The Use and reuse of stone circles Courtney Nimura, Richard

Bradley, 2016-09-30 The study of stone circles has long played a major role in British and Irish archaeology, and for Scotland most attention has been focused on the large monuments of Orkney and the Western Isles. Several decades of fieldwork have shown how these major structures are likely to be of early date and recognised that that smaller settings of monoliths had a more extended history. Many of the structures in Northern Britain were reused during the later Bronze Age, the Iron Age and the early medieval period. A series of problems demand further investigation including: when were the last stone circles built? How did they differ from earlier constructions? How were they related to henge monuments, especially those of Bronze Age date? How frequently were these places reused, and did this secondary activity change the character of those sites? This major new assessment first presents the results of fieldwork undertaken at the Scottish recumbent stone circle of Hillhead; the stone circles of Waulkmill and Croftmoraig, the stone circle and henge at Hill of Tuach at Kintore; and the small ring cairn at Laikenbuie in Inverness-shire. Part 2 brings together the results of these five projects and puts forward a chronology for the construction and primary use of stone circles, particularly the Chalcolithic and Bronze Age examples. It considers the reuse of stone circles, long after they were built, and discusses four neighbouring stone circles in Aberdeenshire which display both similarities and contrasts in their architecture, use of raw materials, associated artefacts and structural sequences. Finally, a reassessment and reinterpretation of Croftmoraig and its sequence is presented: the new interpretation drawing attention to ways of thinking about these monuments which have still to fulfil their

potential.

Adam Smith and the Circles of Sympathy Fonna Forman-Barzilai,2010-04-30 This 2010 text pursues Adam Smith's views on moral judgement, humanitarian care, commerce, justice and international law both in historical context and through a twenty-first-century cosmopolitan lens, making this a major contribution not only to Smith studies but also to the history of cosmopolitan thought and to contemporary cosmopolitan discourse itself. Forman-Barzilai breaks ground, demonstrating the spatial texture of Smith's moral psychology and the ways he believed that physical, affective and cultural distance constrain the identities, connections and ethical obligations of modern commercial people. Forman-Barzilai emphasizes his resistance to the sort of relativism, moral insularity and cultural chauvinism that too often accompany localist critiques of cosmopolitan thought today. This is a fascinating, revisionist study that integrates the perspectives of intellectual history, moral philosophy, political theory, cultural theory, international relations theory and political economy, and will appeal across the humanities and social sciences.

Norma Jeane's Wishes in Time Stuart P. Coates,2008-09-08 In the year 2040, the United States no longer exists. Instead, it's a province of the former Soviet Union, which has been restored to its past glory. And each newborn child is assigned a Designation Number instead of a name. Now, forty years later, a man known only as 77241 escapes into the past in an effort to discover where the world went wrong. When 77241 comes upon footage of Norma Jeane Baker, known throughout the world as Marilyn Monroe, he becomes haunted by her face, so much so that he seeks out her gravesite and begins speaking to her hologram. As oxygen bombs fall upon the former United States in a final act of destruction, 77241 escapes in a time bubble traveling back to June 1960. Once there, he seeks out Norma Jeane at a movie set. Through her, he attempts to save John F. Kennedy from his all-too-early demise hoping to alter enough of the past to change the world's future destruction. Join 77241 and Norma Jeane as they interact with a cast of historical characters, including Kennedy, Mark Twain and Abraham Lincoln, as they seek to change the course of history in *Norma Jeane's Wishes in Time*.

The Tiny and the Fragmented S. Rebecca Martin, Stephanie M.

Langin-Hooper, 2018-10-16 Miniature and fragmentary objects are both eye-catching and yet easily dismissed. Tiny scale entices users with visions of Lilliputian worlds. The ambiguity of fragments intrigues us, offering tactile reminders of reality's transience. Yet, the standard scholarly approach to such objects has been to see them as secondary, incomplete things, whose principal purpose was to refer to a complete and often life-size whole. *The Tiny and the Fragmented* offers a series of fresh perspectives on the familiar concepts of the tiny and the fragmented. Written by a prestigious group of internationally-acclaimed scholars, the volume presents a remarkable diversity of case studies that range from Neolithic Europe to pre-Colombian Honduras to the classical Mediterranean and ancient Near East. Each scholar takes a different approach to issues of miniaturization and fragmentation but is united in considering the little and broken things of the past as objects in their own right. Whether a life-size or whole thing is made in a scaled-down form, deliberately broken as part of its use, or only considered successful in the eyes of ancient users if it shows some signs of wear, it challenges our expectations of representation and wholeness, of what it means for a work of art to be finished and affective. Overall, *The Tiny and the Fragmented* demands a reconsideration of the social and contextual nature of miniaturization, fragmentation, and incompleteness, making the case that it was because of, rather than in spite of, their small or partial state that these objects were valued parts of the personal and social worlds they inhabited.
