Business Lobbying in the European Union David Coen,Alexander Katsaitis,Matia Vannoni,2021-02-16 At a time when Europe and business stand at crossroads, this study provides a perspective into how business representation in the EU has evolved and valuable insights into how to organize lobbying strategies and influence policy-making. Uniquely, the authors analyze business lobbying in Brussels by drawing on insights from political science, public management, and business studies. At the macro level, we explore over 30 years of increasing business lobbying and explore the emergence of a distinct European business-government relations style. At the meso level, we assess how the role of EU institution, policy types, and the policy cycle shape the density and diversity of business lobbying activity. Finally, at the micro level we seek to explore how firms organize their political affairs functions and mobilized strategic political responses. The study uses a variety of methods to analysis the business government relations drawing on unique business and policy-maker surveys; in-depth case studies and elite interviews; large statistical analysis of lobbying registers to assess density and diversity across policy areas and EU institutions; and managerial career path and organizational analysis to assess corporate political capabilities. In contributing to discussions on corporate political strategy and interest groups activity, this monograph should be of interest to public policy scholars, policy-makers, and businesses managers seeking to understand EU government affair and political representation.

Lobbying the European Union David Coen,Jeremy Richardson,2009-06-04 It is universally accepted that there has been a huge growth in EU lobbying over the past few decades. There is now a dense EU interest group system. This entirely new volume, inspired by Mazey & Richardson's 1993 book *Lobbying in the European Community*, seeks to understand the role of interest groups in the policy process from agenda-setting to implementation. Specifically, the book is interested in observing how interest groups organise to influence the EU institutions and how they select different coalitions along the policy process and in different policy domains. In looking at 20 years of change, the book captures processes of institutional and actor learning, professionalisation of lobbying, and the possible emergence of a distinct EU public policy style. More specifically, from the actors' perspective, the editors are interested in assessing how the rise of direct lobbying and the emergence of fluid issue-based coalitions has changed the logic of collective action, and what is the potential impact of 'venue-shopping' on reputation and influence. From an institutional perspective, the contributors explore resource and legitimacy demands, and the practical impact of consultation processes on the emergence of a distinct EU lobbying relationship. It will be essential reading for academics and practitioners alike.

The Oxford Handbook of Business and Government David Coen,Wyn Grant,Graham Wilson,2010-02-25 This text provides an introduction to the ways in which five different disciplines have approached the study of business and government. It examines how business interacts with government in different parts of the world, including the United States, the EU, China, Japan and South America.

Q/a about Bitcoin David Coen,2019-10-31 Formulated in an agile Question & Answer format, this book represents a concise, systematic, complete and very digestible access point, for those approaching the topic for the first time.For those already very familiar with the Bitcoin-rabbit hole, it still represents a useful manual to avoid very common misunderstandings, or explore more refined concepts, perhaps starting to think in terms of sats and LNP/BP technological stack. - Giacomo Zucco, founder BHB Network, co-founder Bcademy. There are problems with the actual use of digital cash in the near term.(...) One concern I have is that the move to electronic payments will decrease personal privacy by making it easier to log and record transactions Hal Finney said in 1993. The so-called cashless society advances and brings with it some critical issues that undermine the freedom of the individual and his role in the economy. Bitcoin fixes this. Finally we have a tool that can provide a valid alternative to centralized monetary systems and play the role of digital cash (aka electronic cash). Bitcoin represents not only the new frontier in exchanging value among peers without resorting to a reliable third party, but a real base layer on which to build the monetary instruments of the future. The idea of the

LNP/BP suite is born, similar to that of TCP/IP on which we built today's Internet and which allows you to buy this book online. Let's retrace together the steps that led to the creation of electronic cash (also called digital gold) and answer the fundamental questions that will make us understand what the problems of the cashless society are, how Bitcoin works, why it was created and what the future holds. Appendix 1 collects seven best practices to put into practice when dealing with Bitcoin. Appendix 2 is an article by Federico Spitaleri (satoshis . games) Business modeling in the Bitcoin Lightning Network ecosystem. Appendix 3 clarifies the misunderstanding regarding one CPU, one vote.

Business and Government David Coen, Wyn Grant, 2006-05-24 This volume reviews current debates on the role of business in politics and it assesses emerging methodological approaches to its study. The book brings together leading scholars to assess various qualitative and quantitative methods, network analysis, historical context and positive rational choice modeling, and detailed research case studies in the study of Business-Government relations.

Breakfast Epiphanies David Anderson, 2004-04-15 Beloved minister David Anderson offers forty-one true-life tales that will enlighten and inspire readers of any faith. Writing about his everyday experiences-like cleaning up the yard after a storm, waiting in the doctor's office, even helping his teenage daughters pick out fall dresses-Anderson explores how the divine can surprise us in even the most ordinary settings

EU Lobbying: Empirical and Theoretical Studies David Coen, 2013-10-31 *EU Lobbying: Empirical and Theoretical studies* offers an analysis of large empirical studies of interest group politics and Lobbying in Europe. Recognising the continued European economic integration, globalisation and the changing role of the state, it observes significant adaptations in interest mobilisation and strategic behaviour. This book assesses the logic of collective and direct action, the logic of access and influence, the logic of venue-shopping and alliance building. It addresses specific issues such as: the emergence of elite pluralism in EU institutions, the pump priming of political action by EU institutions, and the growing political sophistication of private and public interests in Brussels. Through these issues the book explores how interest groups lobby different European institutions along the policy process and how the nature of policy dictates the style and level of lobbying. This book was previously published as a special issue of *Journal of European Public Policy*

