**Memory Makers** Jade McGlynn,2023-05-04 Why aren't ordinary Russians more outraged by Putin's invasion of Ukraine? Inside the Kremlin's own historical propaganda narratives, Russia's invasion of Ukraine makes complete sense. From its World War II cult to anti-Western conspiracy theories, the Kremlin has long used myth and memory to legitimize repression at home and imperialism abroad, its patriotic history resonating with and persuading large swathes of the Russian population. In Memory Makers, Russia analyst Jade McGlynn takes us into the depths of Russian historical propaganda, revealing the chilling web of nationwide narratives and practices perforating everyday life, from after-school patriotic history clubs to tower block World War II murals. The use of history to manifest a particular Russian identity has had grotesque, even gruesome, consequences, but it belongs to a global political pattern – where one's view of history is the ultimate marker of political loyalty, patriotism and national belonging. Memory Makers demonstrates how the extreme Russian experience is a stark warning to other nations tempted to stare too long at the reflection of their own imagined and heroic past.

**Smart and Sustainable Urban Ecosystems: Challenges and Solutions** Maria Korneykova,Viacheslav Vasenev,Elvira Dovletyarova,Riccardo Valentini,Sergey Gorbov,Denis Vinnikov,Diana

Dushkova,2023-09-08 This book provides multidisciplinary approaches to smart and sustainable urban ecosystems. Urbanization is a global tendency, and up to 70% of the world population is projected to live in cities by 2050. How will this rapid urbanization alter the face of the world? What are the environmental consequences of megacities’ expansion? What are smart solutions to make life in cities safe, comfortable, and environmentally friendly? These and other important questions are addressed by the conference Smart and Sustainable Cities (SSC). This year’s theme for the conference will be « Sustainable urban ecosystems: challenges and solutions». Megapolises are complex ecosystems. Air and water quality, vegetation, and soils in megapolises are exposed to anthropogenic influence. Studying negative environmental consequences of the anthropogenic and technogenic pressures is among the key tasks of urban ecology and environmental impact assessment. Advanced approaches and smart technologies to monitor, model, and assess environmental consequences and risks in megapolises will be widely discussed at the conference. Searching for solutions of the environmental problems of modern megapolises will be the key point of the conference. Successful experiences of sustainable urban development and nature-based solutions to support climate adaptation, carbon neutrality, and human health will be presented in the conference proceedings.
