

Digital Dividend

Tim Kelly, Carlo Maria Rossotto

The Digital Dividend of Terrestrial Broadcasting Roland Beutler, 2011-11-25 The “digital revolution” of the last two decades has pervaded innumerable aspects of our daily lives and changed our planet irreversibly. The shift from analog to digital broadcasting has facilitated a seemingly infinite variety of new applications—audience interactivity being but one example. The greater efficiency and compression of digital media have endowed broadcasters with a “digital dividend” of spare transmission capacity over and above the requirements of terrestrial broadcasting. The question is, who will use it, and how? Comparing the European experience with that of broadcasters elsewhere in the world, the author sketches the current status of international frequency management, quantifies the value of the “dividend” itself, analyzes the details of the analog-to-digital switchovers already completed, and posits what the future holds for the sector. As we grapple with new devices, inconceivable a mere generation ago, that allow us to access digital media instantly, anywhere and at any time of day, this book is a potent reminder that what we have witnessed so far may be just the first wavering steps along a road whose destination we can only guess at.

Reaping Digital Dividends Tim Kelly, Aleksandra Liaplina, Shawn W. Tan, Hernan Winkler, 2017-04-14 From East to West, the economies of Europe and Central Asia (ECA) are not taking full advantage of the internet to foster economic growth and job creation. The residents of Central Asia and the South Caucasus pay some of the highest prices in the world for internet connections that are slow and unreliable. In contrast, Europe enjoys some of the world’s fastest and affordable internet services. However, its firms and individuals are not fully exploiting the internet to achieve higher productivity growth as well as more and better jobs. Reaping Digital Dividends investigates the barriers that are holding back the broader adoption of the internet in ECA. The report identifies the main bottlenecks and provides policy recommendations tailored to economies at varying levels of digital development. It concludes that policies to increase internet access are necessary but not sufficient. Policies to foster competition, international trade and skills supply, as well as adapting regulations to the changing business environment and labor markets, will also be necessary. In other words, Reaping Digital Dividends not only requires better connectivity, but also complementary factors that allow governments, firms and individuals to make the most out of it.

Digital Terrestrial Broadcasting Networks Roland Beutler, 2008-12-10 Digital Terrestrial Broadcasting Networks approaches the existing framework for digital terrestrial broadcasting, particularly the results of the Regional Radiocommunication Conference held in 2006. That conference established a new frequency plan for Europe, Africa and parts of Asia for digital terrestrial broadcasting. The book introduces the currently existing terrestrial broadcasting systems as well as the regulatory framework by which they can begin operating. Most importantly the book explains details of the GE06 Agreement, particularly Articles 4 and 5. It also discusses the frequency plan itself and the constraints it has been derived under. The book addresses the implementation of the GE06 Plan, which leads directly to all issues related to network planning and optimization of networks. Finally, the future development of the Plan and the digital dividend is addressed. This covers issues like sharing the UHF spectrum with mobile communication services and also touches upon the World Radio Conference 07 to be held in the fall in Geneva.

Digital inclusion in Wales Great Britain: Parliament: House of Commons: Welsh Affairs Committee, 2009-08-04 The Wales Office and the Welsh Assembly Government must ensure UK digital inclusion initiatives meet Welsh needs and build on existing good work to deliver on Welsh digital ambitions, says the Welsh Affairs Committee in a report published today. This report *Digital Inclusion in Wales*, examines the use of digital technologies in Wales, highlights the urgent need for the eradication of broadband 'notspots' - areas with limited or no access to high speed internet connections - and says this issue must continue to receive priority attention. There should be more support to help a wider range of people use technology effectively. Employers told the Committee they need staff with better IT skills and more training opportunities. The Committee recommends the Welsh Assembly Government explicitly includes this issue in its digital inclusion strategy. The digital inclusion agenda is a complex mix of reserved and devolved matters. This brings a risk that key issues can be overlooked, for example no account has been taken of Welsh language speakers' needs in the Government's Digital Inclusion Action Plan. The Secretary of State for Wales must ensure that bodies in Wales across all sectors are fully engaged with initiatives and that the next stage of Digital Britain adequately reflects Welsh needs. Higher education institutions also have a vital role to play and should be involved in any new research opportunities. The Welsh Assembly already has successful digital inclusion projects in Wales and it should find a way to become fully involved with the UK digital inclusion and Digital Britain work so it does not miss out on policy developments and funding opportunities. The Committee also recommends the creation of a one-stop shop providing advice on the risks for young people using technology, and commends the Assembly's work tackling internet related crimes which it says should be promoted as part of the economic development strategy in Wales.

The United Nations and Freedom of Expression and Information Tarlach McGonagle, Yvonne Donders, 2015-06-11 There are a multitude of UN legal instruments which pertain to the rights of freedom of expression and information, and this book is the first to comprehensively map them and their

function. It details the chequered history of both rights within the UN system and evaluates the suitability of the system for overcoming contemporary challenges and threats to the rights. Leading scholars address key issues, such as how the rights to freedom of expression and information can come into conflict with other human rights and with public policy goals, such as counter-terrorism. The book's institutional focus comprises five international treaties, UNESCO and the UN Special Rapporteur on freedom of expression. Relevant for academics, lawyers, policy-makers and civil society actors, it also examines how new communication technologies have prompted fresh thinking about the substance and scope of the rights to freedom of expression and information.

Digital Transformation for Promoting Inclusiveness in Marginalized Communities Zhou, Munyaradzi, Mahlangu, Gilbert, Matsika, Cyncia, 2022-06-24 One of the realities characterizing the globe is the exclusion of marginalized communities in digital transformation. Their exclusion has resulted in a lack of participation in the digital space, which has catastrophic consequences on the digital economy. To promote digital inclusiveness in marginalized communities, there is a need to deconstruct the illusion that digital transformation is an urban phenomenon. *Digital Transformation for Promoting Inclusiveness in Marginalized Communities* discusses how digital transformation can be utilized to promote inclusiveness in marginalized communities by exploring opportunities and challenges and determining change mechanisms required to enhance digital transformation in marginalized communities. Covering a range of topics such as augmented reality and remote communities, this reference work is ideal for government employees, technologists, policymakers, industry professionals, researchers, scholars, academicians, instructors, and students.

Global Digital Cultures Aswin Punathambekar, Sriram Mohan, 2019-06-06 Digital media histories are part of a global network, and South Asia is a key nexus in shaping the trajectory of digital media in the twenty-first century. Digital platforms like Facebook, WhatsApp, and others are deeply embedded in the daily lives of millions of people around the world, shaping how people engage with others as kin, as citizens, and as consumers. Moving away from Anglo-American and strictly national frameworks, the essays in this book explore the intersections of local, national, regional, and global forces that shape contemporary digital culture(s) in regions like South Asia: the rise of digital and mobile media technologies, the ongoing transformation of established media industries, and emergent forms of digital media practice and use that are reconfiguring sociocultural, political, and economic terrains across the Indian subcontinent. From massive state-driven digital identity projects and YouTube censorship to Tinder and dating culture, from Twitter and primetime television to Facebook and political rumors, *Global Digital Cultures* focuses on enduring concerns of representation, identity, and power while grappling with algorithmic curation and data-driven processes of production, circulation, and consumption.