Handbook on Lobbying and Public Policy David Coen,Alexander Katsaitis,2024-06-28 This uniquely comprehensive Handbook examines the complex relationship between lobbyists and public policy through an innovative multi-analytic lens. Emphasising the profound impact of the topic on modern government and contemporary societal issues, David Coen and Alexander Katsaitis bring together a wide range of experts to illuminate the contexts and processes involved in public policy, and how this interacts with the practice of lobbying. Using resource-exchange as a guiding meta-theory, contributors discuss lobbying and public policy at the macro-level, before delving into the dynamics of the policy cycle and policy procedures. Chapters critically assess how political and organisational variables impact strategic behaviour, as well as why interest intermediation varies between different political systems. Finally, the Handbook examines public policy's effect on interest group activity, exploring a spectrum of lobbying activity through a bottom-up perspective. Compiling a wide range of highly relevant case studies and deploying diverse research methods and theoretical models, the Handbook on Lobbying and Public Policy will prove vital reading to students and scholars of political science, public policy, sociology, and international and global studies. It will also appeal to policymakers and researchers and practitioners of public administration and political economy.

Insiders versus Outsiders Andreas Dür,Gemma Mateo,2016-07-08 What explains differences in the lobbying behaviour of interest groups? And what consequences do these differences have for the access that interest groups can gain to decision-makers and the influence that they can exert on policy outcomes? Building on an unprecedented amount of empirical evidence on lobbying in Europe, this book puts forward a distinction between lobbying insiders and lobbying outsiders. Lobbying insiders, most prominently business interests, try to establish direct contacts with decision-makers, enjoy good access to executive institutions, and manage to shape policy outcomes when mobilizing the public on an issue is difficult. Lobbying outsiders, in particular citizen groups such as consumer, environmental or health non-governmental organizations, put greater emphasis on mobilizing the public or changing public attitudes, find it easier to gain access to legislative decision-makers, and have the greatest impact on outcomes on issues that are amenable to an outside lobbying campaign. The book shows that a single argument, building on group type as the main variable, can explain variation across interest groups in their choice of strategy, their access to decision-makers, and the conditions under which they can exert influence. The existence of lobbying insiders and lobbying outsiders has important implications for both our understanding of political decision-making and the normative appraisal of contemporary democracy.

The Political System of the European Union Simon Hix,Bjørn Høyland,2022-04-21 Starting from the observation that the European Union now possesses many of the attributes of modern political systems, Hix and Høyland take an innovative approach to analysing, researching and teaching the EU. Using the general theories of political science to understand how the EU works, this text covers each of the main processes in the EU political system - executive, legislative and judicial politics, public opinion, interest groups and democracy, and regulatory, monetary and foreign policies - introducing the key political science tools, reviewing the relevant theories, and applying the knowledge in detailed descriptive analysis. As well as incorporating new data and the latest research, this new edition examines the consequences of the dramatic political and policy developments

in the EU over the past decade. The methodology used in the text makes the political system of the EU accessible to political science students as a whole, as well as those specifically studying and researching the EU.

Business Lobbying in the European Union David Coen,Alexander Katsaitis,Matia Vannoni,2021-01-24 This book systematically maps and assesses business lobbying in the European Union, drawing from political science and business studies.

The Political Influence of Business in the European Union Andreas Dür,David Marshall,Patrick Bernhagen,2019-02-28 Many citizens, politicians, and political activists voice concern about the political influence of business in the European Union. But do business interests really pull the strings in Brussels? Contrary to expectations, this book shows that business interests are no more influential than other interests in shaping contemporary EU policies. Andreas Dür, David Marshall, and Patrick Bernhagen present an original argument that stresses the role of public actors in facilitating or impeding interest groups' lobbying success. Novel data on a large number of legislative proposals on the EU's agenda and three case studies present strong support for this argument. The Political Influence of Business in the European Union offers new insights into how lobbying success depends on the demand and supply of information, as well as new ideas on how to measure lobbying success. The book advances a fresh perspective on the question of business power and shows why business interests often lose in the policy struggle.

Global Climate Governance David Coen,Julia Kreienkamp,Tom Pegram,2020-12-17 Climate change is one of the most daunting global policy challenges facing the international community in the 21st century. This Element takes stock of the current state of the global climate change regime, illuminating scope for policymaking and mobilizing collective action through networked governance at all scales, from the sub-national to the highest global level of political assembly. It provides an unusually comprehensive snapshot of policymaking within the regime created by the United Nations Framework Convention on Climate Change (UNFCCC), bolstered by the 2015 Paris Agreement, as well as novel insight into how other formal and informal intergovernmental organizations relate to this regime, including a sophisticated EU policymaking and delivery apparatus, already dedicated to tackling climate change at the regional level. It further locates a highly diverse and numerous non-state actor constituency, from market actors to NGOs to city governors, all of whom have a crucial role to play.

Competitiveness and Death Gary Winslett,2021-03-09 Competitiveness and Death examines the increase and reduction of regulatory barriers to trade across three industries: environmental, labor, and safety rules on automobiles, consumer protection regulations on meat, and intellectual property regulations on medicines. The fundamental negotiation in trade and regulatory policymaking occurs between businesses, activists, and government officials. Gary Winslett builds on new trade theories to explain when and why businesses are most likely to lobby governments to reduce these regulatory trade barriers. He argues that businesses prevail when they can connect with broader concerns about national economic competitiveness. He examines how activist organizations overcome collective action problems and defend regulatory differences, arguing that they succeed when they can link their desire for barriers with preventing needless death. Competitiveness and Death provides a political companion to new trade theories in economics, questioning cleavage-based explanations of trade politics, demonstrating the underappreciated importance of activists, suggesting the limits of globalization, providing in-depth examination of previously ignored trade negotiations, qualifying the California Effect (the shift toward stricter regulatory standards), and showing the relative rarity of regulations used as disguised protectionism.
