Convergent Journalism Stephen Quinn, 2006 Convergence is happening around the world. It represents a new form of reporting and may well be the future for journalism. Full convergence involves a radical change in approach and mindset among journalists and their managers. It involves a shared assignment desk where the key people, the multimedia assignment editors, assess each news event on its merits and send the most appropriate people to the story. Convergence coverage should thus be driven by the significance of the news event. Depending on variables unique to each country and company, convergence is one of the most likely scenarios for media organizations around the world. This book explains the phenomenon of media convergence, defines what has been until recently a confusing topic, describes the main business models, provides case studies of successful convergent newsrooms around the world, and explains how to introduce convergence into the newsroom. Stephen Quinn provides a practical introduction to the changing landscape of news reporting, and has written a useful book for students and professionals alike.

E-Commerce and Convergence: A Guide to the Law of Digital Media Susan Singleton, 2021-03-12 Since the last edition ten years ago the pace of technological and legal change has stepped up even more than before with previous editions. New legislation is in force such as the General Data Protection Regulation (GDPR) and UK Data Protection Act 1998 and from 1 January 2021 UKGDPR. The UK Information Commissioner has been looking closely at Ad Tech and what has become known as big data and how data are gathered on-line. Intellectual Property law in the ecommerce area has also changed. There is a very recently agreed new EU copyright directive which is due to be implemented in the 27 EU member states (but not the UK) in 2021. The post-Brexit transition period expired on 31 December 2020 which has implications for the application of ecommerce law in a number of different areas which are all addressed in the new addition. The 2010 EU vertical regulation and guidelines have recently been built on with the EU geo-blocking regulation and the related EU Commission's initiatives in relation to ecommerce in the anti-trust area. In 2020 the UK implemented changes in relation to EU law in the revised 2018 Audiovisual Media Services Directive (AVMS) through the Audiovisual Media Services Regulations 2020 which are addressed in the new edition as post-Brexit the UK is retaining this legislation. Other updates include the distance selling legislation in the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013 and the Consumer Rights Act 2015 which came into force since the last edition.

Media Convergence Handbook - Vol. 2 Artur Lugmayr, Cinzia Dal Zotto, 2016-05-11 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges. Approaching the topic from a managerial, technological as well as end-consumer perspective, it acts as a reference book and educational resource in the field. Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools. However, it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account. Media consumers, content producers and managers face different challenges in the process of media convergence. Volume II of the Media Convergence Handbook tackles these challenges by discussing media business models, production, and users' experience and perspectives from a technological convergence viewpoint.

Media and Convergence Management Sandra Diehl, Matthias Karmasin, 2013-05-24 Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly

interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

De-convergence of Global Media Industries Dal Yong Jin, 2013 Convergence has become a buzzword, referring on the one hand to the integration between computers, television, and mobile devices or between print, broadcast, and online media and on the other hand, the ownership of multiple content or distribution channels in media and communications. Yet while convergence among communications companies has been the major trend in the neoliberal era, the splintering of companies, de-convergence, is now gaining momentum in the communications market. As the first comprehensive attempt to analyze the wave of de-convergence of the global media system in the context of globalization, this book makes sense of those transitions by looking at global trends and how global media firms have changed and developed their business paradigm from convergence to de-convergence. Jin traces the complex relationship between media industries, culture, and globalization by exploring it in a transitional yet contextually grounded framework, employing a political economic analysis integrating empirical data analysis.

Media Convergence and Deconvergence Sergio Sparviero, Corinna Peil, Gabriele Balbi, 2017-10-20 This edited volume explores different meanings of media convergence and deconvergence, and reconsiders them in critical and innovative ways. Its parts provide together a broad picture of opposing trends and tensions in media convergence, by underlining the relevance of this powerful idea and emphasizing the misconceptions that it has generated. Sergio Sparviero, Corinna Peil, Gabriele Balbi and the other authors look into practices and realities of users in convergent media environments, ambiguities in the production and distribution of content, changes to the organization of media industries, the re-configuration of media markets, and the influence of policy and regulations. Primarily addressed to scholars and students in different fields of media and communication studies, *Media Convergence and Deconvergence* deconstructs taken-for-granted concepts and provides alternative and fresh analyses on one of the most popular topics in contemporary media culture. Media Convergence Dwyer, Tim, 2010-02-01 Media studies scholars and commentators have categorised the media in distinct periods: 'old media' such as television, radio and print; 'new media' which include online media, computers, and PDAs. Now we are in a period of 'media convergence' - print newspapers sent as MP3 - but also the increasing convergence of media policy, media ownership and media practices. This book looks at how 'traditional' media companies are moving in to converged media, questions of ownership, questions of working practices and questions of the audience.

