Innovative Internet Computing Systems Herwig Unger,Thomas Boehme,Armin Mikler,2003-08-01

This book constitutes the refereed proceedings of the second international workshop on Innovative Internet Computing Systems, IICS 2002, held in Khlungsborn, Germany, in June 2002. The 19 revised full papers presented together with an invited paper were carefully reviewed and selected from over 30 submissions. Among the topics addressed are large-scale distributed computing infrastructures presenting new challenges to information and Web technology, the management and retrieval of web-based information, content classification, web-based communities management, structure and retrieval of information from large distributed data bases, and the representation of the distributed nature of information by means of graph-theoretical models.

Enterprise Information Systems V Olivier Camp,Joaquim Filipe,Slimane Hammoudi,Mario G.

Piattini,2006-02-27 This book comprises a set of papers selected from those presented at the fifth « International Conference on Enterprise Information Systems », (ICEIS'2003) held in Angers, France, from 23 to 26 April 2003. The conference was organised by École Supérieure d'Électronique de l'Ouest (ESEO) of Angers, France and the Escola Superior de Tecnologia of Setúbal, Portugal. Since its first edition in 1999, ICEIS focuses on real world applications and aims at bringing together researchers, engineers and practitioners interested in the advances and business applications of information systems. As in previous years, ICEIS'2003 held four simultaneous tracks covering different aspects of enterprise computing: Databases and Information Systems Integration, Artificial Intelligence and Decision Support Systems, Information Systems Analysis and Specification and Software Agents and Internet Computing. Although ICEIS'2003 received 546 paper submissions from over 50 countries, only 80 were accepted as full papers and presented in 30-minutes oral presentations. With an acceptance rate of 15%, these numbers demonstrate the intention of preserving a high quality forum for future editions of this conference. From the articles accepted as long papers for the conference, only 32 were selected for inclusion in this book Additional keynote lectures, tutorials and industrial sessions were also held during ICEIS'2003, and, for the first time this year, the 1st Doctoral Consortium on Enterprise Information Systems gave PhD students an opportunity to present their work to an international audience of experts in the field of information systems.

Toxic at Work David Gillespie,2023-09-26 Most bullies are psychopaths, but not all psychopaths look like bullies. Many blind us with their charm and dazzle us with their success. But they all share a common trait that makes them highly dangerous: they don't have empathy. Research tells us that one in twenty people have no empathy. Empathy is the human ingredient that enables trust, forges bonds

and allows teams to work and workplaces to thrive. It is why we are able to build cities and play football. The psychopath is not interested in cooperative effort but in individual power and glory - and they will stomp on anyone who gets in their way, destroying careers, teams and, sometimes, organisations. Using research and stories drawn from history, politics, sports and business, Gillespie explains how workplace psychopaths - from bosses to clients, colleagues and customers - see the world, and highlights their devastating impact on workplaces. He shows empaths how to self-protect and organisations how to use trust, transparency and teamwork to insulate against the corrosive impact. Unflinching in its analysis of the problem and clear-sighted in suggesting solutions, this is an essential guide for spotting, managing and ejecting the workplace psycho, once and for all.

Mobile Communication and Society Manuel Castells, Mireia Fernandez-Ardevol, Jack Linchuan Qiu, Araba Sey, 2009-09-18 How wireless technology is redefining the relationship of communication, technology, and society around the world—in everyday work and life, in youth culture, in politics, and in the developing world. Wireless networks are the fastest growing communications technology in history. Are mobile phones expressions of identity, fashionable gadgets, tools for life—or all of the above? *Mobile Communication and Society* looks at how the possibility of multimodal communication from anywhere to anywhere at any time affects everyday life at home, at work, and at school, and raises broader concerns about politics and culture both global and local. Drawing on data gathered from around the world, the authors explore who has access to wireless technology, and why, and analyze the patterns of social differentiation seen in unequal access. They explore the social effects of wireless communication—what it means for family life, for example, when everyone is constantly in touch, or for the idea of an office when workers can work anywhere. Is the technological ability to multitask further compressing time in our already hurried existence? The authors consider the rise of a mobile youth culture based on peer-to-peer networks, with its own language of texting, and its own values. They examine the phenomenon of flash mobs, and the possible political implications. And they look at the relationship between communication and development and the possibility that developing countries could leapfrog directly to wireless and satellite technology. This sweeping book—moving easily in its analysis from the United States to China, from Europe to Latin America and Africa—answers the key questions about our transformation into a mobile network society.

Dream Team Jack McCallum, 2013-04-09 NEW YORK TIMES BESTSELLER Acclaimed sports journalist Jack McCallum delivers the untold story of the greatest team ever assembled: the 1992 U.S. Olympic Men's Basketball Team. As a writer for *Sports Illustrated*, McCallum enjoyed a courtside seat for the most exciting basketball spectacle on earth, covering the Dream Team from its inception to the

gold medal ceremony in Barcelona. Drawing on fresh interviews with the players, McCallum provides the definitive account of the Dream Team phenomenon. He offers a behind-the-scenes look at the controversial selection process. He takes us inside the team's Olympic suites for late-night card games and bull sessions where superstars like Michael Jordan, Magic Johnson, and Larry Bird debated the finer points of basketball. And he narrates a riveting account of the legendary intrasquad scrimmage that pitted the Dream Teamers against one another in what may have been the greatest pickup game in history. In the twenty years since the Dream Team first captivated the world, its mystique has only grown. Dream Team vividly re-creates the moment when a once-in-a-millennium group of athletes came together and changed the future of sports—one perfectly executed fast break at a time. With a new Afterword by the author “The absolute definitive work on the subject, a perfectly wonderful once-you-pick-it-up-you-won’t-be-able-to-put-it-down book.”—The Boston Globe “An Olympic hoops dream.”—Newsday “What makes this volume a must-read for nostalgic hoopsters are the robust portraits of the outsize personalities of the participants, all of whom were remarkably open with McCallum, both then and now.”—Booklist (starred review)
