Integrating Chinese Linguistic Research and Language Teaching and Learning Hongyin Tao, 2016-10-03 Linguistic research and language teaching have generally been viewed as two separate types of academic endeavor. While linguists have been preoccupied with pattern finding and theory building, language teachers often encounter issues that are not readily addressed by theoretical linguistic research. This collection, with eleven papers touching upon a wide range of issues, stands out as one of the rare concerted efforts toward a meaningful integration of the two endeavors. Subject matters include tone, stress, word structure, grammatical categories (e.g. classifiers), syntactic structures (including argument structure), discourse particles, implicit and explicit knowledge, conversational repair, and learner corpus. With a diverse range of theoretical orientations, this collection serves to showcase some of the productive ways to create synergy between Chinese linguistic research and language education.

Varieties of State Regulation Yukyung Yeo, 2022-03-07 In *Varieties of State Regulation*, Yukyung Yeo explores how, despite China's increasing

integration into the global market, the Chinese central party-state continues to oversee the most strategic sectors of its economy. Since the 1990s, as major state firms were spun off from the ministries that managed them under the central planning system, the nature of the state in governing the economy has been remarkably transformed into that of a regulator. Based on over a hundred interviews conducted with Chinese central and local officials, firms, scholars, journalists, and consultants, the book demonstrates that the form of central state control varies considerably across leading industrial sectors, depending on the dominant mode of state ownership, conception of control, and governing structure. By analyzing and comparing institutional dynamics across various sectors, Yeo explains variations in the pattern of China's regulation of its economy. She contrasts the regulation of the automobile industry, a relatively decentralized sector, with the highly-centralized telecommunications industry, and demonstrates how China's central party-state maintains regulatory authority over key local state-owned enterprises. Placing these findings in historical and comparative contexts, the book presents the evolution and current practice of state regulation in China and examines its compatibility with other contemporary government practices.

Broken Stars Ken Liu, 2019-02-19 *Broken Stars*, edited by multi award-winning writer Ken Liu--translator of the bestselling and Hugo Award-winning novel *The Three Body Problem* by acclaimed Chinese author Cixin Liu-- is his second thought-provoking anthology of Chinese short speculative fiction. Some of the included authors are already familiar to readers in the West (Liu Cixin and Hao Jingfang, both Hugo winners); some are publishing in English for the first time. Because of the growing interest in newer SFF from China, virtually every story here was first published in Chinese in the 2010s. The stories span the range from short-shorts to novellas, and evoke every hue on the emotional spectrum. Besides stories firmly entrenched in subgenres familiar to Western SFF readers such as hard SF, cyberpunk, science fantasy, and space opera, the anthology also includes stories that showcase deeper ties to Chinese culture: alternate Chinese history, chuanyue time travel, satire with historical and contemporary allusions that are likely unknown to the average Western reader. While the anthology makes no claim or attempt to be representative or "comprehensive, it demonstrates the vibrancy and diversity of science fiction being written in China at this moment. In addition, three essays at the end of the book explore the history of Chinese science fiction publishing, the state of contemporary Chinese fandom, and how the growing interest in science fiction in China has impacted writers who had long labored in obscurity. Stories include: "Goodnight, Melancholy" by Xia Jia "The Snow of Jinyang" by Zhang Ran "Broken Stars" by Tang Fei "Submarines" by Han Song "Salinger and the Koreans" by Han Song "Under a Dangling Sky" by Cheng Jingbo "What Has Passed Shall in Kinder Light Appear" by Baoshu "The New Year Train" by Hao Jingfang "The Robot Who Liked to Tell Tall Tales" by Fei Dao "Moonlight" by Liu Cixin "The Restaurant at the End of the Universe: Laba Porridge" by Anna Wu "The First Emperor's Games" by Ma Boyong "Reflection" by Gu Shi "The Brain Box" by Regina Kanyu Wang "Coming of the Light" by Chen Qiufan "A History of Future Illnesses" by Chen Qiufan Essays: "A Brief Introduction to Chinese Science Fiction and Fandom," by Regina Kanyu Wang, "A New Continent for China Scholars: Chinese Science Fiction Studies" by Mingwei Song "Science Fiction: Embarrassing No More" by Fei Dao For more Chinese SF in translation, check out *Invisible Planets*. Xiao Ru, you are not one of Qin Huai's eight beauties, Kou Bai Men, so don't wear white and dance on the roof. There are hundreds of laborers downstairs who do not know how to compose poetry! cores! This pink little kawaii, you're from Mars, go back quickly, Earth is dangerous! NO ANCIENT WISDOM, NO FOLLOWERS James McGregor, 2012-11-06 In the past three decades, China has risen from near collapse to a powerhouse -- upending nearly every convention on the world stage, whether policy or business. China is now the globe's second largest economy, second largest exporter, a manufacturing machine that has lifted 500 million of its citizens from poverty while producing more than one million US dollar millionaires. Then why do China's leaders describe the nation's economic model as "unstable and unsustainable"? Because it is. James McGregor has spent 25 years in China as a businessman, journalist and author. In this, his latest highly readable book, he offers extensive new research that pulls back the curtain on China's economic power. He describes the much-vaunted "China Model" as one of authoritarian capitalism, a unique system that, in its own way, is terminating itself. It is proving incompatible with global trade and business governance. It is threatening multinationals, which fear losing their business secrets and technology to China's mammoth state-owned enterprises. It is fielding those SOEs -- China's "national champions" -- into a global order angered by heavily subsidized state capitalism. And it is relying on an outdated investment and export model that's running out of steam. What has worked in the past, won't work in the future. The China Model must be radically overhauled if the country hopes to continue its march toward prosperity. The nation must consume more of what it makes. It must learn to innovate. It must unleash private enterprise. And the Communist Party bosses? They must cede their pervasive and smothering hold on economic power to foster the growth, and thus social stability, that they can't survive without. Government must step back, the state-owned economy must be brought to heel, and opportunity must be freed. During the Tang Dynasty, an official in the imperial court observed: "No ancient wisdom, no followers." He was lamenting that regime was headed alone into dangerous and uncharted waters without any precedent for guidance. Again today -- as McGregor makes clear -- this is China's greatest challenge.

Law, Policy, and Practice on China's Periphery Pitman B. Potter, 2010-09-13 This book examines the Chinese government's policies and practices for relations with the Inner Periphery areas of Tibet, Xinjiang, and Inner Mongolia, and the Outer Periphery areas of Hong Kong and Taiwan focusing on themes of political authority, socio-cultural relations, and economic development. China's history may be seen as one of managing the geographic periphery surrounding China proper. Successive imperial, republican, and communist governments have struggled to maintain sovereignty over the regions surrounding the great river valleys of China. The importance of the periphery is no less real today, concerns over national security, access to natural resources, and long-held concerns about relations between Han and other ethnic groups continue to dominate Chinese law, policy and practice regarding governance in the Inner Periphery regions of Inner Mongolia, Xinjiang, and Tibet. In the Outer Periphery, Beijing sees engagement with the outside world (particularly the West) as inextricably tied to Chinese sovereignty over former foreign colonies of Hong Kong and Taiwan. Using the case study of national integration to indicate how policies are articulated and implemented through law and political-legal institutions, this book will be of interest to students and scholars of the peripheral regions. It will also appeal to academic and policy communities interested in legal reform in China
