Madness, Art, and Society Anna Harpin,2018-01-19 How is madness experienced, treated, and represented? How might art think around – and beyond – psychiatric definitions of illness and wellbeing? Madness, Art, and Society engages with artistic practices from theatre and live art to graphic fiction, charting a multiplicity of ways of thinking critically with, rather than about, non-normative psychological experience. It is organised into two parts: ‘Structures: psychiatrists, institutions, treatments’, illuminates the environments, figures and primary models of psychiatric care, reconsidering their history and contemporary manifestations through case studies including David Edgar’s Mary Barnes and Milos Forman’s One Flew Over the Cuckoo’s Nest. ‘Experiences: realities, bodies, moods’, problematises diagnostic categories and proposes more radically open models of thinking in relation to experiences of madness, touching upon works such as Richard Kelly’s Donnie Darko and Duncan Macmillan’s People, Places, and Things. Reading its case studies as a counter-discourse to orthodox psychiatry, Madness, Art, and Society seeks a more nuanced understanding of the plurality of madness in society, and in so doing, offers an outstanding resource for students and scholars alike.

Shake, Rattle and Roll: Yugoslav Rock Music and the Poetics of Social Critique Dalibor Mišina,2016-04-01 From the late-1970s to the late-1980s rock music in Yugoslavia had an important social and political purpose of providing a popular cultural outlet for the unique forms of socio-cultural critique that engaged with the realities and problems of life in Yugoslav society. The three music movements that emerged in this period - New Wave, New Primitives, and New Partisans - employed the understanding of rock music as the 'music of commitment' (i.e. as socio-cultural praxis premised on committed social engagement) to articulate the critiques of the country's 'new socialist culture', with the purpose of helping to eliminate the disconnect between the ideal and the reality of socialist Yugoslavia. This book offers an analysis of the three music movements and their particular brand of 'poetics of the present' in order to explore the movements' specific forms of socio-cultural engagement with Yugoslavia's 'new socialist culture' and demonstrate that their cultural praxis was oriented towards the goal of realizing the genuine Yugoslav socialist-humanist community 'in the true measure of man'. Thus, the book's principal argument is that the driving force behind the music of commitment was, although critical, a fundamentally constructive disposition towards the progressive ideal of socialist Yugoslavia.

Byzantium and Venice, 1204-1453 Julian Chrysostomides,2023-05-31 Byzantium and Venice: 1204-1453, a selection of articles by the late Julian Chrysostomides, focuses on Byzantium after the Fourth Crusade and its relationship with Venice, particularly in the late Palaeologan period. Seven of the articles deal with aspects of Veneto-Byzantine interactions in the Peloponnese, while the remainder concentrate on the political and commercial ties between Byzantines and Venetians. The essays draw upon Julian Chrysostomides' unrivalled knowledge of the relevant Venetian documents.

Innovations in the Industrial Internet of Things (IIoT) and Smart Factory Goundar, Sam,Avanija, J.,Sunitha, Gurram,Madhavi, K. Reddy,Bhushan, S. Bharath,2021-01-22 Industrial internet of things (IIoT) is changing the face of industry by completely redefining the way stakeholders, enterprises, and machines connect and interact with each other in the industrial digital ecosystem. Smart and connected factories, in which all the machinery transmits real-time data, enable industrial data analytics for improving operational efficiency, productivity, and industrial processes, thus creating new business opportunities, asset utilization, and connected services. IIoT leads factories to step out of legacy environments and arcane processes towards open digital industrial ecosystems. Innovations in the Industrial Internet of Things (IIoT) and Smart Factory is a pivotal reference source that discusses the development of models and algorithms for predictive control of industrial operations and focuses on optimization of industrial operational efficiency, rationalization, automation, and maintenance. While highlighting topics such as artificial intelligence, cyber security, and data collection, this book is ideally designed for engineers, manufacturers, industrialists, managers, IT consultants, practitioners, students, researchers, and industrial industry professionals.

