Communication Technology Update and Fundamentals August E. Grant,Jennifer H. Meadows,2018-06-13 For three decades, Communication Technology Update and Fundamentals has set the

standard as the single best resource for students and professionals looking to brush up on how communication technologies have developed, grown, and converged, as well as what's in store for the future. The secret to the longevity is simple—every two years, the book is completely rewritten to ensure that it contains the latest developments in mass media, computers, consumer electronics, networking, and telephony. Plus, the book includes the Fundamentals: the first five chapters explain the communication technology ecosystem, the history, structure, and regulations. The chapters are written by experts who provide snapshots of the state of each individual field. Pathobiology of Alzheimer's Disease ,1995-10-17 Neuroscience Perspectives provides multidisciplinary reviews of topics in one of the most diverse and rapidly advancing fields in the life sciences. Whether you are a new recruit to neuroscience, or an established expert, look to this series for 'one-stop' sources of the historical, physiological, pharmacological, biochemical, molecular biological and therapeutic aspects of chosen research areas. The last decade has seen tremendous advances in our understanding of the pathobiology of Alzheimer's disease. These will lead to the first generation of drugs aimed at prevention rather than cure. This book covers some of the most important and exciting of these advances, with chapters written by many of the leading researchers in the field. With genetic studies as a backbone to this volume many chapters are devoted to the function and regulation of amyloid b-protein precursor (APP) and apolipoprotein E (ApoE). Other chapters describe cell biological approaches helping to piece together the link between the genetic alterations and the phenotype we call Alzheimer's disease. Although APP and its proteolytic cleavage product, amyloid b-protein, do not answer all the questions, detailed research into this system has undoubtedly increased our knowledge of the pathobiology of AD and has lead to

the identification of other risk factors. Understanding the role of ApoE in the pathology of Alzheimer's disease promises to open a whole new field in AD research. * * Reviews the current knowledge of the pathogenesis of Alzheimer's Disease from a clinical perspective to a genetic and cell biological perspective * A comprehensive description of the role of amyloid B-protein precursor in Alzheimer's disease. * Up-to-date research data * Clear illustrations complement the text

Strategies and Tools for a Sustainable Rural Rio de Janeiro Udo Nehren,Sabine Schl☐ter,Claudia Raedig,Dietmar Sattler,Helga Hissa,2018-08-16 This book is a compilation of recent developments in land, ecosystem, and water management in the Brazilian state of Rio de Janeiro. The state is located in the biodiversity hotspot of the Atlantic Forest (Mata Atlântica), a biome characterized by high biological diversity and endemism. At the

same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America. This development process has been accompanied by population growth, industrialization, urbanization, as well as consumption and degradation of land and water resources. In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources, nature conservation, and economic development. An overview is provided of the different strategies and tools that have been developed in the fields of agriculture, ecosystem management and biodiversity, integrated water management, land restoration, disaster risk reduction and climate change adaptation, as well as environmental governance and economic instruments. This book covers a wide spectrum from applied research to science-policy interfaces, planning concepts, and technical tools and has a model character for other rural areas in Latin America. Target groups are scientists, practitioners, policy makers and graduate students in the field of environmental management. The different chapters are written by researchers and practitioners of the German-Brazilian project INTECRAL (Integrated Eco Technologies and Services for a

Sustainable Rural Rio de Janeiro), the rural development program Rio Rural under the state secretary for agriculture and animal husbandry, as well as invited scientists from Brazilian universities and research institutes. It bridges existing gaps between science, policies, and practice in rural development.

Therefore, even in pandemic conditions, we can still have scientific discussions, even virtually. The main theme of this symposium is Reinforcement of the Sustainable Development Goals Post Pandemic as a part of the masterplan of United Nations for sustainable development goals in 2030. This symposium is attended by 348 presenters from Indonesia, Malaysia, UK, Scotland, Thailand, Taiwan, Tanzania and Timor Leste which published 202 papers. Furthermore, we are delighted to introduce the proceedings of the 2nd Borobudur Symposium Borobudur on Humanities and Social Sciences 2020 (2nd BIS-HSS 2020). We hope our later discussion may result

transfer of experiences and research findings from participants to others and from keynote speakers to participants. Also, we hope this event can create further research network.

Platform Labour and Global Logistics Immanuel

Ness,2022-12-26 Over the past 50 years the global labour market is transforming from reliable employment to low-wage and unstable informal and precarious jobs. This ineluctable shift is a consequence of the concentrated application of neoliberalism since the 1980s, as capitalism is converting standardised labour markets in the developed Global North into contingent and informal labour. Platform Labour and Global Logistics: A Research Companion examines the most important developments and features of global logistics and the emergence of the platform economy through historical comparative chapters and case studies. Part I surveys the logistics revolution and its impact on labour in key sectors of the global economy and probes the viability of the platform as a generator of economic and financial growth and innovation. The chapters of Part 1 offer a fulsome analysis and critique of the economic and technical reconfiguration brought on by neoliberal capitalism and the diffusion of the platform and logistics as a feasible model into the future. Part II examines labour restructuring from standardized to informal work through the platform and information technology, and the political and environmental challenges to labour. Part III provides global case studies on the informal economy through case studies of crucial economies where

the platform has become dominant, and Part IV examines how the platform has contributed to geographic mobility and labour migration, and the consequences on workers. Platform Labour and Global Logistics: A Research Companion presents a unique contribution to the political economy literature through highlighting the significance of the impact of the platform and logistics on the working class and potential challenges from labour across the world. This book is intended for academics, researchers and students studying technological innovation, global supply chains, labour restructuring, and worker resistance.
