**Handbook of Research on Social Software and
Developing Community Ontologies** Hatzipanagos,

Stylianios, Warburton, Steven, 2009-02-28 This book explores how social software and developing community ontologies are challenging the way we operate in a performative space--Provided by publisher.

Patterns of Software Richard P. Gabriel, 1998 In a book that will intrigue anyone who is curious about Silicon Valley, computer programming, or the world of high technology, respected software pioneer and computer scientist Richard Gabriel offers an informative insider's look at the world of software design and computer programming and the business that surrounds them. 10 illustrations.

The Software Craftsman Sandro Mancuso, 2014-12-14 In *The Software Craftsman*, Sandro Mancuso explains what craftsmanship means to the developer and his or her organization, and shows how to live it every day in your real-world development environment. Mancuso shows how software craftsmanship fits with and helps students improve upon best-practice technical disciplines such as agile and lean, taking all development projects to the next level. Readers will learn how to change the disastrous perception that software developers are the same as factory workers, and that software projects can be run like factories.

21st Century Community Learning Centers Program

Adriana Dekanter, 1999-04 The 21st Century Community Learning Centers Program is a federal program that awards grants to rural

and inner-city public schools, or consortia of such schools, to enable them to plan, implement, or expand projects that benefit the educational, health, social services, cultural and recreational needs of the community. Grants awarded under this program may be used to plan, implement, or expand community learning centers. Contents: program information; program eligibility checklist; selection criteria; instructions and forms for preparing the application; how to submit an application; supplementary information; and application checklist.

The Community Development Quota Program in Alaska

National Research Council, Division on Earth and Life Studies, Polar Research Board, Ocean Studies Board, Commission on Geosciences, Environment and Resources, Committee to Review the Community Development Quota Program, 1999-06-03 This book reviews the performance and effectiveness of the Community Development Quotas (CDQ) programs that were formed as a result of the Sustainable Fisheries Act of 1996. The CDQ program is a method of allocating access to fisheries to eligible communities with the intent of promoting local social and economic conditions through participation in fishing-related activities. The book looks at those Alaskan fisheries that have experience with CDQs, such as halibut, pollock, sablefish, and crab, and comments on the extent to which the programs have met their objectives—helping communities develop ongoing commercial fishing and processing activities, creating employment opportunities, and providing capital for

investment in fishing, processing, and support projects such as infrastructure. It also considers how CDQ-type programs might apply in the Western Pacific.

Evaluating Public and Community Health Programs

Muriel J. Harris, 2016-11-14 A practical introduction to participatory program evaluation *Evaluating Public and Community Health Programs* provides a comprehensive introduction to the theory and practice of evaluation, with a participatory model that brings stakeholders together for the good of the program. Linking community assessment, program implementation, and program evaluation, this book emphasizes practical, ongoing evaluation strategies that connect theory with application. This updated second edition includes new discussion on planning policy change programs using logic models and theory of change, plus expanded coverage of processes, outcomes, data collection, and more. Each chapter includes classroom activities and group discussion prompts, and the companion website provides worksheets, lecture slides, and a test bank for instructors. Mini cases help illustrate the real-world applications of the methods described, and expanded case studies allow students to dig deeper into practice and apply what they've learned. Accurate and effective evaluation is the key to a successful program. This book provides a thorough introduction to all aspects of this critical function, with a wealth of opportunities to apply new concepts. Learn evaluation strategies that involve all program stakeholders Link theory to practice with new mini cases and examples Understand the uses, processes, and approaches to evaluation Discover how ongoing evaluation increases program effectiveness Public and community health programs are a vital part of our social infrastructure, and the more effective they are, the more people they can serve. Proper planning is important, but continued evaluation is what keeps a program on track for the long term. *Evaluating Public and Community Health Programs* provides clear instruction and insightful discussion on the many facets of evaluation, with a

central focus on real-world service.

Creating Sustainable Community Programs Mark R. Daniels, 2001-02-28 Public opinion polls consistently reveal the lack of confidence, disillusionment, and mistrust that citizens feel toward government. Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government, particularly through local sustainable programs. As the case studies show, often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves, bringing them in contact with their local elected and appointed officials. Unlike traditional programs that are administered by local officials on behalf of their citizens, once sustainable community programs are created, citizens administer their own programs in collaboration with local officials. The case studies look at a variety of sustainable programs, primarily in the United States, that help to deal with issues such as recycling, transportation, microcredit, site redevelopment, pollution, health care, and hunger. *Creating Sustainable Community Programs* is the first book on sustainable programs that is intended for an audience of public administration scholars, researchers, and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments.
