Zerinity ANT,2017-05-17 The author has always maintained he is a conduit, and that the poetry and prose has come through him. There have been occasions when he understood the profoundness of the work after having written it. By and large, the poems took the size of the paper he had in his hand. The beauty of the flow and the simplicity of words, coupled with the depth of the concept has been to him a source of creative joy, which simply must be shared. These touch various aspects of life, spirituality, adolescence, love, character, time, and other topics like mathematics collated over the years as he evolved. This is not a book to be read through at

one go. One has to pause, ponder, digest, and then move to the next. Other than the broad separation of poetry and prose, there has been no effort to slot them in by genre or chronologically. It is a kaleidoscope to be enjoyed an offering, so to say.

Analytical Network and System Administration Mark Burgess, 2012-12-17 Network and system administration usually refers to the skill of keeping computers and networks running properly. But in truth, the skill needed is that of managing complexity. This book describes the science behind these complex systems, independent of the actual operating systems they work on. It provides a theoretical approach to systems administration that: saves time in performing common system administration tasks. allows safe utilization of untrained and trained help in maintaining mission-critical systems. allows efficient and safe centralized network administration. Managing Human-Computer Networks: Will show how to make informed analyses and decisions about systems, how to diagnose faults and weaknesses Gives advice/guidance as to how to determine optimal policies for system management Includes exercises that illustrate the key points of the book The book provides a unique approach to an old problem and will become a classic for researchers and graduate students in Networking and Computer Science, as well as practicing system managers and system administrators.
