**Shaping a Digital World** Derek C. Schuurman, 2013-04-16 Digital technology has become a ubiquitous feature of modern life. Our increasingly fast-paced world seems more and more remote from the world narrated in Scripture. But despite its pervasiveness, there remains a dearth of theological reflection about computer technology and what it means to live as a faithful Christian in a digitally-saturated society. In this thoughtful and timely book, Derek Schuurman provides a brief theology of technology, rooted in the Reformed tradition and oriented around the grand themes of creation, fall, redemption and new creation. He combines a concise, accessible style with penetrating cultural and theological analysis. Building on the work of Jacques Ellul, Marshall McLuhan and Neil Postman, and drawing from a wide range of Reformed thinkers, Schuurman situates computer technology within the big picture of the biblical story. Technology is not neutral, but neither is there an exclusively Christian form of technological production and use. Instead, Schuurman guides us to see the digital world as part of God's good creation, fallen yet redeemable according to the law of God. Responsibly used, technology can become an integral part of God's shalom for the earth.

**Histopathology Reporting** Derek C Allen, 2013-07-23 An easily comprehensible and practicable framework for standardised histopathology reports in surgical cancer. The pathological features of the common carcinomas are detailed and

non-carcinomatous malignancies are also summarised. 7th edition TNM and WHO classifications of cancers are incorporated, with comments on any associated pathology, diagnostic clues and prognostic criteria supplemented visually by line diagrams. Each chapter's introduction gives epidemiological, clinical, investigative and treatment summary details. Other pathology includes updated immunophenotypic expression and molecular techniques. The impact of these ancillary investigations on diagnosis, and as biomarkers of prognosis and prediction of response to treatment is summarised, as is the effect of adjuvant treatments on cancers. Experience based clues are given throughout as aids to tumour typing, grading, staging, and gauging prognosis and response to treatment. Histopathology Reporting: Guidelines for Surgical Cancer, Third Edition is invaluable for trainee and consultant diagnostic histopathologists all over the world, equipping the reader to produce high quality, clinically appropriate histopathology reports, and to participate in contemporary multidisciplinary team management of patients with surgical cancer.

Histopathology Specimens Derek C. Allen, Iain R Cameron, 2012-08-14 Covering anatomical, clinical, pathological and laboratory aspects of surgical histopathology specimens, Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition relates specimen dissection and its clinical context to relevant histopathology reports, and therefore a more comprehensive patient prognosis and management is possible. Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition explains pathological and clinical terminology, including a glossary of clinical request form abbreviations. A standardised step-wise approach to specimen handling is illustrated with simple line diagrams and highlights

essentials of the histopathology report, relating them to appropriate specimen dissection. The integrated multidisciplinary team approach taken to the modern clinical management of patients is reflected by correlating patient presentation, diagnostic and staging investigations with histopathology specimens. Current WHO and TNM tumor classifications are referenced. Histopathology Specimens: Clinical, Pathological and Laboratory Aspects, Second Edition will be of educative value and act as a reference tool for the medical undergraduate student, medical trainee in histopathology and the biomedical scientist, and as a useful aide memoire for the histopathology consultant.

**Historical and Conceptual Foundations of Measurement in the Human Sciences**

Derek C. Briggs, 2021-09 Historical and Conceptual Foundations of Measurement in the Human Sciences explores the assessment and measurement of nonphysical attributes that define human beings: abilities, personalities, attitudes, dispositions, and values. The proposition that human attributes are measurable remains controversial, as do the ideas and innovations of the six historical figures--Gustav Fechner, Francis Galton, Alfred Binet, Charles Spearman, Louis Thurstone, and S. S. Stevens--at the heart of this book. Across 10 rich, elaborative chapters, readers are introduced to the origins of educational and psychological scaling, mental testing, classical test theory, factor analysis, and diagnostic classification and to controversies spanning the quantity objection, the role of measurement in promoting eugenics, theories of intelligence, the measurement of attitudes, and beyond. Graduate students, researchers, and professionals in educational measurement and psychometrics will emerge with a deeper appreciation for both the

challenges and the affordances of measurement in quantitative research.

