Tom McEvoy,Brad Daugherty

Securitization and Structured Finance Post Credit Crunch Markus Krebsz,2011-05-18 In this book, you will be introduced to generic best practice principles for a post credit crunch market. First, the book takes a closer look at the reasons why the market froze during the 2007 to 2009 credit crisis. Then you will learn how to use the principles explained here in your generic deal's typical life cycle stages. Throughout, each stage is discussed in detail, from strategy and feasibility, pre-close, at close, and post close. The final section of the book contains a toolbox of references, tables, dictionaries, and resources.

Special Edition Liam Leonard,John Barry,2009-01-01 This is a challenging time to be an academic with an interest in either the economy or the environment: we are being deluged with an over-supply of bad news. From the evidence of accelerating climate change to the increasingly desperate policies of 'fiscal stimulus' and 'quantitative easing' it is difficult enough to keep up with the jargon, never mind the policy. Academics tend to spend their careers looking backwards, analysing what is already safely established and categorized. The present crisis has deprived us of that luxury. Now more than ever our insights and our information are needed to save humanity from two interlinked crises that threaten our future. We need urgent solutions and we need co-operation: for this reason this issue includes contributions from academics and from campaigners. Many have questioned whether we have time to worry about the environment now that the financial crisis has become so pressing. What we seek to make clear in this special issue is that the two crises are in fact two aspects of the same crisis. It is a crisis of overconsumption, of debt-fuelled bingeing. It is a crisis of monetary-and-ecological debt; and of what happens when that debt starts to be called in.

Fire in the Valley Michael Swaine,Paul Freiberger,2014-10-20 In the 1970s, while their contemporaries were protesting the computer as a tool of dehumanization and oppression, a motley collection of college dropouts, hippies, and electronics fanatics were engaged in something much more subversive. Obsessed with the idea of getting computer power into their own hands, they launched from their garages a hobbyist movement that grew into an industry, and ultimately a social and technological revolution. What they did was invent the personal computer: not just a new device, but a watershed in the relationship between man and machine. This is their story. *Fire in the Valley* is the definitive history of the personal computer, drawn from interviews with the people who made it happen, written by two veteran computer writers who were there from the start. Working at InfoWorld in the early 1980s, Swaine and Freiberger daily rubbed elbows with people like Steve Jobs and Bill Gates when they were creating the personal computer revolution. A rich story of colorful individuals, *Fire in the Valley* profiles these unlikely revolutionaries and entrepreneurs, such as Ed Roberts of MITS, Lee Felsenstein at Processor Technology, and Jack Tramiel of Commodore, as well as Jobs and Gates in all the innocence of their formative years. This completely revised and expanded third edition brings the story to its completion, chronicling the end of the personal computer revolution and the beginning of the post-PC era. It covers the departure from the stage of major players with the deaths of Steve Jobs and Douglas Engelbart and the retirements of Bill Gates and Steve Ballmer; the shift away from the PC to the cloud and portable devices; and what the end of the PC era means for issues such as personal freedom and power, and open source vs. proprietary software.

Championship Hold'em Satellite Strategy Tom McEvoy,Brad Daugherty, Two world champions show players how to win their way into big tournaments offering millions of dollars in prize money for a fraction of the cost by playing in small-entry fee tournaments. Chris MoneyMaker did this when he parlayed a \$39 satellite win into a world championship title and \$2.5 million, as did Grey Raymer in 2004 when he turned \$150 into \$5 million. These exciting mini-tournaments, called satellites, made the authors millions of dollars and now they share their secrets with you. Step-by-step, you'll learn proven insider strategies for beating limit and no-limit hold'em satellites, as well as one-table, multi-table, online, and super satellites. Illustrations.