Bioplastics for Sustainable Development Mohammed Kuddus,Roohi,2021-06-21 This book provides the latest information on bioplastics and biodegradable plastics. The initial chapters introduce readers to the various sources and substrates for the synthesis of bioplastics and biodegradable plastics, and explain their general structure, physio-chemical properties and classification. In turn, the book discusses innovative methods for the production of bioplastics at the industrial level and for the microbial production of bioplastics. It highlights the processes that are involved in the conversion of agro-industrial waste into bioplastics, while also summarizing the mechanisms of biodegradation in bioplastics. The book addresses a range of biotechnological applications of bioplastics such as in agriculture, food packaging and pharmaceutical industry, as well as biomedical applications.

Agricultural Cybernetics Yanbo Huang,Qin Zhang,2021-08-17 Agricultural systems are uniquely complex systems, given that agricultural systems are parts of natural and ecological systems. Those aspects bring in a substantial degree of uncertainty in system operation. Also, impact factors, such as weather factors, are critical in agricultural systems but these factors are uncontrollable in system management. Modern agriculture has been evolving through precision agriculture beginning in the late 1980s and biotechnological innovations in the early 2000s. Precision agriculture implements site-specific crop production management by integrating agricultural mechanization and information technology in geographic information system (GIS), global navigation satellite system (GNSS), and remote sensing. Now, precision agriculture is set to evolve into smart agriculture with advanced systematization, informatization, intelligence and automation. From precision agriculture to smart agriculture, there is a substantial amount of specific control and communication problems that have been investigated and will continue to be studied. In this book, the core ideas and methods from control problems in agricultural production systems are extracted, and a system view of agricultural production is formulated for the analysis and design of management strategies to control and optimize agricultural production systems while exploiting the intrinsic feedback information-exchanging mechanisms. On this basis, the theoretical framework of agricultural cybernetics is established to predict and control the behavior of agricultural production systems through control theory.

Modern Techniques of Rice Crop Production Naeem Sarwar,Atique-ur-Rehman,Shakeel Ahmad,Mirza Hasanuzzaman,2022-04-09 This book collects all the latest technologies with their implications on the global rice cultivation. It discusses all aspects of rice production and puts together the latest trends and best practices in the rice production. Rice is produced and consumed worldwide and especially an important crop for Asia. It is a staple food in majority of population living in this continent which distinguishes this from rest of the world. Climatic fluctuations, elevated concentrations of carbon dioxide, enhanced temperature have created extreme weather conditions for rice cultivation. Also, increasing pest attacks make situation complicated for the farmers. Therefore, rice production technology also has to be adjusted accordingly. This book is of interest to teachers, researchers, plant biotechnologists, pathologists, agronomists, soil scientists, food technologists from different part of the globe. Also, the book serves as additional reading material for students of agriculture, soil science, and environmental sciences. National and international agricultural scientists, policy makers will also find this to be a useful read

Crash Cinema Will Godfrey,Jill Good,Mark Goodall,2009-10-02 Crash Cinema: Representation in Film is a collection of essays that emerged from Crash Cinema an annual symposium that is an integral part of the Bradford Film Festival at the National Media Museum (UK). The symposium was created by academics and curators who share the common aim of promoting the importance of film both as an academic study and for critical public appreciation. Films can be enjoyed as entertainment, they can educate and inform and they can excite and disturb. Films are powerful pieces of culture. The films that we now ‘consume’ do more than simply amuse or horrify. Cinema not only thrills us but also communicates to us about ourselves and in the twentieth and twenty-first century moving images have become the dominant form of this communication. Bombarded by images, we inhabit a media intensive world in which every aspect of life is pervaded by visual signs. In these circumstances it becomes increasingly significant to engage with the politics of

