Altitude Or Attitude Ifiti Mirza,2017-02-20 Not many people know that Pakistan is home to 108 peaks above 7,000 meters (22,966 ft.) and many more above 6,000 meters (19,685 ft.). Not only that, 5 out of 14 peaks above 8,000 meters (26,247 ft.) of our planet are in Pakistan. Trek with me to the remote, rugged, and beautiful mountain range, Karakoram of Pakistan, where most of these gorgeous peaks stand tall. Know the ins and outs of the daily drill while you trek all the way to see K2, the second highest peak in the world, via the Concordia Trek on the Baltoro Glacier and then return via Gondogoro La and Hushe of the Karakoram range of Pakistan. Tag along! We will trek more than 85 miles into the thin fresh air reaching approximately 19,000 feet. Trek and camp on the wild glaciers with me. We will travel through the concentration of highest peaks of the world. There are Glaciers so magnificent that they can be seen from space. This book is your user manual on how to see K2 and come back alive. If there would be a place in the world where Mountain Gods would live then the Concordia of the Karakoram would be their throne. This book will humbly take you to the thrones of the Mountain Gods, Concordia-K2-Gondogoro La of Pakistan, and bring you back.

Deadlines and Disruption: My Turbulent Path from Print to Digital Stephen B. Shepard, 2012-09-07 A Top Editor's Take on the State of Journalism Today—and His Prescient Forecast of Its Future “This is a personal and insightful book about one of the most important questions of our time: how will journalism make the transition to the digital age? Steve Shepard made that leap bravely when he went from being a great magazine editor to the first dean of the City University of New York journalism school. His tale is filled with great lessons for us all.” —Walter Isaacson, bestselling author of *Steve Jobs* “An insightful and convivial account of a bright, bountiful life dedicated to words, information and wonder.” —Kirkus Reviews (Starred Review) This is two compelling books in one: Shepard's story of his life in print journalism, and a clearheaded look at the way journalism is evolving due to electronic media, social networking, and the ability of anyone with a computer and an opinion to make him- or herself heard. —Booklist Shepard's book will resonate with many and should be read by anyone interested in the flow of information today and its impact on society as a whole. —Library Journal “The book is in part a memoir, a tale of a life lived at the height of print journalism when print journalism itself was at its height. But it is also an analysis, an examination of the new challenges facing an old industry as it ambles and occasionally sprints its way into the digital age.” —The Washington Post About the Book: “My personal passage is, in many ways, a microcosm of the larger struggle within the journalism profession to come to terms with the digital reckoning. Will the new technologies enhance journalism . . . or water it down for audiences with diminished attention spans? What new business models will emerge to sustain quality journalism?” Stephen B. Shepard has seen it all. Editor-in-chief of *BusinessWeek* for more than 20 years, Shepard helped transform the magazine into one of the most respected voices of its time. But after his departure, he saw it collapse—another victim of the digital age. In *Deadlines and Disruption*, Shepard recounts his five decades in journalism—a time of radical transformations in the way news is developed, delivered, and consumed. Raised in the Bronx, Shepard graduated from City College and Columbia, joined *BusinessWeek* as a reporter, and rose to the top editorial post. He has closed the circle by returning to the university that spawned him, founding the Graduate School of Journalism at the City University of New York. In the digital age, anyone can be a journalist. Opinion pieces are replacing original reporting as the coin of the realm. And an entire generation is relying on Facebook friends and Twitter feeds to tell them what to read. Is this the beginning of an irreversible slide into third-rate journalism? Or the start of a better world of interactive, multimedia journalism? Will the news industry live up to its responsibility to forge a well-informed public? Shepard tackles all the tough questions facing journalists, the news industry, and, indeed, anyone who understands the importance of a well-informed public in a healthy democracy. The story of Shepard's career is the story of the news industry—and in *Deadlines and Disruption*, he provides peerless insight into one of the most critical issues of our time.

Psammic Peinobiomes Joseph Alfred Zinck, Otto Huber, Pedro García Montero, Ernesto Medina, 2023-09-30 The book represents a multidisciplinary approach to understanding soil–landscape–vegetation relationships and, specifically, the ecophysiology of plant communities developing on sandy soils of very low fertility that are subject to seasonal flooding. It provides an overview of the white sand ecosystems within the Amazon basin, and focuses on the forest and herbaceous (meadows) vegetation growing on the dystrophic sandy soils of the upper Negro and Orinoco river basins. Several chapters describe physiographic

aspects of the study area using integrated remote sensing and in situ sampling. By doing so they attain a comprehensive description of the origin and evolution of soils and landscapes, an advanced classification of soils, and a mapping of the geographic distribution of psammophilous vegetation. This volume also provides a phytosociological classification of extensive forested areas, and a detailed description of the structure and diversity of little-known herbaceous formations. It targets professionals in the fields of ecology, ecophysiology, geomorphology, soils, vegetation, and the environmental sciences. The information it offers may be of significant use to researchers, protected area planners, and environmental policy makers.
