Embedded and Multimedia Computing Technology and Service James J. (Jong Hyuk) Park, Young-Sik Jeong, Sang Oh Park, Hsing-Chung Chen, 2012-08-31 The 7th International Conference on Embedded and Multimedia Computing (EMC-12), will be held in Gwangju, Korea on September 6 - 8, 2012. EMC-12 will be the most comprehensive conference focused on the various aspects of advances in Embedded and Multimedia (EM) Computing. EMC-12 will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in the area of EM. In addition, the conference will publish high quality papers which are closely related to the various theories and practical applications in EM. Gaslight Carol Guess, 2001 Carol Guess has composed, from glass-edged fragments of her life and her work as a creative artist, the mosaic of a woman who has fought to be her true self. A

nonfiction collection wrapped around a novella called *Fat Rosie and Rose*, it documents the impact of sexism and homophobia on her professional and personal lives, and uses fictional characters to play out the events. Her adversaries have been many, and formidable. There were those who dictated the ideal shape of her female body and the correct dimensions of her sexuality as she emerged from a childhood in the south, ensnared in sexual exploitation and a spiral of anorexia. The teachers who attempted to extinguish her ambition and identity as a creative artist--because female writing could not possibly rise above the trivial--played their part. And the politics of art and sexuality continue to litter her path as a lesbian academic and a serious artist. Like no other book, *Gaslight* shares each step of the interior process of creation and of failing to create: the process of becoming a writer. In this extraordinary and unforgettable work, Carol Guess brilliantly illuminates the path to art and to individuality.--Amazon.com.

Lightning Chandima Gomes,2021-08-13 This book highlights the essential theoretical and practical aspects of lightning, lightning protection, safety and education. Additionally, several auxiliary topics that are required to understand the core

themes are also included. The main objective of the contents is to enlighten the scientists, researchers, engineers and social activists (including policy makers) in developing countries regarding the key information related to lightning and thunderstorms. A majority of developing countries are in tropics where the lightning characteristics are somewhat different from those in temperate regions. The housing structures and power/communication networks, and human behavioural patterns (that depends on socio-economic parameters) in these countries are also different from those in the developed world. As the existing books on similar themes address only those scenarios in developed countries, this book serves a vast spectrum of readership in developing world who seek knowledge in the principles of lightning and a practical guidance on lightning protection and safety education.

Lightning Vladimir A. Rakov, Martin A.

Uman, 2007-01-08 Lightning: Physics and Effects is the first book that covers essentially all aspects of lightning, including lightning physics, lightning protection and the interaction of lightning with a variety of objects and systems as well as with the environment. It is written in a style that will be accessible to the technical non-expert and is addressed to anyone interested in lightning and its effects. This will include physicists, engineers working in the power, communications, computer and aviation industries, meteorologists, atmospheric chemists, foresters, ecologists, physicians working in the area of electrical trauma and architects. This

comprehensive reference volume contains over 300 illustrations, 70 tables containing quantitative information and a bibliography of more than 6000 references.
