats have their way, the principles of the Federal Communications Commission's Fairness Doctrine will once again be enforced and allow government to control the content heard on free radio, a mandate that will have

far-reaching implications for all media. During the Reagan administration the FCC voted to stop enforcing the Fairness Doctrine, which required all licensed broadcasters to present balanced viewpoints on controversial issues. Conservative talk radio burgeoned, giving rise to the father of conservative talk, Rush Limbaugh, and such hosts as Sean Hannity, Mark Levin, Michael Medved, Neal Boortz, Laura Ingraham, and others. The format was a smash hit -- resonating with listeners from coast to coast and giving a powerful voice to the conservative movement. Soon such programming, attracting an estimated 50 million listeners weekly, dominated the airwaves where liberal talk radio failed. Popular, profitable, outspoken, powerful, influential -- it's what the American people wanted, and its success was the Democrats' worst nightmare. Now, the principles of the Fairness Doctrine threaten to be reinstated -- if not directly, then through back-door tactics involving ownership of stations. Under cover of being fair, they will prove to be anything but: They will be used as a means of censorship by those with contempt for conservative talk radio. With our current Congress firmly under Democratic control, the future of talk radio -- indeed, freedom of speech for all Americans -- is under direct attack.

Buy a new version of this textbook and receive access to the Connected eBook with Study Center on CasebookConnect, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. The Ninth Edition of Cases, Problems, and Materials on Contracts by Douglas J. Whaley and David

Horton features classic cases, new developments, and thought-provoking problems to help students master contract law. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of coverage and its use of short, carefully constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Ninth Edition is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for the best effect. And as always, answers to the Problems appear in the Teacher's Manual. The book can also be easily adapted to fit various pedagogical needs. Although it starts with "Agreement" and moves to "Consideration," it is also designed for teachers who prefer to begin with "Consideration" or "Remedies." It can be used in courses that both include and exclude sales. Finally, because it is shorter than most of its rivals, it works in 4-unit, 5-unit, and 6-unit courses. New to the 9th Edition: Cases have been further streamlined and edited for clarity. Expanded use of student-friendly introductions to complex material. Greater emphasis on recent decisions that involve issues to which

students can relate. Professors and students will benefit from: The book covers the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many problems that fill each chapter alongside the most illustrative cases on point. The Assessment multiple-choice questions at the end of each chapter are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented. Indeed, the whole book is written not just to teach the rules of law but to train the students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms.

This edition features thorough discussions on the Internet and convergence, as well as reflects

the latest information on broadcast and cable regulations and policies. It also includes a fresh batch of case studies, and study questions. As in previous editions, this book also covers management theory, audience analysis, broadcast promotion, and marketing.
