Informatics in Control Automation and Robotics Juan Andrade Cetto, Joaquim Filipe, Jean-Louis Ferrier, 2011-03-15 The present book includes a set of selected papers from the fourth "International Conference on Informatics in Control Automation and Robotics" (ICINCO 2009), held in Milan, Italy, from 2 to 5 July 2009. The conference was organized in three simultaneous tracks: "Intelligent Control Systems and Optimization", "Robotics and Automation" and "Systems Modeling, Signal Processing and Control". The book is based on the same structure. ICINCO received 365 paper submissions, not including those of workshops, from 55 countries, in all continents. After a double blind paper review performed by the Program Committee only 34 submissions were accepted as full papers and thus selected for oral presentation, leading to a full paper acceptance ratio of 9%. Additional papers were accepted as short papers and posters. A further refinement was made after the conference, based also on the assessment of presentation quality, so that this book includes the extended and revised versions of the very best papers of ICINCO 2009. Commitment to high quality standards is a major concern of ICINCO that will be maintained in the next editions of this conference, including not only the stringent paper acceptance ratios but also the quality of the program committee, keynote lectures, workshops and logistics.

Computational Color Imaging Raimondo Schettini, Shoji Tominaga, Alain Trémeau, 2011-04-06 This book constitutes the refereed proceedings of the Third Computational Color Imaging Workshop, CCIW 2010, held in Milan, Italy, in April 2010. The 16 revised full papers, presented together with three invited papers, were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on computational photography, color and perception, color imaging, and computational imaging.

Flamingo Flametti Tal R, Axel Heil, 2017 Tal R (born 1967) has become a star of the international art scene. His artistic spectrum encompasses not only paintings, drawings and collages, but also prints, artist's books and sculptures. The title references Hugo Ball's novel *Flametti*, first published in 1918. In 2013 Vienna-based Harpune Verlag reprinted the text, illustrated by Tal R, in a limited-edition artist's book of 30 copies. Since then, vaudeville director Max Flametti has been Tal R's companion-in-mind - the Danish artist has created a series of collages, paintings and sculptures inspired by the character from the novel. Now the book accompanying the extraordinary exhibition by Tal R at Nuremberg's zumikon is finished: a total of 14 sculptures fill the darkened space in the manner of Dadaistic colportage, flanked by claustrophobic carnival and colourful comedy. The legendary Cabaret Voltaire, where Dadaism first saw the light of day some 100 years ago in Zurich, serves as the starting point. Accompanies the exhibition Tal R. *Flamingo Flametti*, Institut für moderne Kunst Nürnberg, 5.2.-2.4.2016. English and German text.

St. Ursula and the Eleven Thousand Virgins of Cologne Scott Bradford Montgomery, 2010 The cult of St. Ursula and the Eleven Thousand Virgin Martyrs of Cologne was the most widespread relic cult in medieval Europe. The sheer abundance of relics of the Eleven Thousand Virgins, which allowed for the display of immense collections, shaped the notion of corporate cohesion that characterized the cult. Though the primacy of St. Ursula as the leader of this holy band was established by the tenth century, she was conceived as the head of a corporate body. Innumerable inventories and liturgical texts attest to the fact that this cult was commemorated and referenced as a collective mass - Undecim millium virginum. This group identity informed, and was formulated by, the presentation of their relics, as well as much of the imagery associated with this cult. This book explores the visual, textual, performative, and perceptual aspects of this phenomenon, with particular emphasis on painting and sculpture in late medieval Cologne. Examining the ways in which both texts and images worked as vestments, garbing the true core of relics which formed the body of the cult, the book examines the cult from the core outward, seeking to understand hagiographic texts and images in terms of their role in articulating relic cults.

Climate as a Design Factor Christian Hönger, Roger Boltshauser, 2014-08 This volume studies the climate as a design factor and examines its influence on energy and design consequences. Instead of an abstract, technical perspective, the approach is illustrative and spatial, thereby consciously stimulating the search for inspirational solutions.

