*Startup CEO* Matt Blumberg, 2013-08-14 A definitive book for any CEO—first time or otherwise—of a high-growth company While big company CEOs are usually groomed for the job for years, startup CEOs aren't—and they're often young and relatively inexperienced in business in general. Author Matt Blumberg, a technology and marketing entrepreneur, knows this all too well. Back in 1999, he started a company called Return Path, which later became the driving force behind the creation of his blog, OnlyOnce—because you're only a first time CEO once. Now, more than a decade later, he's written *Startup CEO*. As the fifth book in the StartUp Revolution series, this reliable resource is based on Blumberg's experience as a startup CEO and covers a number of issues he's faced over the dozen years he's been a CEO. Offers valuable insights into how the CEO sets the overall vision and strategy of the company and communicates it to all stakeholders Discusses how to build a company's human capital by recruiting, hiring, and retaining the very best talent Examines how a CEO must align available resources with the company's strategy in order to ensure success Addresses what it takes to master the How of being a CEO—from leading an executive team to managing in any type of market Engaging and informative, this book is essential reading for any, and every, CEO.

**Handbook of Nonwoven Filter Media** Irwin M. Hutten, 2015-10-24 The Handbook of Nonwoven Filter Media, Second Edition provides readers with a fundamental understanding of nonwoven filter media. It is one of the few books dealing exclusively with the subject, and is primarily intended as a reference for people in the nonwovens industry (industry and academic researchers, technical, marketing, and quality control personnel) and universities offering courses in filtration theory and practice and nonwovens technology. The book includes applications for gas, liquid, and engine filtration, and identifies the types of filter media used in these applications. The various separation technologies that can be achieved with nonwoven filter media are revealed and discussed. Theoretical presentation is based on flow through porous media, and is developed around a nonwovens or engineered fabrics orientation. Presents the latest information on legislative, regulatory, environmental and sustainability issues affecting the nonwovens and filtration industries Includes a comprehensive discussion of Computational Flow Dynamics (CFD) by Dr. George Chase, University of Akron, USA Includes the latest Global and North American marketing statistics for filters and filter media prepared by Brad Kalil of INDIA.

*Business Law in Japan* Christopher Heath, Moritz Bälz, 2012-04-12 Compilations of cases with commentary – in Japanese Hanrei Hyakusen – often provide the most practical way to obtain a quick and reliable understanding of a specific field of law, as well as guidance on how best to proceed in specific situations. In this respect, leading cases much more than statutory provisions are essential for understanding the reality of Japanese commercial law. This incomparable book compiles 72 of the most important commercially relevant Japanese court decisions in the fields of civil law, labour law, company law, financial transactions, intellectual property, antitrust, conflict of laws, and arbitration. Each decision is presented in English translation and is accompanied by a practical and explanatory commentary by an expert in the field, be it from academia or private practice. There are 50 commentators in all, brought together here to honour the 60th birthday of Harald Baum, widely regarded as one of the world's foremost scholars on Japanese business law. The cases encompass a wide reach of causes of action in fields such as: breach of contract; tort liability; product liability; unjust enrichment; collective bargaining; shareholders' rights; directors' duty of care; political donations; insider trading; patent infringement; parallel imports; trade mark rights; unfair competition; publicity rights; price fixing; arbitration agreements; and recognition of foreign judgements. Whether serving as practical guidance or as a basis for academic research, this compilation will be warmly welcomed by practicing lawyers, teachers and students of Japanese and international law, and all others who need to understand the various fields of Japanese commercial law.

The HIP Investor R. Paul Herman, 2010-03-09 A new breed of investing that combines making more money and making a difference First there were the Profiteers, investors who sought to make money regardless of the cost to society. Then came the Do-Gooders, investors who avoided bad companies and supported good ones, based on philosophy over financials. Now this book introduces a brand new breed of investor: The HIP Investor. Written for those who want to profit handsomely while also building a better world, it will help you discover companies that are boosting the bottom line by solving key human needs through innovative products and services-benefiting customers, engaging employees, and delivering sustainable, profitable growth for their investors. That's the Human Impact + Profit, or HIP, approach. In *The HIP Investor*, R. Paul Herman-creator of the HIP methodology-introduces a revolutionary system that allows investors to profit and make a positive impact. It values measurable results over policies and philosophies, and shows how higher-performing companies can deliver both human impact and profit for shareholders. This book Provides a compelling, easy to use investor tool-kit so you can quickly HIP your portfolio Reveals the three questions you should ask when looking for a company to invest in Illustrates how world problems can be solved for profit by companies and investors making informed decisions You can make money while making a difference, and *The HIP Investor* is here to show you how.

