Fire in the Crucible John Briggs,2002-01-01 The co-author of Looking Glass Universe probes the nature of creativity and reveals the strategies and tactics of some of our greatest creative minds. What makes geniuses different from the rest of us? What is the difference between a prodigy and a genius? Are geniuses born or made? What is creative vision and where does it come from? What are the secrets of talent? And why do great creators seem to have so many oppositions in their personalities? In this mind-expanding investigation of creativity, John Briggs reveals that there is no special trait of genius. Geniuses are not necessarily smarter or more talented than other people, but they give their attention to subtle nuances, contradictory feelings and perceptions that others experience and ignore. By focusing on sensory nuances, geniuses create themselves. *Fire in the Crucible* offers a compelling exploration of the roots of creativity and genius. Drawing on the lives and work of extraordinary scientists, artists, writers, composers, and inventors, Briggs shows how creative individuals exploit doubt and uncertainty, and the mental strategies and tactics they employ when they work. "In asking about creativity," he writes, "we are really asking about what is best, what is deepest in life." *Fire in the Crucible* draws the reader into an eye-opening journey through the inner workings of some of the greatest creative minds of all time—and allows us to understand more deeply the nature of creativity in our own lives and work. Praise for *Fire in the Crucible* "His refreshingly open-ended approach brings us closer to the elusive nature of genius." —Publishers Weekly "An exuberant voyage through the brains and minds of creative individuals, chock-full of intriguing scientific discoveries and puzzling paradoxes." —Howard Gardner, Harvard University, author of *Multiple Intelligences*

Great Feuds in Technology Hal Hellman,2004-01-19 If someone were to ask you who invented the miner's safety lamp, you'd probably have no trouble answering I don't know. But what about the telegraph? The automobile? The airplane? Television? Conflicting claims over the answers to these questions have led to some of the longest and most bitter battles in the history of technology. *Great Feuds in Technology* takes a close look at each of these celebrated disputes and reveals that the answers are far more complex, entertaining, and enlightening than you might ever imagine.

Hoosier Hysteria - a '67 Griffith Panther Memoir Rick Butler,2016-09-16 This memoir focuses on Ricks senior high school basketball team the 1967 Griffith Panthers. This team made basketball school history winning their 1st ever state tournament sectional and ending with a record of 20 wins and 4 losses. The memoir chronicles Ricks basketball experience starting in grade school and ending with coaching his granddaughter, Mayas community basketball team. All of this represented Ricks glorious ride through Hoosier hysteria especially his senior year. In 1967 the Indiana state basketball tournament still had no classes or divisions based on school size. All schools played each other with small schools competing against the large schools and everyone else in between. Griffiths 1967 basketball team was basically a state ranked team in spite of its very small size an enrollment of 600. This Cinderella team was revered by the town. Griffith had been waiting for a team like this forever and the 1967 team became their team of destiny. If you liked the movie Hoosiers...
