Transnational Convergence of East Asian Pop Culture Seok-Kyeong Hong,Dal Yong Jin,2021-03-08 This book observes and analyzes transnational interactions of East Asian pop culture and current cultural practices, comparing them to the production and consumption of Western popular culture and providing a theoretical discussion regarding the specific paradigm of East Asian pop culture. Drawing on innovative theoretical perspectives and grounded empirical research, an international team of authors consider the history of transnational flows within pop culture and then systematically address pop culture,digital technologies, and the media industry. Chapters cover the Hallyu—or Korean Wave—phenomenon, as well as Japanese and Chinese cultural industries. Throughout the book, the authors address the convergence of the once-separated practical, industrial, and business aspects of popular culture under the influence of digital culture. They further coherently synthesize a vast collection of research to examine the specific realities and practices of

consumers that exist beyond regional boundaries, shared cultural identities, and historical constructs. This book will be of interest to academic researchers, undergraduates, and graduate students of Asian media, media studies, communication studies, cultural studies, transcultural communication, or sociology.

Korea's Platform Empire Seongcheol Kim,Dal Yong Jin,2024-06-07 Korea's Platform Empire explores the evolution of digital platforms in South Korea's media sphere, and their global political, economic, cultural, and technological influence. The authors explore various facets of the media and cultural industries—looking beyond social media to news broadcasting and the music industry—and look at the policy and regulations behind this shifting technological advancement. This book will appeal to students and scholars working on media industries, digital media, platform studies, information and technology studies, Korean and East Asian media studies, and the creative and cultural industries.

Media Convergence and Deconvergence Sergio Sparviero,Corinna Peil,Gabriele Balbi,2017-10-20 This edited volume explores different meanings of media convergence and deconvergence, and reconsiders them in critical and innovative ways. Its parts provide together a broad picture of opposing trends and tensions in media convergence, by underlining the relevance of this powerful idea and emphasizing the misconceptions that it has generated. Sergio Sparviero, Corinna Peil, Gabriele Balbi and the other authors look into practices and realities of users in convergent media environments, ambiguities in the production and distribution of content, changes to the organization

of media industries, the re-configuration of media markets, and the influence of policy and regulations. Primarily addressed to scholars and students in different fields of media and communication studies, Media Convergence and Deconvergence deconstructs taken-for-granted concepts and provides alternative and fresh analyses on one of the most popular topics in contemporary media culture. South Korea's Webtooniverse and the Digital Comic Revolution Brian Yecies,Ae-Gyung Shim,2021-04-09 This book investigates the meteoric rise of mobile webtoons – also known as webcomics – and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant – and understudied – aspect of the new screen ecologies and their role in a new wave of media globalisation as we approach the end of the second decade of the 21st century.

Constitutional Jurisprudence Henning Glaser,2016-03-03 Nachdem sich die spezialisierte Verfassungsgerichtsbarkeit nach kontinentaleuropäischem Vorbild in den letzten zwei Jahrzehnten außerhalb des angelsächsischen Rechtskreises global weitgehend

