*Innovation Management* Prof. Dr. Katrin Stefan,2021-01-12 This is the first volume of publications on recent developments in innovation management within the newly established series edited by Kempten University of Applied Science and published by Deutsches Institut für Ideen- und Innovationsmanagement, the German institute for idea and innovation management. The authors are Master students enrolled in the Master programme Global Business Development. The papers cover a wide range of different approaches to highlight how management theory responds to the contingencies of an increasing complex and volatile business environment.

Foreign Direct Investment in Central Eastern Europe Saul Estrin,Xavier Richet,Josef C. Brada,2000 This work contains 12 case studies of foreign direct investment, four each in Bulgaria, the Czech Republic and Slovenia. Included are major firms such as Skoda and Danone, as well as smaller ventures.

*Nordic Capitalisms and Globalization* Peer Hull Kristensen,Kari Lilja,2012-05-24 In the early 1990s the Nordic countries were considered to be in a serious situation. The costs of welfare states, generous unemployment benefits, high taxation rates, strong unions, and centralized wage bargaining were thought to be undermining their competitiveness in an age of rapid globalization. By 2005 however, they all ranked at the top of a number of performance indexes on economic competitiveness and sustainability. Citizens in the Nordic countries continue to participate in and benefit from globalization on a much wider scale than in any other similarly highly developed country, and these countries increasingly provide templates within the EU for imitation and social innovation. This book investigates how and why welfare services, active labour market institutions, and public policies were re-combined into enabling and risk-sharing mechanisms to stimulate innovation, and how this made it possible for firms to change their work organization and pursue highly rewarding and distinctive globalization strategies. Through detailed analysis of Finland, Denmark, Norway, and Sweden, this book reveals the dynamics and transformations of their national business systems, and the emerging new patterns of interaction between firms, labour markets, and institutions. It will be valuable addition to the literature on social innovation and institutional entrepreneurship.

*Beating Low Cost Competition* Adrian Ryans,2009-08-27 Low cost competitors, who offer “good enough” products and services at very attractive prices, are currently significantly impacting the businesses of many leading companies, and some are starting to “move up” to challenge the traditional companies in their core markets. It’s only a matter of time before most companies will feel the pressure from these aggressive, cut-price competitors. Beating Low Cost Competition offers a step-by-step structured approach to help executives in traditional companies with premium brands think through the options for responding to their low cost rivals and select the most appropriate strategy to win in their chosen markets. By examining a wide-ranging group of companies from around the world, Adrian Ryans provides numerous examples of how different companies in different industries have responded to low cost competitors and analyses the effectiveness of their strategies. He also discusses the leadership and cultural challenges that many companies are facing as they take steps to respond to their low cost rivals. Ultimately, the insights gained from this book will lead to better and more profitable business decisions. Adrian Ryans is Professor of Marketing and Strategy at IMD, Lausanne, Switzerland. He has designed and taught on executive programs for organizations in North America, Europe, Australia and Asia, including GE, Bank of Montreal, Medtronic, Deloitte, Borealis, Saurer, Vestas, IBM, Boeing, National Semiconductor, BioWare, ASML, Holcim, Varian, Hoechst, Amgen, Fluke, LSI Logic, Hutchison Port Holdings and Qualcomm. **Manufacturing Automation at the Crossroads** Louis-François Pau,Jan-Olaf Willums,1993 Information technology has become an important discipline for the manufacturing industry. However, the complexity of modern production has made manufacturing dependent on a rapidly developing computer-based support technology. The growth of a multitude of data-solutions and the use of incompatible products on different factory locations have led to so-called islands of automation. Such islands may be of considerable individual value, but pose integration problems if one wishes to integrate factory functions. The complexity of the modern factory sets stringent requirements to the systems integrator.