**The Cooperative Business Movement, 1950 to the Present** Patrizia Battilani, Harm G. Schröter, 2012-08-27 The United Nations declared 2012 the year of cooperatives, emphasizing that there is an alternative to privately owned firms. While greed and mismanagement have caused world financial and economic crises, co-ops offer another type of business for economic activities that is less exposed to aggressive capitalism. This book provides a problem-oriented overview of the development of cooperatives over the last fifty years. The global study addresses the major challenges cooperatives face, such as the organizational innovations introduced to acquire necessary risk-capital and implement growth-related strategies, the wave of demutualization in developed nations and their ability to construct an original consumer politics. The contributors to this volume discuss the successes and failures of the cooperatives and ask whether they are an outdated model of enterprise. They document a wave of foundations of new co-ops, new forms of collaboration between them and a growing trend toward globalization.

**Post-Soul Satire** Derek C. Maus, James J. Donahue, 2014-07-07 From 30 Americans to Angry White Boy, from Bamboozled to The Boondocks, from Chappelle's Show to The Colored Museum, this collection of twenty-one essays takes an interdisciplinary look at the flowering of satire and its influence in defining new roles in black identity. As a mode of expression for a generation of writers, comedians, cartoonists, musicians, filmmakers, and visual/conceptual artists, satire enables collective questioning of many of

the fundamental presumptions about black identity in the wake of the civil rights movement. Whether taking place in popular and controversial television shows, in a provocative series of short internet films, in prize-winning novels and plays, in comic strips, or in conceptual hip-hop albums, this satirical impulse has found a receptive audience both within and outside the black community. Such works have been variously called “post-black,” “post-soul,” and examples of a “New Black Aesthetic.” Whatever the label, this collection bears witness to a noteworthy shift regarding the ways in which African American satirists feel constrained by conventional obligations when treating issues of racial identity, historical memory, and material representation of blackness. Among the artists examined in this collection are Paul Beatty, Dave Chappelle, Trey Ellis, Percival Everett, Donald Glover (a.k.a. Childish Gambino), Spike Lee, Aaron McGruder, Lynn Nottage, ZZ Packer, Suzan Lori-Parks, Mickalene Thomas, Touré, Kara Walker, and George C. Wolfe. The essays intentionally seek out interconnections among various forms of artistic expression. Contributors look at the ways in which contemporary African American satire engages in a broad ranging critique that exposes fraudulent, outdated, absurd, or otherwise damaging mindsets and behaviors both within and outside the African American community.

*Unvarnishing Reality* Derek C. Maus, 2011 *Unvarnishing Reality* draws original insight to the literature, politics, history, and culture of the cold war by closely examining the themes and goals of American and Russian satirical fiction. As Derek C. Maus illustrates, the paranoia of nuclear standoff provided a subversive storytelling mode for authors from both nations--including Thomas Pynchon, Robert Coover, John Barth, Walker Percy, Don DeLillo, Kurt Vonnegut Jr., Vasily Aksyonov, Yuz Aleshkovsky, Alexander Zinoviev, Vladimir Voinovich, Fazil Iskander, and Sasha Sokolov. Maus surveys the background of each nation's culture, language, sociology, politics, and philosophy to map the foundation on which cold war satire was built. By highlighting common themes of utopianism, technology, and propaganda, Maus effectively shows the ultimate motive of satirists on both sides was to question the various forces contributing to the cold war and to expose the absurdity of the continuous tension that pulsed between the United States and the Soviet Union for nearly half a century. Although cold war literature has been studied extensively, few critics have focused so keenly on comparisons of satirical fictions by Russian and American writers that condemn and subvert the polarizing ideologies inherent in superpower rivalry. Such a comparison reveals thematic and structural similarities that transcend specific national and cultural origins. In considering these works together, Maus locates a thoroughgoing humanistic refutation of the cold war and its operative doctrines as well as a range of proposed alternatives. Just as the cold war combatants ultimately reconciled in 1991 with the fall of the Soviet Union, Maus seeks to bring these two literary canons together now. Their

thematic scope transcends cultural differences, and, as Maus demonstrates, these writers saw that there was not only the atomic bomb to fear, but also the dangers of complete national militarization and the constant polarizing threat of emergency. Thus their cold war critiques still resonate today and invite further comparative studies such as this one.