durchgesetzt hat, haben Verfassungsgerichte in den unterschiedlichsten Verfassungsordnungen zunehmend Fragen mit weit reichenden politischen Konsequenzen entschieden. Insofern kommt in der Institution Verfassungsgerichtsbarkeit die allgemeine Tendenz einer zunehmenden Verrechtlichung der Politik besonders deutlich zum Tragen. Damit ist die Rolle und Performanz von Verfassungsgerichten in der praktischen Debatte zum Teil heftigen Herausforderungen ausgesetzt und im akademischen Diskurs zu einem der interessantesten Themenfelder der letzten Jahre geworden. Trotz der gemeinsamen Wurzel unterscheiden sich die einzelnen Verfassungsgerichte teilweise erheblich hinsichtlich ihrer Rolle im Verfassungsgefüge, den ihnen durch die Verfassung zugemessenen Aufgaben, so wie praktisch ihrem tatsächlichen Einfluss und ihrer Performanz. Im Rahmen dieser Aspekte widmen sich die im vorliegenden Band versammelten Beiträge unter anderem Fragen wie der Konstitutionalisierung der Rechtsordnung durch die Verfassungsgerichtsbarkeit und ihrer wachsenden Politisierung. Die Beiträge beziehen sich auf die Verfassungsrechtsordnungen in Deutschland, Kambodscha, Kroatien, Indonesien, Japan, Pakistan, Polen, Spanien, Südkorea, Taiwan und Vietnam. Unter ihnen sind auch drei Beiträge, die das Phänomen aus der praktischen Perspektive von amtierenden bzw. ehemaligen Verfassungsrichtern beleuchten. Mit Beiträgen von: Slavica Banic (Richterin, Verfassungsgericht, Kroatien), Byung-Song Cho (Öffentliches Recht, Cheongju Univ., Südkorea), Jong-ik Chon (Öffentliches Recht, Seoul National Univ., Südkorea), Ingwer Ebsen (Öffentliches Recht, Univ. Digital Business Srikanta Patnaik,Xin-She Yang,Madjid Tavana,Florin Popentiu-Vlădicescu,Feng Qiao,2018-07-26 This edited book presents contributions from three different areas: cloud computing, digital mess and business algorithms on a single platform, i.e. Digital Business. Handbook for Asian Studies Specialists Noriko Asato,2013-10-08 An indispensable tool for librarians who do reference or collection management, this work is a pioneering offering of expertly selected print and electronic reference tools for East Asian Studies (Chinese, Japanese, and Korean). Handbook for Asian Studies Specialists: A Guide to Research Materials and Collection Building Tools is the first work to cover reference works for the main Asian area languages of China, Japan, and Korea. Several leading Asian Studies librarians have contributed their many decades of experience to create a resource that gathers major reference titles—both print and online—that would be useful to today's Asian Studies librarian. Organized by language group, it offers useful information on the many subscription-based and open-source electronic tools relevant to Asian Studies. This book will serve as an essential resource for reference collections at academic libraries. Previously published bibliographies on materials deal with China or Japan or Korea, but none have coalesced information on all three countries into one work, or are written in English. And unlike the other resources available, this work provides the insight needed for librarians to make informed collection management decisions and reference selections.

Who Owns the World's Media? Eli M. Noam,The International Media Concentration Collaboration,2015-12-07 Media ownership and concentration has major implications for politics, business, culture, regulation, and innovation. It is also a highly contentious subject of public debate in many countries around the world. In Italy, Silvio Berlusconi's companies have dominated Italian politics. Televisa has been accused of taking cash for positive coverage of politicians in

Mexico. Even in tiny Iceland, the regulation of media concentration led to that country's first and only public referendum. Who Owns the World's Media? moves beyond the rhetoric of free media and free markets to provide a dispassionate and data-driven analysis of global media ownership trends and their drivers. Based on an extensive data collection effort from scholars around the world, the book covers thirteen media industries, including television, newspapers, book publishing, film, search engines, ISPs, wireless telecommunication and others, across a ten to twenty-five year period in thirty countries. In many countries--like Egypt, China, or Russia--little to no data exists and the publication of these chapters will become authoritative resources on the subject in those regions. After examining each country, Noam and his collaborators offer comparisons and analysis across industries, regions, and development levels. They also calculate overall national concentration trends beyond specific media industries, the market share of individual companies in the overall national media sector, and the size and trends of transnational companies in overall global media. This definitive global study of the extent and impact of media concentration will be an invaluable resource for communications, public policy, law, and business scholars in doing research and also for media, telecom, and IT companies and financial institutions in the private sector.

Global South Discourse in East Asian Media Studies Dal Yong Jin,2022-11-04 This book examines the nexus of East Asian media, culture, and digital technologies in the early 21st century from a

Global South perspective. Providing an empirically rich analysis of the emergence of Asian culture, histories, texts, and state policies as they relate to both Asian media and global media, the author discusses relevant theoretical frameworks as East Asian popular culture and media have shifted the contours of globalization. After overviewing Western media/cultural theories and histories, the book explores the ways in which East Asia-focused analytical frameworks are able to shift people's understanding of globalization and media, drawing upon examples from different East Asian countries to illustrate how current cultural flows have influenced and have been influenced by a handful of dimensions. Offering an important contribution to understanding the historical trajectory and recent developments of East Asia media, this book will interest students and scholars of media, communication, popular culture, cultural studies, Asian studies, politics and sociology.