The History of the Theory of Structures Karl-Eugen Kurrer, 2012-01-09 This book traces the evolution of theory of structures and strength of materials - the development of the geometrical thinking of the Renaissance to become the fundamental engineering science discipline rooted in classical mechanics. Starting with the strength experiments of Leonardo da Vinci and Galileo, the author examines the emergence of individual structural analysis methods and their formation into theory of structures in the 19th century. For the first time, a book of this kind outlines the development from classical theory of structures to the structural mechanics and computational mechanics of the 20th century. In doing so, the author has managed to bring alive the differences between the players with respect to their engineering and scientific profiles and personalities, and to create an understanding for the social context. Brief insights into common methods of analysis, backed up by historical details, help the reader gain an understanding of the history of structural mechanics from the standpoint of modern engineering practice. A total of 175 brief biographies of important personalities in civil and structural engineering as well as structural mechanics plus an extensive bibliography round off this work.

Rights and Legal Empowerment in Eradicating Poverty Dan Banik, 2008-01-01 How best to improve the position of the world's poorest people remains one of the major issues facing the human species. This book investigates the role that legal empowerment and rights (including human rights) can play in tackling poverty and enabling poor people in developing countries to take action to improve their positions.

The First Computers Raul Rojas,Ulf Hashagen,2002-07-26 This history of computing focuses not on chronology (what came first and who deserves credit for it) but on the actual architectures of the first machines that made electronic computing a practical reality. The book covers computers built in the United States, Germany, England, and Japan. It makes clear that similar concepts were often pursued simultaneously and that the early researchers explored many architectures beyond the von Neumann architecture that eventually became canonical. The contributors include not only historians but also engineers and computer pioneers. An introductory chapter describes the elements of computer architecture and explains why being first is even less interesting for computers than for other areas of technology. The essays contain a remarkable amount of new material, even on well-known machines, and several describe reconstructions of the historic machines. These investigations are of more than simply historical interest, for architectures designed to solve specific problems in the past may suggest new approaches to similar problems in today's machines. The Treachery of Strategies: A call for true EU strategic partnerships (Egmont Papers - 45) Thomas Renard,2011

Adreßbuch der Städte Ulm und Neu-Ulm ,

Europe 2020 Eric Marlier,David Natali,2010 This book attempts to answer the question: How can Europe 2020, the EU's new strategy for smart, sustainable and inclusive growth, lead to a stronger social EU with less poverty and greater social cohesion? Examined in depth are achieving the EU's ambitious social objectives to lift at least 20 million people out of the risk of poverty and exclusion by 2020 and the Union's four other mutually reinforcing targets. A key objective of the book is to take a critical look at and draw lessons from the past, 2000-2010 Lisbon Strategy. Another important objective is to explore the format and role of EU coordination and cooperation in the social field in the new EU governance framework, in a context marked by slow recovery after the global economic crisis. Finally, the book also makes proposals for the further reinforcement of this coordination and cooperation and for the improvement of the different instruments available at EU, national and sub-national levels.

Culture and External Relations Jozef Bátora,Monika Mokre,2016-05-13 Political entities use culture to support their soft power potential, to generate goodwill, to frame international agenda in particular ways, to erect and re-enact boundaries and/or to create societal linkages across them. While the importance of culture has been on the rise in the realm of foreign affairs, its role in this field remains one of the most under-studied aspects of state policy. In this book, a range of international experts take an unprecedented look at what role external cultural policy plays in foreign affairs. The book features historical case studies ranging from European 'civilizing' engagement with nineteenth-century China to uses of Abstract Expressionism as an instrument in the ideological struggles of the Cold War. Conceptual issues ranging from the dynamics of the 'Anglosphere' to the effects of what some term the 'culture of liberal democracy' are addressed. Current trends in the uses of culture in the EU's external relations both from the perspective of institutional developments, policies and practices in the EU and from the perspective of countries engaged by the EU's cultural policies are also discussed in greater detail. The systematic, theoretically informed and empirically supported analyses make this book an indispensable read for scholars and policy makers wishing to gain a new understanding of the role that culture plays in foreign affairs.
