Knowledge Networks and Tourism Michelle McLeod,Roger Vaughan,2014-11-20 The receipt of knowledge is a key ingredient by which the tourism sector can adjust and adapt to its dynamic environment. However although its importance has long been recognised the fragmentation within the sector, largely as a result of it being comprised of small and medium sized businesses, makes understanding knowledge management challenging. This book applies knowledge management and social network theories to the business of tourism to shed light on successful operations of tourism knowledge networks. It contributes specifically to understanding a network perspective of the tourism sector, the information needs of tourism businesses, social network dynamics of tourism business operation, knowledge flows within the tourism sector and the transformation of the tourism sector through knowledge networks. Social Network Analysis is applied to fully explore the growth and maintenance of tourism knowledge networks and the relationships between tourism sector stakeholders in relation to their knowledge requirements. Knowledge Networks and Tourism will be valuable reading for all those interested in successful operations of tourism knowledge networks.

Tourist Destination Governance Eric Laws,Harold Richins,Jerome Francis Agrusa,2011 This book examines the political order and the issues, processes and approaches in applying governance insights to tourist destinations. The book consists of 16 chapters presented in three parts. Part I introduces the reader to the issues and considerations of tourist destination governance. The four chapters in this part address the diversity of questions of relevance around regional destination development, community involvement, responsiveness and future outcomes of governance in the context of tourism. This includes an exploration of a variety of challenges regarding governance in emerging tourist destinations within the Greater Mekong in Asia, the conflicts in governance within a

regional community in Scotland which has had a long history of golf tourism, the development of a typology of issues and pressures that affect tourist destination governance and the role of knowledge in good governance for tourist destinations. Part II explores the complexities and considerations of decision making and the significant role it plays in its specific relevance to tourist destination governance and tourism development within regional communities. In acknowledging that tourist destination development may involve contentious, complicated and arduous processes, this part recognizes that decision making has a prominent role to play in achieving effectiveness in governance. The three chapters in this part examine tourist destination decision making during times of crisis in Thailand, stakeholder roles in governance and decision making for a wildlife tour in Tonga, and the utilization of community involvement and empowerment as keys to success in regional tourist destinations. Part III provides further understanding regarding the approaches and solutions of tourist destination governance. This includes aspects of structural change, community engagement, networks and collaborations in the context of destinations. The five chapters in this part include the exploration of a process of governance change within a broader mountain tourist destination in Switzerland, utilizing effective networks as assistance to governance in destinations, community-based tourism governance solutions in a case study in Thailand and insights from complexity, network and stakeholder theories as approaches, including an understanding of a micro-macro context of tourist destination governance at its local/regional and national level. The concluding chapter examines the theory and methodology of governance studies, provide insights for tourist destination managers and researchers, and identify opportunities for further research into destination governance issues. This chapter discusses the application of governance concepts to other countries' governance and issues of conceptual importance, such as the need for ideology in the discussion of governance.

This raises the question: does good governance of a tourist destination have to be based on democratic principles? Finally, the chapter looks at the concept of governance effectiveness.

Tourism Management in Warm-water Island Destinations Michelle McLeod,Robertico R Croes,2018-01-19 Warm-water islands are a cohesive group of islands distinguished by their geography and remoteness, history as former colonial territories, and dependence on external stakeholders for their economic and social development. Warm-water island destinations also have a year-round tourism industry. These island tourism destinations are facing unprecedented adjustment challenges in the wake of increasing globalization and susceptibility to external shocks, and are in search of appropriate policy responses to that globalization. It is critical for small islands to understand how these challenges affect tourism performance and how they impact their residents. Tourism Management in Warm-water Island Destinations unearths the critical aspects that contribute to tourism development and growth in islands. Particular emphasis is placed on destinations such as the Caribbean, with lessons learned that are applicable to other island tourism contexts in the Mediterranean, Indian Ocean and the Pacific. This book provides a platform for emerging systemic perspectives of the various aspects of island tourism, with the view that strategies for the management and development of tourism in island environments can be improved and will be of interest to those studying and researching within destination management.

