Developer's Digital Media Reference Curtis Poole,Janette Bradley,2013-04-26 Designed for media professionals working across a broad range of formats, Developer's Digital Media Reference is an excellent reference guide for those keeping pace with this dynamic industry. As convergence between the World Wide Web, multimedia, and television production communities continues, there is an increased demand for professionals to familiarize themselves with the many new delivery contexts, including hybrid DVD (where digital video

content and computer data live on the same disc), interactive TV, and streaming media. Developer's Digital Media Reference covers essential technologies such as SVG (scalable vector graphics), SMIL (Synchronized Multimedia Integration Language, a markup language for creating animations on the web), MPEG-4 (compression standard for streaming audio/video), and Dynamic Web Applications. In addition to serving as a quick-look-up guide, this text is organized to explain today's major media: server-based architectures, disc-based architectures, distribution architectures, and merging/shared architectures. Each topic is discussed in terms of the technological background-evolution, current tools, and production tips and techniques.

UNIX and Linux Forensic Analysis DVD Toolkit

Chris Pogue, Cory Altheide, Todd Haverkos, 2008-07-24 This book addresses topics in the area of forensic analysis of systems running on variants of the UNIX operating system, which is the choice of hackers for their attack platforms. According to a 2007 IDC report, UNIX servers account for the second-largest segment of spending (behind Windows) in the worldwide server market with \$4.2 billion in 2Q07, representing 31.7% of corporate server spending. UNIX systems have not been analyzed to any significant depth largely due to a lack of understanding on the part of the investigator, an understanding and knowledge base that has been achieved by the attacker. The book begins with a chapter to describe why and how the book was written, and for whom, and then immediately begins addressing the issues of live response (volatile) data collection and analysis. The book continues by addressing issues of collecting and analyzing the contents of physical memory (i.e., RAM). The following chapters address /proc analysis, revealing the wealth of significant evidence, and analysis of

files created by or on UNIX systems. Then the book addresses the underground world of UNIX hacking and reveals methods and techniques used by hackers, malware coders, and anti-forensic developers. The book then illustrates to the investigator how to analyze these files and extract the information they need to perform a comprehensive forensic analysis. The final chapter includes a detailed discussion of loadable kernel Modules and malware. Throughout the book the author provides a wealth of unique information, providing tools, techniques and information that won't be found anywhere else. This book contains information about UNIX forensic analysis that is not available anywhere else. Much of the information is a result of the author's own unique research and work. The authors have the combined experience of law enforcement, military, and corporate forensics. This unique perspective makes this book attractive to all forensic investigators.

Energy-Efficiency Standards and Green Building Certification Systems Used by the Department of Defense for Military Construction and Major Renovations Committee to Evaluate Energy-Efficiency and Sustainability Standards Used by the Department of Defense for Military Construction and Repair, Board on Infrastructure and the Constructed Environment, Division on Engineering and Physical Sciences, National Research Council, 2013-06-18 Congress has an ongoing interest in ensuring that the 500,000 buildings and other structures owned and operated by the Department of Defense (DOD) are operated effectively in terms of cost and resource use. Section 2830 of the National Defense Authorization Act for fiscal year requires the Secretary of Defense to submit a report to the congressional defense committees on the energy-efficiency and sustainability standards used by DOD

for military construction and major renovations of buildings. DOD's report must include a cost-benefit analysis, return on investment, and long-term payback for the building standards and green building certification systems, including: (A) American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) Standard 189.1-2011 for the Design of High-Performance, Green Buildings Except Low-Rise Residential. (B) ASHRAE Energy Standard 90.1-2010 for Buildings Except Low-Rise Residential. (C) Leadership in Energy and Environmental Design (LEED) Silver, Gold, and Platinum certification for green buildings, as well as the LEED Volume certification. (D) Other American National Standards Institute (ANSI) accredited standards. DOD's report to the congressional defense committees must also include a copy of DOD policy prescribing a comprehensive strategy for the pursuit of design and building standards across the department that include specific energy-efficiency standards and sustainable design attributes for military construction based on the cost-benefit analysis, return on investment, and demonstrated payback required for the aforementioned building standards and green building certification systems. Energy-Efficiency Standards and Green Building Certification Systems Used by the Department of Defense for Military Construction and Major Renovations summarizes the recommendations for energy efficiency.

Paul Chan Daniel Birnbaum, 2014 Central to this book is the part entitled Selected Source Files that Paul Chan developed together with the graphic designer and Schaulager. These heterogeneous, collage-like sequences of images enable an insight into the visual and intellectual context of the works' evolution. In his essay, Daniel Birnbaum explains the concept of the exhibition, his remarks completed by a photo spread with installation shots of the exhibition at Schaulager, as well as archive material of the artist. The book concludes with a list of works in the exhibition, including detailed information and short comments, as well as reference images of every work. Published on the occasion of the exhibition Paul Chan: Selected Works, at Schaulager, Basel, 22 April - 19 October 2014. English and German text.
