The Bridge to Airpower Peter John Dye,2015-09-15 In the latest addition to the History of Military Aviation series, Peter Dye describes how the development of the air weapon on the Western Front during World War I required a radical and unprecedented change in the way that national resources were employed to exploit a technological opportunity. World War I has long been

recognized as an industrial war that consumed vast amounts of materiel and where logistical superiority gave the Allies an overwhelming advantage. The Bridge to Air Power is the first study that demonstrates how logistical competence provided a war-winning advantage for the Royal Flying Corps, the precursor to the Royal Air Force. It draws on a wide range of literature and original material to quantify these achievements while providing a series of illuminating case studies based around key battles. In particular, it highlights how the Royal Flying Corps' logistical organization was able to maintain high levels of resilience and agility while sustaining military outputs under widely different operational conditions—successfully introducing many of the techniques that now comprise modern supply chain management.

Indo-Pacific Bottlenose Dolphin Assessment Workshop Report ,

Dolphin Mysteries Kathleen M. Dudzinski, Toni Frohoff, 2008-10-14 Dolphins have fascinated humans for millennia, giving rise to an abundance of stories and myths about them, yet the actual details of their lives in the sea have remained elusive. In this enthralling book, Kathleen M. Dudzinski and Toni Frohoff take us into the dolphins' aquatic world to witness firsthand how they live their lives, communicate, and interact with one another and with other species, including people. Kathleen M. Dudzinski and Toni Frohoff are scientists who have collectively dedicated more than 40 years to studying dolphins beneath the ocean's surface, frequently through a close-up underwater lens. Drawing on their own experiences and on up-to-the-minute research, the authors show that dolphins are decidedly not just members of a group but distinct individuals, able to communicate with one another and with humans. Dudzinski and Frohoff introduce a new way of looking at,

and listening to, the vocabulary of dolphins in the sea, and they even provide an introductory dolphin dictionary, listing complex social signals that dolphins use to share information among themselves and with people. Unveiling an intimate and scientifically accurate portrait of dolphins, this book will appeal to everyone who has wanted a closer glimpse into the hearts and minds of these amazing creatures.

The Self-Motivated Kid Shimi Kang, 2015-08-18
Winner of the 2015 USA Book News International Book Award for Parenting and Family In this inspiring book, Dr. Shimi Kang, a Harvard-trained child and adult psychiatrist and an expert in human motivation, provides a guide to the art and science of encouraging children to develop their own internal drive and a lifelong love of learning. Drawing on the latest neuroscience and behavioral research, Dr. Kang shows why pushy, hovering tiger parents and permissive jellyfish parents actually hinder self-motivation. She proposes a powerful new parenting model: the intelligent, joyful, highly social dolphin. Dolphin parents focus on maintaining balance in their children's lives to compassionately yet authoritatively guide them toward lasting health, happiness, and success. The mother of three children and the daughter of immigrant parents who struggled to give their children the best in life—Dr. Kang's mother could not read, her father taught her math while they drove around in his taxicab, and she was never enrolled in a single extracurricular activity—Dr. Kang argues that often the simplest benefits parents give their children are the most valuable. Combining irrefutable science with unforgettable real-life stories, *The Self-*

Motivated Kid walks readers through Dr. Kang's four-part method for cultivating self-motivation. She argues that by trusting our deepest intuition about what is best for our kids, we will allow them to develop key traits—adaptability, community-mindedness, creativity, and critical thinking—to empower them to succeed and thrive in our increasingly competitive and complex world.