*Gender, National Security, and Counter-Terrorism* Margaret L. Satterthwaite, Jayne Huckerby, 2013-02-15 In the name of fighting terrorism, countries have been invaded; wars have been waged; people have been detained, rendered and tortured; and campaigns for hearts and minds have been unleashed. Human rights analyses of the counter-terrorism measures implemented in the aftermath of 11 September 2001 have assumed that men suffer the most—both numerically and in terms of the nature of rights violations endured. This assumption has obscured the ways that women, men, and sexual minorities experience counter-terrorism. By integrating gender into a human rights analysis of counter-terrorism—and human rights into a gendered analysis of counter-terrorism—this volume aims to reverse this trend. Through this variegated human rights lens, the authors in this volume identify the spectrum and nature of rights violations arising in the context of gendered counter-terrorism and national security practices. Introduced with a foreword by Martin Scheinin, former UN Special Rapporteur on Human Rights and Counter-Terrorism, the volume examines a wide range of gendered impacts of counter-terrorism measures that have not been theorized in the leading texts on terrorism, counter-terrorism, national security, and human rights. *Gender, National Security and Counter-Terrorism* will be of particular interest to scholars and students in the disciplines of Law, Security Studies and Gender Studies.

**The United States' Program for Agriculture in Post-Invasion Iraq** Sam Beer, 2017-02 In the wake of the invasion of Iraq in 2003, the United States embarked on the massive project of rebuilding and transforming the agricultural sector in that country. This program was as controversial as the invasion itself, being variously portrayed as the hands-on altruism of Farm Belt army reservists or the neocolonial subjugation of Iraqi farmers to American corporations. Agricultural development in Iraq (and simultaneously, in Afghanistan) was conducted differently than previous such projects—largely by contractors rather than USAID employees, and in close coordination with the occupying military forces. While a popular opinion has emerged against the invasion itself, there has been little retrospective discussion about the goals or methods of agricultural aid in Iraq. With close examination of the changes enacted, this book sets out to foster that discussion.

Better Venture Erika Brodnock, Johannes Lenhard, 2020-11-11 *Better Venture* is a first-of-its-kind guide to diversity and inclusion in startups and venture capital—who funds, who gets funded, and how the industry can change. The industry's lack of diversity and inclusion not only compromises moral standing—it means overlooking profitable businesses and talented founders. That costs hundreds of millions of dollars a year, and neglects ideas that could serve the needs of many more people. In this collection of interviews, stories, and research, we use the momentum that has been building in recent years to expand the conversation about DEI, venture capital, and the startup ecosystem, and to inspire more concrete action. Highlights: - 43 in-depth conversations with leading investors, entrepreneurs, and researchers, making it one of the most comprehensive and diverse sets of perspectives on the startup ecosystem ever assembled in one place. - An economic history of venture capital through a diversity lens. - On-the-ground stories from founders and VCs that explore ways to create a more diverse, inclusive, equitable, and profitable venture ecosystem. No blog post can give the deep

understanding and vision needed to address the complexity of the topic. That's why we came together to write this book and are bringing in so many voices to clarify the picture of what is and what could be. Over the course of two years of research and discussion with almost 100 experts, we set out to answer four questions: - Why has the industry been so slow to change? We map the economic origins and history of venture capital to understand how the economics of VC has contributed to the glacial pace of diversifying the industry. - What barriers are founders and investors facing now? We draw on contributions from investors, operators, founders, and journalists to help catalog the barriers for founders seeking funding, and for investors seeking entry and influence in the industry. - Can diversity really lead to higher returns? We bring in new research and data to help us understand how betting on underrepresented founders and investors is really the better venture. Why does diversifying the industry matter, and to whom? How is it linked to financial performance and better decision making? How will it improve innovation across industries? - What can be done for positive change? We discuss cost effective and evidence-based interventions, tools, and solutions that can help to make the VC and startup worlds more diverse and inclusive—and result in higher returns. We hope this book and the conversations it contains help fulfill the vision of a more diverse, inclusive, and profitable ecosystem. It's time venture got better.

