Model Rules of Professional Conduct American Bar Association. House of Delegates,Center for Professional Responsibility (American Bar Association),2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

The State Small Business Credit Initiative (SSBCI) Marcus Powell,2013 The SSBCI provides funding to states, territories, and eligible municipalities to expand existing or to create new state small business investment programs, including state capital access programs, collateral support programs, loan participation programs, loan guarantee programs, and venture capital programs. This book examines the SSBCI and its implementation, including Treasury's response to initial program audits conducted by the U.S. Government Accountability Office and Treasury's Office of Inspector General. These audits suggested that SSBCI participants were generally complying with the statute's requirements, but that some compliance problems existed, in that, the Treasury's oversight of the program could be improved; and performance measures were needed to assess the program's efficacy.

Financial Soundness Indicators International Monetary Fund,2006-04-04 Financial Soundness Indicators (FSIs) are measures that indicate the current financial health and soundness of a country's financial institutions, and their corporate and household counterparts. FSIs include both aggregated individual institution data and indicators that are representative of the markets in which the financial institutions operate. FSIs are calculated and disseminated for the purpose of supporting macroprudential analysis--the assessment and surveillance of the strengths and vulnerabilities of financial systems--with a view to strengthening financial stability and limiting the likelihood of financial crises. Financial Soundness Indicators: Compilation Guide is intended to give guidance on the concepts, sources, and compilation and dissemination techniques underlying FSIs; to encourage the use and cross-country comparison of these data; and, thereby, to support national and international surveillance of financial systems.

Capital Markets, CDFIs, and Organizational Credit Risk Charles Tansey,Michael Swack,Michael Tansey,2010 Can Community Development Financial Institutions (CDFIs) get unlimited amounts of low cost, unsecured, short- and long-term funding from the capital markets based on their organizational credit risk? Can they get pricing, flexibility, and procedural parity with for-profit corporations of equivalent credit risk? One of the key objectives of this book is to explain the reasons why the answer to the two questions above remains no. The other two key objectives are to show the inner workings of what has been done to date to overcome the obstacles so that we don't have

to retrace the same steps and recommend additional disciplines that position CDFIs to take advantage of the mechanisms of the capital markets once the markets stabilize.

Resolving China's Corporate Debt Problem Wojciech Maliszewski, Mr. Serkan Arslanalp, Mr. John C Caparusso, José Garrido, Mr. Si Guo, Mr. Joong S Kang, W. Raphael Lam, Daniel Law, Wei Liao, Ms. Nadia Rendak, Mr. Philippe Wingender, Jiangyan Yu, Ms. Longmei Zhang, 2016-10-14 Corporate credit growth in China has been excessive in recent years. This credit boom is related to the large increase in investment after the Global Financial Crisis. Investment efficiency has fallen and the financial performance of corporates has deteriorated steadily, affecting asset quality in financial institutions. The corporate debt problem should be addressed urgently with a comprehensive strategy. Key elements should include identifying companies in financial difficulties, proactively recognizing losses in the financial system, burden sharing, corporate restructuring and governance reform, hardening budget constraints, and facilitating market entry. A proactive strategy would trade off short-term economic pain for larger longer-term gain.

Cleaning-up Bank Balance Sheets José Garrido, Emanuel Kopp, Anke Weber, 2016-09-08 To stabilize and bring down nonperforming loans (NPLs) in the Italian banking system, the Italian authorities have been implementing a number of reforms, aimed among others at speeding up insolvency and enforcement proceedings, strengthening bank corporate governance, cleaning up balance sheets, and facilitating bank consolidation. This paper examines the Italian banking system's NPL problem, which ties up capital, weighing on bank profitability and authorities' economic reforms. It argues for a comprehensive approach, encompassing economic, supervisory, and legal measures. The authorities' reforms are important steps toward this end. The paper describes measures that could further support their actions.
