Intelligent Data Analytics for Decision-Support Systems in Hazard Mitigation Ravinesh C.

Deo,Pijush Samui,Ozgur Kisi,Zaher Mundher Yaseen,2020-07-29 This book highlights cutting-edge applications of machine learning techniques for disaster management by monitoring, analyzing, and forecasting hydro-meteorological variables. Predictive modelling is a consolidated discipline used to forewarn the possibility of natural hazards. In this book, experts from numerical weather forecast, meteorology, hydrology, engineering, agriculture, economics, and disaster policy-making contribute towards an interdisciplinary framework to construct potent models for hazard risk mitigation. The book will help advance the state of knowledge of artificial intelligence in decision systems to aid disaster management and policy-making. This book can be a useful reference for graduate student, academics, practicing scientists and professionals of disaster management, artificial intelligence, and environmental sciences.

An Introduction to Text Mining Gabe Ignatow,Rada Mihalcea,2017-09-22 Students in social science courses communicate, socialize, shop, learn, and work online. When they are asked to collect data for course projects they are often drawn to social media platforms and other online sources of textual data. There are many software packages and programming languages available to help students collect data online, and there are many texts designed to help with different forms of online research, from surveys to ethnographic interviews. But there is no textbook available that teaches students how to construct a viable research project based on online sources of textual data such as newspaper archives, site user comment archives, digitized historical documents, or social media user comment archives. Gabe Ignatow and Rada F. Mihalcea's new text *An Introduction to Text Mining* will be a starting point for undergraduates and first-year graduate students interested in collecting and analyzing textual data from online sources, and will cover the most critical issues that students must take into consideration at all stages of their research projects, including: ethical and philosophical issues; issues related to research design; web scraping and crawling; strategic data selection; data sampling; use of specific text analysis methods; and report writing.

The Digital Humanities Eileen Gardiner,Ronald G. Musto,2015-06-25 The Digital Humanities is a comprehensive introduction and practical guide to how humanists use the digital to conduct research, organize materials, analyze, and publish findings. It summarizes the turn toward the digital that is reinventing every aspect of the humanities among scholars, libraries, publishers, administrators, and the public. Beginning with some definitions and a brief historical survey of the humanities, the book examines how humanists work, what they study, and how humanists and their research have been impacted by the digital and how, in turn, they shape it. It surveys digital humanities tools and their functions, the digital humanists' environments, and the outcomes and reception of their work. The book pays particular attention to both theoretical underpinnings and practical considerations for embarking on digital humanities projects. It places the digital humanities firmly within the historical traditions of the humanities and in the contexts of current

academic and scholarly life.

Emerging Technologies of Text Mining: Techniques and Applications do Prado, Hercules Antonio, Ferneda, Edilson, 2007-10-31 This book provides the most recent technical information related to the computational models of the text mining process, discussing techniques within the realms of classification, association analysis, information extraction, and clustering. Offering an innovative approach to the utilization of textual information mining to maximize competitive advantage, it will provide libraries with the defining reference on this topic--Provided by publisher.

Uncertainty, Expectations and Asset Price Dynamics Fredj Jawadi, 2018-11-30 Written in honor of Emeritus Professor Georges Prat (University of Paris Nanterre, France), this book includes contributions from eminent authors on a range of topics that are of interest to researchers and graduates, as well as investors and portfolio managers. The topics discussed include the effects of information and transaction costs on informational and allocative market efficiency, bubbles and stock price dynamics, paradox of rational expectations and the principle of limited information, uncertainty and expectation hypotheses, oil price dynamics, and nonlinearity in asset price dynamics.

Computer-assisted Reporting Fred Vallance-Jones, David McKie, 2009 ..a nuts-and-bolts guide to finding the relevant data sources, using software (such as spreadsheets, database managers, and mapping programs) to crunch the numbers, and transform research results into a compelling story. Real-life examples of computer-assisted reporting (CAR) by leading Canadian and American journalists show readers how to make the most of CAR skills on the job. Computer-assisted reporting is written specifically for journalism students and working reporters who want to upgrade their skills. Straightforward, easy to follow, and amply illustrated with screen shots, it focuses on the skills, tools, and applications that have the most practical value in the newsroom. -- Blurb.

The Gospel According to David Foster Wallace Adam S. Miller, 2016-02-25 The Gospel According to David Foster Wallace is the first book to explore key religious themes - from boredom to addiction, and distraction - in the work of one of America's most celebrated contemporary novelists. In a series of short, topic-focussed chapters, the book joins a selection of key scenes from Wallace's novels *Infinite Jest* and *The Pale King* with clear explanations of how they contribute to his overall account of what it means to be a human being in the 21st century. Adam Miller explores how Wallace's work masterfully investigates the nature of first-world boredom and shows, in the process, how easy it is to get addicted to distraction (chemical, electronic, or otherwise). Implicitly critiquing, excising, and repurposing elements of AA's Twelve Step program, Wallace suggests that the practice of prayer (regardless of belief in God), the patient application of attention to things that seem ordinary and boring, and the internalization of clichés may be the antidote to much of what ails us in the 21st century.