A Spirit Walker's Guide to Shamanic Tools Evelyn C. Rysdyk, 2014-07-01 Build Your Own Shamanic Toolkit In this beautifully illustrated guide, artist and shamanic teacher Evelyn C. Rysdyk shows you how to create, decorate, consecrate, and use various sacred tools in ritual and healing. Navaho traditional healers bring rattles, corn pollen, eagle feathers, and sage smoke together with songs and dances to affect healing. Ulchi shamans use drums, rattles, and larch tree wands called gimsacha to work healing magic. Manchu shamans will perfume the air with incense and tie on a heavy bustle of iron jingles as a part of their ceremonial costume. Modern shamanic practitioners likewise use sacred tools to facilitate our connection to helper spirits in the Upper, Middle and Lower Worlds, as well as the spirits of nature. While you can purchase many of these tools, there's nothing quite as powerful as making your own. You'll find instructions for making rattles, drums, masks, mirrors, spirit figures, fans, bells, pouches, wands, prayer bundles, flutes, whistles, and more. Plus suggestions for responsible ways to obtain the materials you'll need. "Having an intimate connection to all the spirits that came together in my favorite rattle—knowing that the tiny pebbles came from the local riverbank, the wood handle from a lightning-struck maple in my yard, and the rawhide from a black bear that was hunted by a native friend for food—gives it a far deeper meaning and power." —from the introduction The author's original artwork and photographs of shamans and their authentic tools appear throughout the book.

Emergent Public Health Issues in the US-Mexico Border Region Cecilia Ballesteros Rosales, Scott Carter Carvajal, Jill Eileen Guernsey De Zapien, 2017-02-16 US-Mexico border region area has unique social, demographic and policy forces at work that shape the health of its residents as well as serves as a microcosm of migration health challenges facing an increasingly mobile and globalized world. This region reflects the largest migratory flow between any two nations in the world. Data from the Pew Research Center shows over the last 25 years there has never been lower than 140,000 annual immigrants from Mexico to the United States (with peaks over 700,000). This migratory route is extremely hazardous due to natural (e.g., arid and hot desert regions) and human made barriers as well as border enforcement practices tied to socio-political and geopolitical pressures. Also, reflecting the national interdependency of public health and human services needs, during the most recent five year period surveyed the migratory flow between the US and Mexico has equaled that of the flow of Mexico to the US-- both around 1.4 million persons. Of particular public health concern, within the US-Mexico region of both nations there is among the highest disparities in income, education, infrastructure and access to health care--factors within the World Health Organization's conceptualization of the Social Determinants of Health, and among the highest rates of chronic disease. For

instance obesity and diabetes rates in this region are among the highest of those monitored in the world, with adult population estimates of the former over 40% and estimates in some population sub-groups for the latter over 20%. The publications reflected in this Research Topic, all reviewed from experts in the field, addressed many of the public health issues in the US Mexico Border Health Commission's Healthy Border 2020 objectives. Those objectives--broad public health goals used to guide a diverse range of government, research and community-based stakeholders--include Non Communicable Diseases (including adult and childhood obesity-related ones; cancer), Infectious Diseases (e.g., tuberculosis; HIV; emerging diseases--particularly mosquito borne illnesses), Maternal and Child Health, Mental Health Disorders, and Motor Vehicle Accidents. Other relevant public health issues affecting this region, for example environmental health, binational health services coordination (e.g., immunization), the impact of migration throughout the Americas and globally in this region, health issues related to the physical climate, access to quality health care, discrimination/mistreatment and well-being, acculturative/immigration stress, violence, substance use/abuse, oral health, respiratory disease, and well-being from a social determinants of health framework, are critical areas addressed in these publications or for future research. Each of these Research Topic publications presented applied solutions (e.g., new programs, technology or infrastructure) and/or public health policy recommendations relevant to each public health challenge addressed.
