**Identity Strategies of Stateless Ethnic Minority
Groups in Contemporary Poland** Ewa Michna, Katarzyna

Warmińska, 2020-04-29 This book provides a unique description of the identity strategies of stateless ethnic minorities in Poland. It describes and analyses the identity politics carried out by these groups, aimed at obtaining recognition of a separate status from the Polish state (a dominant group) in the symbolic and legal realms. On the one hand, comparative analysis of the activity undertaken by Lemkos, Polish Tatars, Roma, Kashubians, Karaims and Silesians will allow us to present the specifics of each of the communities, resulting from the special nature of their ethnicity. On the other hand, it will show some typical strategies for stateless groups in the field of identity and ethnicity. Critical factors here are processes such as building ethnic borders, dealing with a non-privileged position, striving to achieve recognition for the status quo of a particular identity or politicization of ethnicity. The subjects are mostly indigenous groups, and the lack of legitimacy of emancipation in their own nation-state can determine their status as an 'in-between' in the context of ethnic relations in Poland. In the analysis undertaken in the book of the activity of the ethnic groups there are three main contexts: intragroup, state policy and the global discourse of the rights of minorities. They determine the choice of identity strategy and adopted policy of identity. Not without significance is also the historical

context, especially the political transformation in Poland after 1989, when Polish state policy towards ethnic minorities changed fundamentally - moving from the mono-national ideology of a socialist state to a pluralistic model of a democratic state. Gathering diverse examples in one volume will allow the reader to become familiar with the complex topic of ethnic relations in the world today, and especially in Central Europe, which is still in the process of change.

Selected Contemporary Challenges of Ageing Policy Łukasz Tomczyk, Andrzej Klimczuk, 2017-11-23
This volume-Selected Contemporary Challenges of Aging Policy-is the most international of all published monographs from the series Czech-Polish-Slovak Studies in Andragogy and Social Gerontology. Among the scholars trying to grasp the nuances and trends of social policy, there are diverse perspectives, resulting not only from the extensive knowledge of the authors on the systematic approach to the issue of supporting older people but also from the grounds of the represented social gerontology schools. In the texts of Volume VII interesting are both distinct and coherent elements presenting the role of local, regional and global policies in the prism of the countries from which the authors originate: the Czech Republic, Slovenia, Lithuania, Latvia, Poland, Slovakia, Italy, Turkey, and the United States. The chapters show a wealth of methodological approaches to the perception of social policy and its tools. In the texts there are issues related to the idea of active ageing,

discrimination against older people in the workplace, comparability of solutions friendly to employment of older adults in the Czech Republic, Poland, and Slovakia as well as focused on the importance of educational forms (universities of the third age, senior clubs, folk high schools, and other non-formal solutions) determining an active life in old age. This monograph also attempted to answer the question regarding how to transfer the idea of intergenerational learning into the realm of practice. This issue complements the chapter on the implementation of intergenerational programs in institutions providing long-term care support. The book also outlines a public policy on ageing in the perspective of the changes over the last few decades (Slovenia) and the case demonstrating solutions to accelerate self-reliance as a key to active ageing (Turkey). We hope that seventh volume of our series will be an intellectual stimulus for further international research on change in social policy and will contribute to the dissemination of best practices as well as contribute to positive social change.

State Traditions and Language Regimes Linda Cardinal,Selma K. Sonntag,2015-05-01 Language policies are political. They have political consequences as well as political origins. In *State Traditions and Language Regimes*, scholars

from Asia, Europe, and North America shift focus from the consequences of language policies to how and why states make language policy choices. This shift, theorized through the concept of language regime, inserts an urgently needed political science perspective into the current dialogue between sociolinguists, who research the societal effects of language policies, and political theorists of language rights, who analyze the normative implications of policies. New analytical tools drawn from comparative politics are showcased to analyze paths taken by different states in establishing language regimes, at times disrupted and redirected at critical junctures. Contributions to the volume include analyses of Canada's increasingly court-driven language policies, the United States' bifurcated language regime in the aftermath of 9/11, Ireland's conflicted protection of the Irish language, France's linguistic Jacobin tradition disrupted by Europeanization, the role of political parties and coalitions in language regime stability and change in Taiwan and Southeast Asia, Poland's war-torn history informing policy toward regional languages, and the role of English in international peace-building. While other books look at the political and societal effects of language policy, none seeks to employ a historical institutionalism approach which sets language policy choice in the context of power relations embedded in state traditions. *State Traditions and Language Regimes* offers a comparative politics perspective, one that enriches interdisciplinary debate on language policy.

Dictionaries. An International Encyclopedia of Lexicography Rufus Gouws, Ulrich Heid, Wolfgang Schweickard, Herbert Ernst Wiegand, 2013-12-18 The basis for this additional volume are the three volumes of the handbooks **Dictionaries. An International Encyclopedia of Lexicography** (HSK 5.1–5.3), published between 1989 and 1991. An updating has been perceived as an important desideratum for a considerable time. In the present Supplementary Volume the premises and subjects of HSK 5.1–5.3 are complemented by new articles that take account of the practice-internal and theoretical developments of the last 15 years. Special attention has been given to the following topics: the status and function of lexicographic reference works, the history of lexicography, the theory of lexicography, lexicographic processes, lexicographic training and lexicographic institutions, new metalexicographic methods, electronic and, especially, computer-assisted lexicography.