Innovations of China's Mainstream Media Convergence Peng Duan, 2022-03-11 This book offers fresh critical insights to the field of media convergence with a particular focus on the mainstream media of China. It begins with an exploration of the emerging change among the entire mediascape: the clear and distinct boundaries that used to demarcate media channels are gradually dissolved, and the widespread introduction and application of new communication technologies have brought both challenges and opportunities toward China. This is followed by a series of theoretical endeavor about the link between conventional media and new media. Drawing on President Xi Jinping's guiding opinions regarding with media convergence, this book then analyzes the political task laid upon mainstream media in which challenges may be turned into opportunities. Given its conceptual focus and practical contribution, the book helps media professionals and related government agencies understand the wide variety of changes brought about by media convergence and the new direction for media development.

Digital Media Sport Brett Hutchins,David Rowe,2013-09-05 Live broadband streaming of the 2008 Beijing Olympics accounted for 2,200 of the estimated 3,600 total hours shown by the American NBC-Universal networks. At the 2012 London Olympics, unprecedented multi-platforming embraced online, mobile devices, game consoles and broadcast television, with the BBC providing 2,500 hours of live coverage, including every competitive event, much in high definition and some in 3D. The BBC also had 12 million requests for video on mobile phones and 9.2 million browsers on its mobile Olympics website and app. This pattern will only intensify at future sport mega events like the 2014 FIFA World Cup and 2016 Summer Olympics, both of which will take place in Brazil. Increasingly, when people talk of the screen that delivers footage of their favorite professional sport, they are describing desktop, laptop, and tablet computer screens as well as television and mobile handsets. *Digital Media Sport* analyzes the intersecting issues of technological change, market power, and cultural practices that shape the contemporary global sports media landscape. The complexity of these related issues demands an interdisciplinary approach that is adopted here in a series of thematically-organized essays by international scholars working in media studies, Internet studies, sociology, cultural studies, and sport studies. .

Borders, Culture, and Globalization Victor Konrad,Melissa Kelly,2021-05-18 Border culture emerges through the intersection and engagement of imagination, affinity and identity. It is evident wherever boundaries separate or sort people and their goods, ideas or other belongings. It is the vessel of engagement between countries and peoples—assuming many forms, exuding a variety of expressions, changing shapes—but border culture does not disappear once it is developed, and it may be visualized as a thread that runs throughout the process of globalization. Border culture is conveyed in imaginaries and productions that are linked to borderland identities constructed in the borderlands. These identities underlie the enforcement of control and resistance to power that also comprise border cultures. Canada's borders in globalization offer an opportunity to explore the interplay of borders and culture, identify the fundamental currents of border culture in motion, and establish an approach to understanding how border culture is placed and replaced in globalization. Published in English.

Convergent Chinese Television Industries Lisa Lin, 2022-06-15 This book provides a rich description of the shifting production cultures in convergent Chinese television industries, through the examination of daily production practices, showing how they embody a new set of opportunities and tensions across strategic, programming and individual levels. Lin argues that the current Chinese television landscape is an ideological, cultural and financial paradox in which China's one-party ideological control clashes with consumer-orientated capitalism and technological advancement. These tensions are finely poised between new opportunities for innovation and creative autonomy, and anxiety over political interference marked by censorship and state surveillance. Through its in depth study of ethnographic data across Chinese broadcast and digital streaming sectors (including CCTV, Hunan Broadcasting System, and Tencent Video), this book illuminates how Chinese producers have placed their aspirations for creative freedoms within

technological advancements and rhetorical strategies, both demonstrating compliance with ideological control, and leaving room for resistance and resilience to one-party state ideology. Nuanced and timely, Convergent Chinese Television Industries unveils a complex picture of an industry undergoing dramatic transformations.

Transmedia Storytelling and the New Era of Media Convergence in Higher Education Stavroula Kalogeras, 2014-06-25 Stories, whether they are fact or fiction, popular or not, are a proven method of pedagogy. In the age of media convergence and with the advancement of technology, stories have morphed into new forms; however, their core purpose remains the same, which is to pass on knowledge and information. The internet, with its inherent interactivity, and story, with its inherent capacity to engage, can lead to innovative and transformative learning experiences in media-rich environments. This book focuses on web-based Transmedia Storytelling Edutainment (TmSE) as an andragogical practice in higher education. Story is at the forefront of this investigation because narrative is the basis for developing entertainment media franchise that can be incorporated into pedagogical practice. The propulsion of this analysis consists of practice-based research through narrative inquiry and an e-module case study presented on multimedia storytelling in the classroom. A Transmedia Storytelling Framework is provided for creating screenplays for cross-media projects and for analyzing their appropriateness in education. Additionally, a hypertext screenplay, which allowed students to dig deeper into the story word and to build more knowledge, is evaluated for its use in higher education. Since screenplays are by nature writing for the screen, it is believed that the more visual the input, the more likely it is to be memorized and recalled. A link to The Goddess Within screenplay is available for download on the right hand side of this page.