The Principles of Project Finance Rod Morrison,2016-03-03 The Principles of Project Finance reviews the technique of project finance. It explores, step-by-step, the key ingredients of the concept. The book is aimed at a business savvy audience, but one which is not necessarily up to speed on the concept, and has a global reach by covering both OECD countries and the emerging markets. Project finance is positioned at a key point between the global capital markets and the energy and infrastructure industries. To explain and illustrate the ideas behind project finance, the book is made of chapters written by a range of leading players in the market from around the world and is split into four sections: ¢ The first reviews various themes and issues key to the project finance market - views from bankers, lawyers and advisers plus chapters on bank, bond and multilateral finance and a look at environmental, insurance and construction market issues. ¢ The second section looks at how project finance is used in various sectors of the energy and infrastructure market - renewable energy, oil and gas, mining, PPPs and roads and transportation. ¢The third then takes an in-depth look at various projects finance markets from around the world - Australia, Vietnam, Indonesia, India, Turkey, Russia, Africa, France, USA and Brazil. ¢ Finally, the fourth section presents a series of Top 10 deal cases studies from the pages of Thomson Reuters Project Finance International (PFI), the leading source of global project finance information.

Playdate Thelma Adams,2011-03-22 Adams is that rare writer who sends out every laugh with a sting in its tail. Most novels fade from the memory. This one sticks.—Peter Travers, Rolling Stone Inside their picture-perfect homes, the residents of this quiet California suburb are not at all what they seem. Lance is a former weatherman, now a buff yogi, stay-at-home dad, and manager of his daughter's Girl Scout troop's cookie distribution. Belle is his precocious and quick-witted daughter. Darlene is a classic Type A work-a-holic, she has little time or patience for the needs of her husband and daughter And just down the street are Alec and Wren. Alec, a womanizing businessman, is also the financial backer—and sometimes more—behind Darlene's burgeoning empire. Meanwhile, Wren is a doting mother and talented yogi, ready to lay down the mat for a quick session with Lance. As looming Santa Ana winds threaten to turn brushfires into catastrophe; Playdate proves that relationships are complicated and the bonds between families, spouses and children are never quite what they seem. What happens next door, beyond the hedges, in the romper room and executive office—it's all as combustible as a quick brushfire on a windy day.

Global Ecological Politics Liam Leonard,John Barry,2010-03-05 Examines the range of environmental campaigns that are occurring across the planet. This title showcases a selection of case studies on grassroots initiatives and activism in areas such as green economic alternatives, regional activism in defence of communities, alternative or utopian communities, green politics and ecotourism.

Crunch Jared Bernstein,2008-04-21 Is Social Security really going bust, and what does that mean to me? If I hire an immigrant, am I hurting a native-born worker? Why does the stock market go up when employment declines? Should I give that homeless guy a buck? What's a "living wage"? How much can presidents really affect economic outcomes? What does the Federal Reserve Bank really do? And even when some pundits say the economy's sound, why do I still feel so squeezed? If you'd like some straight answers, premier economist Jared Bernstein is here to help. In *Crunch* he responds to dozens of questions he has fielded from working Americans, questions that directly relate to the bottom-line, dollars-and-cents concerns of real people. Chances are if there's a stumper you've always wanted to ask an economist, it's solved in this book. Bernstein is fed up with "Darth Vaders with PhDs" who use their supposed expertise to intimidate average citizens and turn economics into a tool for the rich and powerful. In the pages of *Crunch*, Bernstein lays bare the dark secret of economics: it's not an objective scientific discipline. It's a set of decisions about the best way to organize our society to produce and distribute resources and opportunities. And we all can, and must, participate in these decisions. "America is a democracy," he writes. "And in a democracy all of us, not just the elites and their scholarly shock troops, get to weigh in on biggies like this." To not weigh in, Bernstein insists, is a profoundly political act, one with damaging consequences. Our economy will be only as fair as we can make it. In this lively and irreverent tour through everyday economic mysteries, Bernstein helps us decode economic "analysis," navigate through murky ethical quandaries, and make sound economic decisions that reflect our deepest aspirations for ourselves, our families, and our country.

