**Lightning** Chandima Gomes,2021-08-13 This book highlights the essential theoretical and practical aspects of lightning, lightning protection, safety and education. Additionally, several auxiliary topics that are required to understand the core themes are also included. The main objective of the contents is to enlighten the scientists, researchers, engineers and social activists (including policy makers) in developing countries regarding the key information related to lightning and thunderstorms. A majority of developing countries are in tropics where the lightning characteristics are somewhat different from those in temperate regions. The housing structures and power/communication networks, and human behavioural patterns(that depends on socio-economic parameters) in these countries are also different from those in the developed world. As the existing books on similar themes address only those scenarios in developed countries, this book serves a vast spectrum of readership in developing world who seek knowledge in the principles of lightning and a practical guidance on lightning protection and safety education.

**Technics and Civilization** Lewis Mumford,2010-10-30 Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written.”—Journal of Technology and Culture

Based on research and anecdotal evidence the book compiles a range of recommendations on how to maintain our friendships in good repair and how to foster friendship in old age. The book addresses an audience of professionals working to fight loneliness in our society as well as lay people wanting to reflect on how to improve the friendships in their lives. *Islands of Rainforest* Edvard Hviding,Tim Bayliss-Smith,2018-05-08 This title was first published in 2000: An original and thought-provoking analysis of modern initiatives in the tropical rain forest. While issues such as logging, eco-timber, eco-tourism have been widely analyzed from an outsider's perspective, this book considers them from the local people's viewpoint, in terms of a long history of the rainforest uses. The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless, nor is it primarily spiritual or mystical. It is in fact firmly connected to modern realities, while still being rooted in historical beliefs and practices. Standing at the intersection of anthropology, historical geography and rainforest ecology, and also at the interface of the local and the global, this ethnographically grounded study dispels a number of commonly held assumptions. It reveals how processes of 'impact' are actually two-way interactions, as local communities in Melanesia incorporate industries like logging into rapidly evolving post-colonial society and economy.

Supernatural and Natural Selection Lyle B. Steadman,Craig T. Palmer,2015-11-17 Spanning many different epochs and varieties of religious experience, this book develops a new approach to religion and its role in human history. The authors look across a range of religious phenomena-from ancestor worship to totemism, shamanism, and worldwide modern religions-to offer a new explanation of the evolutionary success of religious behaviors. Their book is more empirical and verifiable than most previous books on evolution and religion because they develop an approach that removes guesswork about beliefs in the supernatural, focusing instead on the behaviors of individuals. The result is a pioneering look at how and why natural selection has favored religious behaviors throughout history.