Innovation and Tourism Destination Development Henrik Halkier,Marek Kozak,Bo Svensson,2017-10-02 Tourism is a central part of regional development strategies in many localities around Europe, not just in traditional coastal or mountain resorts but also in areas without a strong track record with regard to visitor economy. In a globalising world, destinations can no longer take their traditional visitors for granted and escape growing competitive pressures, because increasingly experienced, specialised and demanding travellers now have a vastly greater number of potential destinations to choose from. Both well-established and emerging tourist destinations are therefore under pressure to be innovative to increase their attractiveness in the globalising visitor economy. This book focuses on the role played by tourist destinations – conceived as multi-layered and functional governance structures – in stimulating or complicating the development of new tourist experiences. The complex relationship between firm-level and territorial development dynamics is, of course, by no means confined to tourism development, and the book will therefore be of a more general relevance for research into innovation and spatial development dynamics. This book was published as a special issue of European Planning Studies.

Air transport – tourism nexus: A destination management perspective Maya Georgieva Ivanova,2017-06-18 The aim of current research monograph is to provide a deeper view of the complex relationship between the air transport and tourism industries. The adopted point of view – a destination perspective – enables one to go into a more detailed exploration of the topic and to consider issues that usually remain invisible at the strategic managers' level. The elaborated destination analysis framework and the identification of common points between aviation and tourism set the groundwork for further examination of the air transport-tourism nexus. Therefore, the book would be useful both for students and researchers in the field of tourism, hospitality and destination management, and for practitioners and destination management representatives who may find interesting insights and ideas for improvement. The monograph would be suitable also for managers and representatives from the air transport industry by providing them with the other point of view – that of the local tourist destination – to consider in their strategic growth and negotiation process.

Evolution of Destination Planning and Strategy Larry Dwyer,Renata Tomljenović,Sanda Čorak,2016-11-24 This book deals broadly with tourism planning and development from the perspective of Croatia, a major Adriatic tourism destination which is fast becoming one of the most popular vacation spots in the European Union. With the recent accession of Croatia to the EU, Croatia is undergoing a rapid political and economic transition and generating scholarly interest in the country's primary, secondary, and tertiary industries. This book examines the country's long history and thriving success in the tourism industry through issues of destination image and identity, management challenges, economic impact, and how to attract tourists in the midst of extreme political changes. The book explores the implications of policy decisions on product development and takes a theoretically sound approach to destination planning and problem-solving in Croatia. Its timely view of Croatian national tourism policy and the broader Adriatic/Mediterranean region makes this book of interest to all scholars, students, and practitioners engaged in various aspects of destination development planning and management.

In recent years recognition of the significance of inter-organizational networks for the provision of complex services, for example at tourist destinations, has stimulated discussion of numerous issues of theoretical and practical significance. These topics include governance, collaboration and partnerships between organizations of varying scale, sophistication and expertise, concern about leadership and trust in the management of service networks, and their overall contribution to social capital development in regions, sectors and in emergent economies. This book was originally published as a special issue of The Service Industries Journal.

Tourism Destination Development Arvid Viken,Brynhild Granås,2016-02-24 Although blurred and heavily contested, the concept of 'tourist destination' still deserves careful attention. Despite its unstable characteristics, 'destination' is a central and meaningful term in play among all parties in the field of tourism, including tourists, tourism operators, and politicians, as well as students and tourism scholars. This anthology draws on different approaches and discourses of tourism destination development, while focusing on how they are shaped and reshaped and how they should be read and rehearsed. The book reveals dominant as well as alternative approaches to the field. The authors demonstrate how tourism destinations are commercial, but socially embedded; how they are both material and territorial, but at the same time socially constructed; how production of touristic brands and images are vital, but contested. Such tensions are unfolded through paradigmatic discussions and a series of case studies from the northern hemisphere. The chapters in the book investigate how destination development is catalysed through theming, how changing environments lead to reorientations, and how destinations are political. Altogether, the book provides experts and students with an up-to-date theoretical and empirical insight into tourist destinations.
