*Studying the Dead* Nicholas G. Meriwether,2013-07-11 Although academic study of the Grateful Dead began shortly after the group's formation, the dramatic growth of scholarly literature only occurred after the band's formal retirement of the name in 1995. One major incubator of much of this work has been the Grateful Dead area of the Southwest/Texas Popular Culture and American Culture Association. Inaugurated as a separate section in 1998 and nicknamed the Grateful Dead Scholars Caucus, it has produced almost three hundred papers over fifteen years, nearly a third of which have been revised for publication. Caucus presenters have also edited a dozen books and periodical volumes, all of which have drawn on Caucus presentations, some almost exclusively. *Studying the Dead: The Grateful Dead Scholars Caucus* provides an informal history of the Caucus and sketches its significance as a scholarly community, focusing on its increasing self-awareness, its

ability to span diverse disciplinary and theoretical perspectives, and most of all, its contribution to our understanding of the Grateful Dead phenomenon. For the academy as a whole, the Caucus is a fascinating model for the development of discourse communities, from the role of orality to its interrogation of the texts that are derived from them. Remarkable for its interdisciplinary dialogue, the Caucus demonstrates how the nature of the art—and the phenomenon that it studies—can shape these discourses. Though ostensibly aimed at scholars of the Grateful Dead, others who will find this book of interest include students and teachers of popular culture, as well as fans of the band.

It also describes how to create various rules to determine a threat, and configure and start a suitable response to the detected threat in IBM QRadar. This document also explains how to register a storage system and create a scheduled task by using IBM Copy Services Manager. Finally, this document also describes deploying IBM QRadar and SV4PC on Azure. A use case for protecting the MS SQL database (DB) volume that was created on IBM SV4PC is included. Upon threat detection on a database volume, Safeguarded Copy is started for IBM SV4PC volume. The Safeguarded Copy creates an immutable copy of the data. The same data volume can be recovered or restored by using IBM's Copy Services Manager.
