China's State Owned Enterprise Reforms Leila Fernandez-Stembridge,Juan Antonio Fernandez,2007-01-24 Much has been written on China's State-Owned Enterprises (SOEs) reform following the restructuring impact on China's economic reform process in the last decade. However, as a major root of social and economic change, little has been discussed beyond a description of SOEs shortcomings and their overall impact on the economy. This book provides a more in-depth analysis of SOEs by assessing the transformation process of eleven specific industries, with reference to the state of competition, the influence of WTO membership and the challenges these industries face in the future. Importantly, the authors also provide a personal perspective alongside the industry analysis with eleven case studies of firms actually undergoing this restructuring process, including interviews with crucial agents of reform such as CEOs and GMs. The provision of both a macro and business perspective of SOEs reforms provides the reader with a complete and accurate insight into the economic, social and business reality of China today. China's State Owned Enterprises' Reforms will therefore be essential reading for those interested in the Chinese economy and Chinese business, as well as economists, foreign investors, MBA and EMBA students and scholars specializing in emerging or transitional economies.

Developing China: The Remarkable Impact of Foreign Direct Investment Michael J. Enright,2016-09-12 One of the most important features of China's economic emergence has been the role of foreign investment and foreign companies. The importance goes well beyond the USD 1.6 trillion in foreign direct investment that China has received since it started opening its economy. Using the tools of economic impact analysis, the author estimates that around one-third of China's GDP in recent years has been generated by the investments, operations, and supply chains of foreign invested companies. In addition, foreign companies have developed industries, created suppliers and distributors, introduced modern technologies, improved business practices, modernized management training, improved sustainability performance, and helped shape China's legal and regulatory systems. These impacts have helped China become the world's second largest economy, its leading exporter, and one of its leading destinations for inward investment. The book provides a powerful analysis of China's policies toward foreign investment that can inform policy makers around the world, while giving foreign companies tools to demonstrate their contributions to host countries and showing the tremendous power of foreign investment to help transform economies.
