Do Androids Dream of Electric Sheep? Philip K. Dick, 2008-02-26 A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film *Blade Runner*. By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone

Electric Sheep Slouching Towards Bethlehem Harry Eiss, 2014-03-25 On Monday, 8:15 a.m., August 6, 1945, the world changed forever. In the single largest act of destruction ever initiated by humans, a bomb with the equivalent force of 20,000 tons of TNT shattered Hiroshima, killing tens of thousands of civilians, people who had become used to the American war planes flying overhead, planes that were purposely not dropping bombs on their city, to the point where the rush to the bomb shelters had become lackadaisical, and the normal activities continued with little interruption – getting the children up and off to school, opening the many small retail stores for the daily customers, perhaps stopping at a local café for morning coffee or

tea, perhaps joining in on the group exercise classes. This is the precise instant we entered the postmodern world, one where the easy truths of centuries no longer applied. Speculative Fiction projects real possibilities beyond the now shattered assumptions, moving through marginalized fictional landscapes – science fiction, fantasy, horror, weird fiction, supernatural fiction, superhero comics, graphic novels, and movies, utopian and dystopian fiction, apocalyptic and post-apocalyptic fiction, Cyber Punk, the New Wave, as well as related static, motion, and virtual arts, including everything from graphic novels to video games.

Spymaster Helen Fry,2021-11-30 The dramatic story of a man who stood at the center of British intelligence operations, the ultimate spymaster of World War Two: Thomas Kendrick Thomas Kendrick (1881–1972) was central to the British Secret Service from its beginnings through to the Second World War. Under the guise of British Passport Officer, he ran spy networks across Europe, facilitated the escape of Austrian Jews, and later went on to set up the M Room, a listening operation which elicited information of the same significance and scope as Bletchley Park. Yet the work of Kendrick, and its full significance, remains largely unknown. Helen Fry draws on extensive original research to tell the story of this remarkable British intelligence officer. Kendrick's life sheds light on the development of MI6 itself—he was one of the few men to serve Britain across three wars, two of which while working for the British Secret Service. Fry explores the private and public sides of Kendrick, revealing him to be the epitome of the English gent—easily able to charm those around him and scrupulously secretive.

The Art of Artificial Evolution Juan Romero,Juan J. Romero,Penousal Machado,2008 Art is the Queen of all sciences communicating knowledge to all the generations of the world. Leonardo da Vinci Artistic behavior is one of the most valued qualities of the human mind. Although artistic manifestations vary from culture to culture, dedication to artistic tasks is common to all. In other words, artistic behavior is a universal trait of the human

species. The current, Western definition of art is relatively new. However, a dedication to artistic endeavors – such as the embellishment of tools, body - namentation, or gathering of unusual, arguably aesthetic, objects – can be traced back to the origins of humanity. That is, art is ever-present in human history and prehistory. Art and science share a long and enduring relationship. The best-known example of the exploration of this relationship is probably the work of Leonardo da Vinci. Somewhere in the 19th century art and science grew apart, but the cross-transfer of concepts between the two domains continued to exist. Currently, albeit the need for specialization, there is a growing interest in the exploration of the connections between art and science. Focusing on computer science, it is interesting to notice that early pioneers of this discipline such as Ada Byron and Alan Turing showed an interest in using computational devices for art-making purposes. Oddly, in spite of this early interest and the ubiquity of art, it has received relatively little attention from the computer science community in general, and, more surprisingly, from the artificial intelligence community.

Retrofitting Blade Runner Judith Kerman, 1991 This book of essays looks at the multitude of texts and influences which converge in Ridley Scott's film Blade Runner, especially the film's relationship to its source novel, Philip K. Dick's *Do Androids Dream of Electric Sheep?* The film's implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society. Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting. These essays consider political, moral and technological issues raised by the film, as well as literary, filmic, technical and aesthetic questions. Contributors discuss the film's psychological and mythic patterns, important political issues and the roots of the film in *Paradise Lost*, *Frankenstein*, detective fiction, and previous science fiction cinema.