representation. Through this vital process we can acknowledge that all cultural forms, whether in high art or the mass media, are in the broadest sense political. We can also appreciate that it is a complex agenda of interests that shapes specific ideological meanings. Fulsomely equipped, we can apply this essential tool to the exciting task of decoding the political, social and cultural meanings articulated through the making, promotion and consumption of film. This book aims to offer an arena for the analysis of these representations. Representations cannot depict the 'truth' and the essays in this book do not claim to search for the 'truth'. We ask whose 'truth' is being represented, how is it represented and why is it represented like that? We also ask how do representations tell us something about the culture within which they are created. Yet the essays in this volume are not 'stuck' in the representational concerns of the past and try instead to uncover the power of cinema to shock and surprise whether that be through visceral impact, subversive content, experiments with identity or the exploration of the taboo. Representation, as defined by the eleven essays in this book, is a fluid and dynamic approach to the study of film. The study of film, to which this book contributes some unique case studies, is as popular as ever and has withstood growing challenge from the new media such as CG Animations, the internet and computer, console and online gaming. This is because the pleasure of film is still the most humanistic and because the sophistication of the representations offered by cinematic expression remain ever more complex and pleasurable to decipher. This book can therefore be read by any student, academic, writer or filmmaker hooked on these delights.

Cassava Andri Frediansyah,2021-09-01 Cassava is a staple crop in a large number of countries due to its adaptability to a variety of climatic conditions. It has spread extensively throughout Latin America, tropical Asia, and Sub-Saharan Africa. Cassava, which is well known for its high carbohydrate content, is the third most carbohydrate-rich food after rice and maize. This book discusses the diversity of cassava and its microbiome, cassava cultivation and postharvest practices, as well as crop yield-reducing diseases. Due to its widespread use and market importance, cassava has been subjected to biological and technological intervention to ensure food safety. This book will help readers to gain knowledge about cassava, its biological properties, and some of the strategies and procedures necessary to increase cassava crop output.

Trends in African Diaspora Mathematics Research Toka Diagana,2007 The African Diaspora presents mathematical research of highest rank. It offers a forum for mathematical research with some emphasis on the contributions of all African mathematicians and the rich connections between all African universities and those of other continents. This includes the Denjoy integral, equivalent cohomology, semi-linear equations, rational approximants, automorphic solutions and characterisations of multivariate exponential families.

Building Resilience Sri Sekar,Kyle Lundin,Christopher Tucker,Joe Figueiredo,Javier Aguilar,2019-05-31 A sustainable path to development has profound consequences for all economic activities and related policies. The mining industry, which provides input to almost every product and service in the world, is highly relevant to the goal of achieving sustainable development in mineral-rich countries and in the global economy. In addition, environmental sustainability is a critical concern for mining companies, whose growth is increasingly affected by climate change. Given the centrality of minerals and metals to our way of living, Building Resilience: A Green Growth Framework for Mobilizing Mining Investment investigates the extent to which the mining industry can contribute to green growth. Despite what ought to be a tight nexus of public and private interest in targeted green sector investment, this report finds that there is a misalignment between mining companies' investment in climate-sensitive production processes, and policy makers' efforts to develop a cohesive green economy framework for industry to navigate. The private and public sectors regard the climate agenda and the development of local economic opportunity as separate matters. Neither industry nor government have yet to effectively leverage their climate imperatives and mandates to seize green growth opportunities. To address this misalignment, this report proposes a framework to help mining companies and governments integrate climate change and local economic opportunity activities. Going further, the report offers examples of projects and policies that support green growth: particularly climate-related activities that create scalable economic value and invest in long-lasting green infrastructure.

Balkan holocausts? David Bruce MacDonald,2013-07-19 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. Comparing and contrasting propaganda in Serbia and Croatia from 1986 to 1999, this book analyses each group's contemporary interpretations of history and current events. It offers a detailed discussion of Holocaust imagery and the history of victim-centred writing in nationalist theory, including the links between the comparative genocide debate, the so-called Holocaust industry, and Serbian and Croatian nationalism. There is a detailed analysis of Serbian and Croatian propaganda over the Internet, detailing how and why the Internet war was as important as the ground wars in Kosovo, Croatia and Bosnia-Herzegovina, and a theme-by-theme analysis of Serbian and Croatian propaganda, using contemporary media sources, novels, academic works and journals.

