David Hicks Ashley Hicks,2003 David Hicks is considered to be among the foremost interior designers of the 20th century. From the decoration of his own house in London in 1956--in powerful colors that heralded an end to the drab, postwar English look--he set the pace for interior design both in Europe and America. David Hicks: Designer looks at the most vital period of his career, from 1958 to 1979. Presenting 200 original color photos, many never before published, it displays a decorating oeuvre that ranged from apartments for Helena Rubinstein, the Niarchos children, and the Prince of Wales to yachts, private jets, and the glamorous New York offices of British Steel. Central to the book are the interiors of his own houses, where he mixed antique and modern with a groundbreaking command of style and color. This book is a splendid overview of the entire range of the designer's vision and talents, with chapters on English and New York interiors interspersed with sections on his designs for stores and offices, furniture and carpets, fabrics and wallpapers, tablescapes, graphics, and books.

David Netto David Netto,2023-09-05 The first monograph of a distinctive voice in American design whose work, a blend of sophisticated finishes, textiles, antiques, and contemporary furniture, has won him a dedicated following from tastemakers For more than a decade, David Netto has been profiling the leading lights of the design world in lively, illuminating articles for numerous publications. Now, at long last, he turns his erudite eye and rapier wit to his own work as an interior designer and architect. Featuring some 20 projects, ranging from city apartments and country houses to seaside and mountain getaways, David Netto reveals an eclectic aesthetic that brings to modernism a touch of warmth and personality and to traditionalism a jolt of energy and a dash of the exotic. Extensively photographed and with a foreword by legendary designer Rose Tarlow, as well as delightful watercolor illustrations by interiors artist Mita Bland, the book is as enlightening to read as it is inspiring to look at.

IP Multicast Protocol Configuration Sangam Racherla,Sebastian Oglaza,IBM Redbooks,2012-04-30 The most common transmission scheme used in networks today is unicast, which represents one-to-one transmission with one sender and one receiver. Sometimes there is a need for one host to send packets that are received by multiple hosts. The problem with implementing this kind of transmission using unicast is that the stream of packets must be replicated as many times as there are receivers. IP Multicast addresses the problem by intelligently sending only one stream of packets and then replicating the stream when it reaches the target domain that includes multiple receivers or reaches a necessary bifurcation point leading to different receiver domains. In this IBM® Redpapers™ publication, we introduce principles of IP Multicast and describe the IPv4 addressing used for multicast. We discuss the protocols that are used to implement multicast in an IP network and then provide the general IP Multicast configuration procedures and then presents IP Multicast configuration in a sample network using IBM System Networking Ethernet Switches. We conclude this paper with command references that include all commands and their parameters for configuration of multicast protocols and features. After understanding the basics of how to configure IP Multicast for the networking scenario described in this paper, IT network professionals will be able replicate a similar design and configuration to suit their network infrastructure.

IBM iFlow Director Technical Introduction Sangam Racherla,David A Gray,Jose Rodriguez Ruibal,IBM Redbooks,2012-05-23 IBM® iFlow Director is a high performance, low-latency 10 Gb Ethernet switch integrated flow balancer with policy-based traffic steering capability. It delivers high-availability, scalability, and lower total cost of ownership (TCO) for appliance vendors that offer IBM BladeCenter® based solutions for applications, such as Security Gateways, Wireless Gateways, Lawful Interception & Network Surveillance, Traffic Management & Service Differentiation, and so on. The system throughput can be scaled by adding more blade servers and up to four switches that run iFlow Director. iFlow Director is designed with a number of advanced features to deliver high availability in mission-critical environments. The solution is built around industry-leading hardware to help eliminate any single point of failure. iFlow Director uses BladeCenter innovations such as internal monitoring, redundant mid-plane, redundant network connections per blade, redundant power supplies and fans, and switching features, such as uplink failure detection and controlled failover with network interface card (NIC) teaming, to deliver high availability. iFlow Director provides up to 480 Gbps of nonblocking, wire-speed bidirectional throughput to BladeCenter to meet your network traffic load distribution needs. With ten 10 Gbps uplink ports and 14 nonblocking 10 Gbps internal ports, iFlow Director offers unmatched performance, with latency as low as 1.60 microseconds. The iFlow Director solution provides significant savings compared to a solution that consists of multiple stand-alone appliances, Layer 2 switches and load balancers. With 480 Gbps of raw throughput, the iFlow Director solution provides a price/performance advantage. This IBM Redpaper™ publication is intended for network professionals who want to reduce the complexity associated with appliance sprawl by using a integrated solution that includes a high performance 10 Gb Ethernet embedded switch for BladeCenter, and a stack of software that allows the control of the flow of traffic inside the chassis.

