

Columbus International

Carole Marsh

Fort Columbus International Airport, Columbus, Ohio ,1991

Aviation in Columbus Richard E. Barrett,2012 Columbus entered the air age early: the city was the destination for the world's first air-cargo flight in 1910, the home of the world's youngest licensed pilot in 1911, and the home of World War I flying ace Eddie Rickenbacker. The aviation history of Columbus continued with the opening of Norton Field in 1923, Columbus Airport (later Sullivant Avenue Airport) in 1928, Port Columbus in 1929, and Lockbourne Army Air Base (now Rickenbacker International Airport) in 1942. Port Columbus International Airport had the distinction of being built near a railroad track for a coast-to-coast air-rail service. The air-rail service did not last, but Port Columbus has survived and is an important part of central Ohio. Add to this the fact that a major aircraft factory was located in Columbus from 1941 to 1979, and the aviation history of Columbus is rich.

Columbus Celebrates the Millennium Pamela Baker,1999

Columbus in Space The European Space Agency,2018-09-06 In 2008, Europe's first space laboratory was launched to the International Space Station. Ten years later, the Columbus laboratory is still circling 400 km above our heads at 28,800 km/h, providing scientists a place to run out-of-this-world experiments on everything from cold plasma technology that will destroy unwanted odours to enzymes that may slow the ageing process. To celebrate a decade of European science and technology in space this stunning book recounts the story of the Columbus laboratory from vision to mission, revealing everything from the daily operations that keep it humming, to the cutting-edge science that takes place inside. Richly illustrated with graphics and statistics of life and research in space as well as full-colour photos, *Columbus in Space* offers a never-seen-before glimpse into the laboratory at the forefront of humanity's exploration of our Universe -- Europe's space in space.