Value chain development to benefit smallholders in Ghana: The effectiveness of selected interventions Kolavalli, Shashidhara,Agandin, John,Ampofo, Aaron,Kemeze, Francis,Amewu, Sena,2020-03-26 This study examines interventions in two agricultural development projects in Ghana which aimed to build competitiveness of selected value chains to generate growth and reduce poverty - the Northern Rural Growth Project, implemented between 2009 and 2016, and the Market Oriented Agriculture Programme, which began in 2004 and is still in place. These projects aimed to sustainably increase rural households' income through the development of inclusive and profitable agricultural commodity and food value chains to generate agricultural surpluses and to benefit from improved access to remunerative markets. In this study, the efficacy of four sorts of value chain interventions implemented by the two projects are examined in the context of the strengthening maize, pineapple, mango, and citrus value chains: • Facilitating interactions among value chain actors to encourage technical and institutional innovations, • Improving the operations of individual actors, such as producers, service providers, traders, and processors; • Helping develop new services for producers or initiating new producer institutions; and • Improving infrastructure. The study sought to identify how, where, and when might it be appropriate to intervene in value chains, particularly to benefit smallholders. While the lessons from this study do not comprehensively answer these questions, a better understanding is provided on the reasons behind the outcomes the projects attained in seeking to strengthen agricultural commodity value chains and some guidance is offered on how interventions aimed at doing so should be designed.

Practical Food Safety Rajeev Bhat,Vicente M. Gomez-Lopez,2014-03-31 The past few years have witnessed an upsurge in incidencesrelating to food safety issues, which are all attributed todifferent factors. Today, with the increase in knowledge andavailable databases on food safety issues, the world is witnessingtremendous efforts towards the development of new, economical andenvironmentally-friendly techniques for maintaining the quality ofperishable foods and agro-based commodities. The intensification offood safety concerns reflects a major global awareness of foods inworld trade. Several recommendations have been put forward byvarious world governing bodies and committees to solve food safetyissues, which are all mainly targeted at benefiting consumers. Inaddition, economic losses and instability to a particular nation orregion caused by food safety issues can be huge. Various'non-dependent' risk factors can be involved withregard to food safety in a wide range of food commodities such asfresh fruits, vegetables, seafood, poultry, meat and meat products.Additionally, food safety issues involves a wide array of issuesincluding processed foods, packaging, post-harvest preservation,microbial growth and spoilage, food poisoning, handling at themanufacturing units, food additives, presence of banned chemicalsand drugs, and more. Rapid change in climatic conditions is alsoplaying a pivotal role with regard to food safety issues, andincreasing the anxiety about our ability to feed the worldsafely. Practical Food Safety: Contemporary Issues and FutureDirections takes a multi-faceted approach to the subject offood safety, covering various aspects ranging from microbiologicalto chemical issues, and from basic knowledge to futureperspectives. This is a book exclusively designed to simultaneouslyencourage consideration of the present knowledge and futurepossibilities of food safety. This book also covers the classictopics required for all books on food safety, and encompasses themost recent updates in the field. Leading researchers haveaddressed new issues and have put forth novel research findings that will affect the world in the future, and suggesting how theses should be faced. This book will be useful for researchers engaged in the field offood science and food safety, food industry personnel engaged insafety aspects, and governmental and non-governmental agenciesinvolved in establishing guidelines towards establishing safety measures for food and agricultural commodities.

The Donnie Darko Book Richard Kelly,2003-10-31 A companion volume to one of the most original works of recent American Cinema* Donnie Darko was the surprise cult hit of 2001. Appearing nationwide on critic's year-end top-ten lists, the quirky independent film's effortless blending of science fiction, horror, adolescent angst, and social satire defied description while simultaneously providing an unexpectedly poignant catharsis for Sept. 11 blues (Jan Stuart, Newsday). Its Möbius strip-like narrative about Donnie, a troubled teenager who can see into the future, continues to inspire fans to obsessive heights. The Donnie Darko Book includes the film's screenplay, an in-depth interview with writer-director Richard Kelly, facsimile pages from The Philosophy of Time Travel book that Donnie uses to go back in time, as well as photos and drawings from the film and the artwork it inspired.