The Whimsical Works of David Weidman David Weidman,2008 David Weidman's name may not be familiar, but his work certainly is. Weidman began his career as an animator in 1950s Los Angeles, painting backgrounds for Hannah Barbara and setting the standard for the look of cartoons of that era. However, like a true entrepreneur he soon began to work for himself, and went on to establish a style that is today instantly recognizable and iconic. A printmaker, ceramicist, font designer, painter, cartoonist, and silk screener, Weidman never stopped experimenting as an artist. Today at age 87 Weidman's staggering body of work is just as modern and visually stunning as it was forty years ago. His graphic sensibility and expert use of saturated colour palletes evoke the vintage modern look while remaining completely relevant to contemporary designers. The Whimsical Work of David Weidman is a long overdue career retrospective of a true originator, who created the look of an era.

The Little Book of Layouts David E. Bonus feature: each page features call-out notes of easily understandable comments to quickly convey the good elements of the depicted layout.

David Carson David Carson,Lewis Blackwell,1997 Designed by David Carson, this book assembles his recent work, along with that of his students and friends. The sequel to The End of Print, it experiments with intuition and how it affects the design process. Carson deconstructs conventional print by imposing chance on his subjects: art, fashion, photography and music. Both the work and the commentary are immersed within the design of each spread, making the book both a graphic object and an introduction to a way of seeing.

David Mellor Teleri Lloyd-Jones,2009 The wider world knows David Mellor for his cutlery, which although exquisite and important, is the tip of the iceberg. This title presents an introduction to the designer, his works and his importance within the British design landscape, post 1950.

David King Stencils David King,2018-12 David King created a legendary logo design for the foundational punk band Crass, dubbed the 'double-headed snake and cross'. In the intervening years, he's been busy. This long-overdue monograph features King's iconic stencil-only designs, starting with the original Crass logo drawing and continuing to the present day. Both the artist's process and finished output are on display in this revealing collection, from the covered-in-layers-of-paint stencils themselves to the drawings and designs outlining the thought process and ultimately the final art. Many of these works used multiple stencils and colors to create one-off finished pieces that you're likely to find only within the pages of this book.

Cellophane House Stephen Kieran,James Timberlake,KieranTimberlake (Firm),2011 CELLOPHANE HOUSE(TM) chronicles the design and execution of a five-story, off-site fabricated home assembled on-site in just sixteen days as part of The Museum of Modern Art exhibition, Home Delivery: Fabricating the Modern Dwelling. Through a series of questions, the book explores several of KieranTimberlake's ongoing research agendas including speed of on-site assembly, design for disassembly, a holistic approach to the life cycle of materials, and the development of a lightweight, high-performance, energy gathering building envelope. Cellophane House(TM) takes a holistic approach to factory fabrication, reinventing the way a building is assembled, its materials, and spatial experience. An innovative aluminum frame enables mass-customization of the home in multiple configurations, rapid assembly, and adaptability to different sites and climates. Disassembly, rather than demolition, is inherent as an end-of-life option to successfully preserve the embodied energy in the recyclable house materials. More than a building experiment, it suggests a new way forward in an approach to mass housing. Cellophane House(TM) has received awards from several groups: the AIA Housing Committee, the AIA Technology Committee, Boston Society of Architects, the Chicago Athenaeum Museum of Architecture and Design, AIA Philadelphia and AIA Pennsylvania Chapters.