**Fundamentals of Geomorphology** Richard Huggett, Emma Shuttleworth, 2022-12-22 This revised and updated edition continues to provide a comprehensive introduction to the subject, exploring the world's landforms from a broad systems perspective. It covers the basics of Earth surface forms and processes, while reflecting on the latest developments in the field. Fundamentals of Geomorphology begins with a consideration of the nature of geomorphology, including its relation to society, process and form, history, and geomorphic systems, and moves on to discuss: • Structure: structural landforms associated with plate tectonics and those associated with volcanoes, and folds, faults, and joints. • Process and form: landforms resulting from, or influenced by, the exogenic agencies of weathering, running water, flowing ice and meltwater, ground ice and frost, the wind, and the sea; landforms developed on limestone; extraterrestrial landforms; and landscape evolution, a discussion of ancient landforms. Fundamentals of Geomorphology provides a stimulating and innovative perspective on the key topics and debates within the field of geomorphology. Written in an accessible and lively manner, it includes guides to further reading, chapter

summaries, and an extensive glossary of key terms. The book is also illustrated throughout with over 200 informative diagrams and attractive photographs, all in colour. It is supported by online resources for students and instructors.

**A Christian Field Guide to Technology for Engineers and Designers** Ethan J. Brue, Derek C. Schuurman, Steven H. VanderLeest, 2022-04-19 Our technology shapes the way we live, interact, work, play, and even worship. Technology and its power are both old and new—as is the wisdom we need to envision, design, build, and use it well. For Christians passionate about developing technology, it's not always clear how their faith and work intersect. How can designing and using technology actually be a way of loving God and our neighbors? Veteran engineers and teachers Ethan Brue, Derek Schuurman, and Steve VanderLeest provide a field guide for fellow explorers working with technology. Using numerous case studies, historical examples, and personal stories, they explore issues such as: biblical themes and passages that relate to technology the ethics and norms involved in technology design how engineering and technology tap into human dreams for a better world Along the way they acknowledge the challenges arising from technology but also point to the wonderful possibilities it offers us and its ability to contribute to the common good. For Christians studying and working in engineering, computer science, technical design, architecture, and related fields, this book is packed with wisdom and practical guidance. By sharing what they have learned, the authors encourage readers to ask harder questions, aspire to more noble purposes, and live a life consistent with their faith as they engage with technology.

*Understanding Colson Whitehead* Derek C. Maus, 2021-04-07 An inviting point of entrance into the truth seeking, genre defying novels of the award-winning author In 2020 Colson Whitehead became the youngest recipient of the Library of Congress Prize for American Fiction. Although Whitehead's widely divergent books complicate overarching categorization, Derek C. Maus argues that they are linked by their skepticism toward the ostensible wisdom inherited from past generations and the various forms of stories that transmit it. Whitehead, best known for his Pulitzer Prize winning novel *The Underground Railroad*, bids readers to accompany him on challenging, often open-ended literary excursions designed to reexamine—and frequently defy—accepted notions of truth. *Understanding Colson Whitehead* unravels the parallel structures found within Whitehead's books from his 1999 debut *The Intuitionist* through 2019's *The Nickel Boys*, for which he won his second Pulitzer Prize for Fiction. By first imitating and then violating their conventions, Whitehead attempts to transcend the limits of the formulas of the genres in which he seems to write. Whitehead similarly tests subject matter, again imitating and then satirizing various forms of conventional wisdom as a means of calling out unexamined, ignored, or malevolent aspects of American culture. Although it is only one of many subjects that Whitehead addresses, race is often central to his work. It serves as a prime example of Whitehead's attempt to prompt his readers into revisiting their assumptions about meanings and values. By upending the literary formulas of the detective novel, the heroic folktale, the coming-of-age story, the zombie apocalypse, the slave narrative, and historical fiction, Whitehead reveals the flaws and

shortcomings by which Americans have defined themselves. In addition to evoking such explicitly literary storytelling traditions, Whitehead also directs attention toward other interrelated historical and cultural processes that influence how race, class, gender, education, social status, and other categories of identity determine what an individual supposedly can and cannot do.