The Evolution of Tiger Management Martin Hemmert,2017-10-19 Throughout the last several decades, Korean companies have become strong global competitors in a wide range of manufacturing industries. How did they achieve this exceptional performance? The Evolution of Tiger Management uncovers the secret of their success through a comprehensive analysis of Korean-style management. It explains how it has developed, why it works so well, what non-Koreans can learn from it, and what Korean companies need to do to stay competitive in the future. This book is an extended and significantly updated new edition of Tiger Management: Korean companies on world markets (Routledge, 2012). It tells the remarkable stories of how Korean firms, seemingly coming from nowhere, have successfully challenged their Western and Japanese competitors globally. A new chapter highlights the rise of Korean venture firms and start-ups. Next, the essence of Tiger Management is analyzed by showing that it consists of an

effective combination of business strategy, leadership, and human resource management practices. Finally, the evolution and future of Tiger Management is discussed by showing how Korean companies have adapted to changes at home and abroad, and how non-Korean companies can adopt Tiger Management. A new final chapter discusses the way forward for Korean companies.

Korean Modern: The Matter of Identity Peter G. Rowe,Yun Fu,Jihoon Song,2021-08-02 The development of modern architecture in Korea and, more recently, South Korea, is closely tied to the country's dramatic transformations since the late 19th century. The authors interrogate major periods from the Late Joseon Dynasty to the vibrant democratic present, showing how architecture, by making technological and stylistic leaps, has played a important role in the construction of the nation's identity. The architectural analyses, ranging from Hwaseong Fortress to 21st-century constructions like Paju Book City, Ssamziegil Shopping Center, the Boutique Monaco skyscraper, and the Bauzium Sculpture Museum, focus on buildings in which the formation of a specifically Korean modernism is particularly observable. The appendix includes biographical descriptions of major architectural figures.

Design for Experience Jinwoo Kim,2015-03-17 Presents a strategic perspective and design methodology that guide the process of developing digital products and services that provide 'real experience' to users. Only when the material experienced runs its course to fulfilment is it then regarded as 'real experience' that is distinctively senseful, evaluated as valuable, and harmoniously related to others. Based on the theoretical background of human experience, the book focuses on these three questions: How can we understand the current dominant designs of digital products and services? What are the user

experience factors that are critical to provide the real experience? What are the important HCI design elements that can effectively support the various UX factors that are critical to real experience? Design for Experience is intended for people who are interested in the experiences behind the way we use our products and services, for example designers and students interested in interaction, visual graphics and information design or practitioners and entrepreneurs in pursuit of new products or service-based start-ups.

The Microsoft Antitrust Cases Andrew I. Gavil,Harry First,2014-11-28 A comprehensive account of the decades-long, multiple antitrust actions against Microsoft and an assessment of the effectiveness of antitrust law in the digital age. For more than two decades, the U.S. Department of Justice, various states, the European Commission, and many private litigants pursued antitrust actions against the tech giant Microsoft. In investigating and prosecuting Microsoft, federal and state prosecutors were playing their traditional role of reining in a corporate power intent on eliminating competition. Seen from another perspective, however, the government's prosecution of Microsoft—in which it deployed the

century-old Sherman Antitrust Act in the volatile and evolving global business environment of the digital era—was unprecedented. In this book, two experts on competition policy offer a comprehensive account of the multiple antitrust actions against Microsoft—from beginning to end—and an assessment of the effectiveness of antitrust law in the twenty-first century. Gavil and First describe in detail the cases that the Department of Justice and the states initiated in 1998, accusing Microsoft of obstructing browser competition and perpetuating its Windows monopoly. They cover the private litigation that followed, and the European Commission cases decided in 2004 and 2009. They also consider broader issues of competition policy in the age of globalization, addressing the adequacy of today's antitrust laws, their enforcement by multiple parties around the world, and the difficulty of obtaining effective remedies—all lessons learned from the Microsoft cases.