High Rise and Fall Andrea Carpenter, 2018-09-24 High Rise and Fall tells the story of how the European commercial property industry transformed from a local, small-scale business to an international, financially sophisticated, multi-billion-euro industry that was ultimately devastated by the 2008 crash. Drawing on her experience as both former Editor of EuroProperty and Director at the European Association for Investors in Non-Listed Real Estate Vehicles (INREV), Andrea Carpenter explains how the mid-1990s saw the arrival of a new style of property investing in the European markets. Seeking high returns, impervious to risk and with a seeming indifference to the buildings at the heart of the deals, US players such as Morgan Stanley, Goldman Sachs and Lehman Brothers conquered the European property markets with an audacity that both repulsed and intoxicated the locals. Fuelled by improving economic conditions in the early 2000s, European investors were keen to emulate all or parts of the US investors' philosophy. Armed with a wall of capital, the industry expanded into the far reaches of Europe in search of returns, and piled on new risks that it did not completely understand. In her highly readable style, Carpenter analyses the mistakes made by the industry in the run-up to the crash when billions were wiped off the value of property across the region, and it became clear that in the pursuit of high returns and a place in the wider financial world, the industry had turned its back on the basics – bricks and mortar. This book is aimed at students and younger professionals studying or working in the real estate industry who need to understand the events that shaped the world they are entering into, and the lessons that can be learned from them.

Venture Deals Brad Feld, Jason Mendelson, 2016-11-22 Get the inside scoop on what venture capitalists want to see in your startup as you hit the fundraising trail. This is the highly anticipated third edition of the best-selling book which has become the definitive resource for understanding venture capital fundraising. Whether you are an entrepreneur, lawyer, student or just have an interest in the venture capital ecosystem, Venture Deals is for you. The book dives deeply into how deals are constructed, why certain terms matter (and others don't), and more importantly, what motivates venture capitalists to propose certain outcomes. You'll see the process of negotiating from the eyes of two seasoned venture capitalists who have over 40 years of investing experience as VCs, LPs, angels, and founders. They will teach you how to develop a fundraising strategy that will be a win for all parties involved. This book is designed to bring transparency to the venture capital funding process and includes such topics as: How to raise money; What terms matter and which ones don't; How to negotiate a fair deal for everyone; What makes venture capitalists tick, including how they are compensated and motivated; How companies are valued by venture capitalists; How all current structures of funding work, including convertible debt, crowdfunding, pre-sales and other non-traditional methods; How these particular issues change through different stages of financing (seed, early, mid and late); and How to avoid business and legal pitfalls that many entrepreneurs make. And as in the previous editions, this book isn't just a one-sided opinion from venture capitalists, but also has helpful commentary throughout from a veteran CEO who has raised many rounds of financing from many different investors. If you are ready to learn all the secrets and ins and outs of fundraising, Venture Deals is an essential read.

Reforming the Unemployment Compensation System United States. Congress. House. Committee on Ways and Means. Subcommittee on Human Resources, 1990

Crisis at the Threshold Siegfried Finser, 2017-06-23 From his prison cell, Armand Dillon designs a plot to defeat his enemies and regain his prominence as the President and CEO of TCP Corporation. He solicits the help of the only convicts who will be out on parole shortly. They are a strange lot, unreliable, flawed, but apparently willing to do his bidding for a price. The other characters in this third book of a trilogy are a mixture of imperfect but developing humans at various crossroads in their lives. Lucinda is considering a new career, Stu and Bennet are very likely to betray Armand, and Shaman Pi is given a task he is barely capable of executing. Rachel, the long-suffering ex-wife of Armand Dillon is having mysterious spiritual experiences that test her sanity and her beliefs. Through study and meditation, she is approaching initiation and lives through her own crisis at the threshold. Waldorf education, Rudolf Steiner and Anthroposophy move into the current mainstream of human experience. The real heroin is Emily, the nine-year-old girl who demonstrates the most remarkable courage and discernment in facing her greatest challenge. Partly due to her, all these twelve characters take steps in their development as appropriate for their individual destinies. This is fiction, but reality fiction.
