**The First Outstanding 50 Years of "Università Politecnica delle Marche"** Sauro Longhi,Andrea

Monteriù,Alessandro Freddi,Giulia Bettin,Silvio Cardinali,Maria Serena Chiucchi,Marco Gallegati,2020-01-03 The book describes

significant multidisciplinary research findings at the Università Politecnica delle Marche and the expected future advances. It addresses some of the most dramatic challenges posed by today's fast-growing, global society and the changes it has caused, while also discussing solutions to improve the wellbeing of human beings. The book covers the main research achievements made in the social sciences and humanities, and includes chapters that focus on understanding mechanisms that are relevant to all aspects of economic and social interactions among individuals. In line with Giorgio Fuà's contribution, the interdisciplinary research being pursued at the Faculty of Economics of Università Politecnica delle Marche is aimed at interpreting the process of economic development in all of its facets, both at the national and local level, with a particular focus on profit and non-profit organizations. Various disciplines are covered, from economics to sociology, history, statistics, mathematics, law, accounting, finance and management.

**Essays on Everything** Margaret Stortz,2013-03-30

This book is 6x9, 118 pages, soft cover. It includes 45 mini-essays on many different subjects that affect readers' everyday lives. Some of these essays are whimsical; many are thoughtful and offer the reader ideas to ponder. The author has given a light, thoughtful touch to each essay, ranging in categories from as whimsical as On Chocolate to the mundane, On Money, to the considerable, On Love. They are offered as a way to start the day on a positive note or to enjoy as

an interlude with familiar subjects that the reader finds in ordinary living.

*Architectural Exaptation* Alessandro Melis, Telmo Pievani, Jose Antonio Lara-Hernandez, 2024-03-29  
*Architectural Exaptation: When Function Follows Form* focuses on the significance and the originality of the study of exaptation. It presents exaptation as an opportunity to extend architectural design towards more sustainable approaches aimed at enforcing urban resilience. The use of exaptation's definition in architecture supports the heuristic value of cross-disciplinary studies on biology and architecture, which seem even more relevant in times of global environmental crises. This book aims to make a critique of the pre-existing and extensive paternalistic literature. Exaptation will be described as a functional shift of a structure that already had a prior, but different, function. In architecture, a functional shift of a structure that already had a function may apply to forms of decorative elements embedded in architectural components, and to both change of function of tectonic elements and the change of use of an architectural space. The book is illustrated with examples from around the globe, including China, Italy, Mexico, New Zealand, the USA and the UK, and looks at different civilizations and diverse historical periods, ranging from the urban to the architectural scale. Such examples highlight the potential and latent human creative capacity to change the use and functions, something that cities and buildings could consider when facing disturbances. Exaptation is shown as an alternative narrative to the simplifications of evolutionary puritanism. It also offers an innovative perspective and presents an opportunity to re-think the manner in which we design and redesign our cities. This book will be of interest to architecture, planning, urban design and

biology researchers and students.

**Geotechnical Research for Land Protection and Development** Francesco Calvetti, Federica

Cotecchia, Andrea Galli, Cristina Jommi, 2019-06-22

This volume gathers the latest advances, innovations, and applications in the field of geotechnical engineering, as presented by leading researchers and engineers at the 7th Italian National Congress of Geotechnical Researchers (CNRIG 2019), entitled "Geotechnical Research for the Protection and Development of the Territory" (Lecco, Italy, July 3-5, 2019). The congress is intended to promote exchanges on the role of geotechnical research and its findings regarding the protection against natural hazards, design criteria for structures and infrastructures, and the definition of sustainable development strategies. The contributions cover a diverse range of topics, including infrastructural challenges, underground space utilization, and sustainable construction in problematic soils and situations, as well as geo-environmental aspects such as landfills, environmental and energy geotechnics, geotechnical monitoring, and risk assessment and mitigation. Selected by means of a rigorous peer-review process, they will spur novel research directions and foster future multidisciplinary collaborations.

**Landslide Science and Practice** Claudio

Margottini, Paolo Canuti, Kyoji Sassa, 2013-08-18

This book contains peer-reviewed papers from the Second World Landslide Forum, organised by the International Consortium on Landslides (ICL), that took place in September 2011. The entire material from the conference has been split into seven volumes, this one is the sixth: 1. Landslide Inventory and Susceptibility and Hazard Zoning, 2. Early Warning, Instrumentation and Monitoring, 3. Spatial Analysis and Modelling, 4. Global Environmental Change, 5. Complex Environment, 6.

Risk Assessment, Management and Mitigation, 7.  
Social and Economic Impact and Policies.

**Patrons and Adversaries** Caroline

Castiglione,2005-02-03 The early modern Roman countryside was a site of contestation between great aristocratic families and an expanding papal political regime. Rarely has the role of the inhabitants of this landscape--the villagers--been considered as part of that power struggle. As Caroline Castiglione shows in this compelling revisionist work, one Roman aristocratic family, the Barberini, was not squeezed out of governing by the extension of the papal bureaucracy, but rather became increasingly engaged with it during the long eighteenth century. Through their participation in the rural commune, villagers in an extensive territory belonging to the Barberini became active participants in the governing of the countryside. Villagers cultivated and exploited interference from the aristocratic family and the papal government, but they also kept urban elites at bay, defending their rights through the strategies of adversarial literacy. Such literate practices drew on village mastery of local constitutions, debates in the village assembly, and brilliant use of the legal system of the papacy to thwart the designs of the Barberini. Later villagers created and interpreted sources for themselves, effectively challenging the elite monopoly on making and interpreting texts. A lost world of increasingly savvy villagers, irate nobles, and exasperated bureaucrats emerges here in an engaging narrative that chronicles how seemingly marginalized villagers challenged the

pragmatic control of the Roman countryside, using texts and ideas that urban elites had exported to the countryside for other purposes.

**Time and the Crystal** Robert M. Durling,Ronald L. Martinez,2018-09-04 The Rime petrose, Dante's powerful lyrics about a woman as beautiful and as hard as a precious stone, are generally acknowledged to be an important moment in his stylistic development. In this full-length investigation of the poetics of the petrose and of their relation to TheDivine Comedy, Robert M. Durling and Ronald L. Martinez uncover new material, especially from medieval science (astrology and mineralogy), philosophy, and theology. The authors argue that the Rime petrose represent a major turning point in Dante's conception of a microcosmic poetics that became the fundamental mode of the Commedia. They demonstrate how Dante here attempts his first full

account of his relation to the universe as a whole. This work offers many insights into the intrinsic significance of these remarkable poems and their place in Dante's development. Especially far-reaching are the implications for the interpretation of *The Divine Comedy*. Time and the Crystal will interest not only students of Dante but also intellectual historians, historians of science, students of poetics and poetic theory, and all those interested in medieval literature.
