About Canada: Media Peter Steven,2016-07-01T00:00:00Z Canada enjoys a long-held reputation for producing high-

quality media, from National Film Board documentaries to the CBC to children's programming. But in recent years, funding cuts, commercial media concentration and a sour political environment have been steadily eroding this reputation. In *About Canada: Media*, Peter Steven examines developments in film, television, the internet and newspapers and finds that the quality of our news and entertainment media is steadily declining, as well as becoming increasingly restricted and less diverse. Although Canada is not alone in this crisis of quality, we are particularly vulnerable living in the shadow of the United States. However, despite this decline and the shadow of our southern neighbour, Canada still produces distinctive and popular work, which receives critical international acclaim. *About Canada: Media* explores all things CanCon and argues that the Canadian people must reclaim the media from elite interests in order to ensure its democratic and quality future.

Radio and Society Matt Mollgaard, 2011-12-14 Radio is the original mass electronic medium and it continues to be critical for audiences wanting news, information, music and entertainment. For over a century enthusiasts, scholars, practitioners, governments, businesses and listeners have developed and influenced radio, making it a fascinating medium to explore today. There is still no mass medium as ubiquitous as radio and the Internet has extended its geographical and temporal reach even further. Radio remains a key media form and technology, not only surviving the challenges of the screen and digital ages, but developing despite and because of them. This book is a collection of contemporary research by radio scholars from the United Kingdom, Canada, Australia and New Zealand. It explores different aspects of this both simple and complex medium, from early radio histories to the contemporary developments of radio on the Internet. Chapters engage with critical debates about the role of government, business and communities in how radio is used in our societies. Some chapters provide important new insights into making radio, and radio as a cultural force. Other chapters explore developments in research methodologies that enable deeper insights into contemporary radio and its audiences. This book provides a range of platforms for engaging with radio and radio research as a rich, vibrant and fruitful way to further our understandings of the media and ultimately, ourselves.

Layout, Making it Fit Carolyn Knight, Jessica Glaser, 2003 Finding the right balance between content and space is a challenge every graphic designer faces. The cookie-cutter templates most layout books offer don't help, because every project has a different content-to-space ratio. Finally, here is a book that gets to the heart of challenging layout design. It offers general techniques for working with varying quantities of content and shows how designers can apply these techniques in their own work. The book focuses on the two most difficult layout issues: compacting a high volume of content onto a small area while maintaining beauty and readability; and

applying a small volume of content to a large space without making it look bare. From posters to logos and magazines to book covers, two veteran design consultants examine more than 150 projects and illustrate the methodologies and solutions that made each work. This invaluable resource reveals how to make content shine in any space.

Rethinking Who We Are Paul U. Angelini, 2020-07-10T00:00:00Z *Rethinking Who We Are* takes a non-conventional approach to understanding human difference in Canada. Contributors to this volume critically re-examine Canadian identity by rethinking who we are and what we are becoming by scrutinizing the "totality" of difference. Included are analyses on the macro differences among Canadians, such as the disparities produced from unequal treatment under Canadian law, human rights legislation and health care. Contributors also explore the diversities that are often treated in a non-traditional manner on the bases of gender, class, sexuality, disAbility and Indigeniety. Finally, the ways in which difference is treated in Canada's legal system, literature and the media are explored with an aim to challenge existing orthodoxy and push readers to critically examine their beliefs and ideas,

particularly in an age where divisive, racist and xenophobic politics and attitudes are resurfacing.

Broadcasting Policy in Canada, Second Edition Robert Armstrong, 2016-01-27 Where do Canadian content requirements come from? What is the difference between an over-the-top (OTP) service provider and a broadcast distribution undertaking (BDU)? How is broadcast regulation changing in response to the rise of new media? The second edition of Broadcasting Policy in Canada answers these questions by tracing the development of Canada's broadcasting legislation and analysing the roles and responsibilities of the key players in the broadcasting system, particularly those of the Canadian Radio-television and Telecommunications Commission (CRTC). Revised and updated to reflect the impact of digital media on the broadcasting industry and subsequent developments in the regulatory framework, the second edition of Broadcasting Policy in Canada offers a comprehensive overview of the policies that provide the foundation for the Canadian broadcasting system, including discussion of topics such as Canadian content, media regulation, and program financing. The book continues to provide a valuable resource for students, policymakers, and broadcasting industry members who are affected by the CRTC's policies and decisions.
