AUUGN ,1998

Discovering the Deep Blue Sea The National Academies Keck Futures Initiative,2018-06-21 The 14th annual National Academies Keck Futures Initiative (NAKFI), *Discovering the Deep Blue Sea: Research, Innovation, and Social Engagement*, brought together 170 marine scientists, professional artists, engineers, biomedical researchers, oceanographers, music professors, and undergraduate design students. The attendees collaborated to find solutions to overarching social and scientific research problems tied to five sub-topics: aquaculture and energy; technology; climate-related change; biodiversity; and communication, adaption, and resilience. This publication summarizes the presentations and discussions from this event.

Advances in Internet, Data & Web Technologies Leonard Barolli,2023-02-11 This book presents original contributions to the theories and practices of emerging Internet, data, and web technologies and their applicability in businesses, engineering, and academia. Internet has become the most proliferative platform for emerging large-scale computing paradigms. Among these, data and web technologies are two most prominent paradigms, in a variety of forms such as data centers, cloud computing, mobile cloud, mobile web services, and so on. These technologies altogether create a digital ecosystem whose corner stone is the data cycle, from capturing to processing, analysis, and visualization. The investigation of various research and development issues in this digital ecosystem is boosted by the ever-increasing needs of real-life applications, which are based on storing and processing large amounts of data. As a key feature, it addresses advances in the life-cycle exploitation of data generated from the digital ecosystem data technologies that create value for the knowledge and businesses toward a collective intelligence approach. Researchers, software developers, practitioners, and students interested in the field of data and web technologies find this book useful and a reference for their activity.

Best Ideas for Teaching with Technology Justin Reich, Tom Daccord, 2015-02-18 This practical, how-to guide makes it easy for teachers to incorporate the latest technology in their classes. Employing an informal workshop approach, the book avoids technical jargon and pays special attention to the needs of teachers who are expanding the use of computers in their classrooms. The authors focus on what teachers do and how they can do it better, and provide a wide variety of proven tools, tips, and methods for enhancing these activities with technology. *Best Ideas for Teaching with Technology* provides extensively illustrated tutorials for a wide variety of software, online tools, and teaching techniques. It covers everything from lesson plans, to time management, how to show animation, blogging, podcasts, laptop strategies, and much, much more. In addition, periodic updates to the text will be available on the authors' website.

Converging Technologies for Improving Human Performance Mihail C. Roco, William Sims Bainbridge, 2013-04-17 M. C. Roco and W.S. Bainbridge In the early decades of the 21st century, concentrated efforts can unify science based on the unity of nature, thereby advancing the combination of nanotechnology, biotechnology, information technology, and new technologies based in cognitive science. With proper attention to ethical issues and societal needs, converging in human abilities, societal technologies could achieve a tremendous improvement outcomes, the nation's productivity, and the quality of life. This is a broad,

cross cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term. The phrase convergent technologies refers to the synergistic combination of four major NBIC (nano-bio-info-cogno) provinces of science and technology, each of which is currently progressing at a rapid rate: (a) nanoscience and nanotechnology; (b) biotechnology and biomedicine, including genetic engineering; (c) information technology, including advanced computing and communications; (d) cognitive science, including cognitive neuroscience. Timely and Broad Opportunity. Convergence of diverse technologies is based on material unity at the nanoscale and on technology integration from that scale.

Rhetorics and Technologies Stuart A. Selber,2012-12-05
Recognizing an increasingly technological context for rhetorical activity, the thirteen contributors to this volume illuminate the challenges and opportunities inherent in successfully navigating intersections between rhetoric and technology in existing and emergent literacy practices. Edited by Stuart A. Selber, *Rhetorics and Technologies* positions technology as an inevitable aspect of the rhetorical situation and as a potent force in writing and communication activities. Taking a broad approach, this volume is not limited to discussion of particular technological systems (such as new media or wikis) or rhetorical contexts (such as invention or ethics). The essays instead offer a comprehensive treatment of the rhetoric-technology nexus. The book's first section considers the ways in which the social and material realities of using technology to support writing and communication activities have altered the borders and boundaries of rhetorical studies. The second section explores the discourse practices employed by users, designers,

and scholars of technology when communicating in technological contexts. In the final section, projects and endeavors that illuminate the ways in which discourse activities can evolve to reflect emerging sociopolitical realities, technologies, and educational issues are examined. The resulting text bridges past and future by offering new understandings of traditional canons of rhetoric—invention, arrangement, style, memory, and delivery—as they present themselves in technological contexts without discarding the rich history of the field before the advent of these technological innovations.
