The book outlines how gamer values such as the use of cheat codes, the love of gadgets, the need to play games, and the desire to be constantly connected can be used as methods for moving information from the heads of the boomers to the fingertips and gadgets of the gamers. As organizations begin to think strategically about how to attract, retain, and train new talent, this book, written by Karl Kapp, named one of 2007's Top 20 Most Influential Training Professionals by Training Industry, Inc., will be an invaluable resource.

The Gamification of Learning and Instruction Karl M.

Kapp,2012-05-01 Karl has written the definitive guide to gamification, which itself is accessible and engaging. He brings trends to life and illustrates the principles of gamification through numerous examples from real-world games.... There is no doubt that 'gamification' is an important and powerful weapon in the arsenal for learning, marketing, and behavior change of any kind. This book is a valuable guide for all who are trying to understand or adopt these important design principles. —FROM THE FOREWORD BY KEVIN KRUSE Games create engagement—the corner-stone of any positive learning experience. With the growing popularity of digital games and game-based interfaces, it is essential that gamification be part of every learning professional's tool box. In this comprehensive resource, international learning expert Karl M. Kapp reveals the value of game-based mechanics to create meaningful learning experiences. Drawing together the most current information and relevant research in one resource, *The Gamification of Learning and Instruction* shows how to create and design games that are effective and meaningful for learners. Kapp introduces, defines, and describes the concept of gamification and then dissects several examples of games to determine the elements that provide the most positive results for the players. He explains why these elements are critical to the success of learning. *The Gamification of Learning and Instruction* is based on solid research and the author includes peer-reviewed results from dozens of studies that offer insights into why game-based thinking and mechanics makes for vigorous learning tools. Not all games or gamification efforts are the same, the gamification of learning and instruction requires matching instructional content with the right game mechanics and game thinking. Moving beyond the theoretical considerations, the author explores how to design and develop gamification efforts. Kapp discusses how to create a successful game design document and includes a model for managing the entire game and gamification design process. *The Gamification of Learning and Instruction*

provides learning professional with the help they need to put the power of game design to work. Follow Karl on his widely-read Kapp Notes blog at www.kaplaneduneering.com/kappnotes/

The Gamification of Learning and Instruction Fieldbook Karl M. Kapp, 2013-11-11 Following Karl Kapp's earlier book *The Gamification of Learning and Instruction*, this Fieldbook provides a step-by-step approach to implementing the concepts from the Gamification book with examples, tips, tricks, and worksheets to help a learning professional or faculty member put the ideas into practice. The Online Workbook, designed largely for students using the original book as a textbook, includes quizzes, worksheets and fill-in-the-blank areas that will help a student to better understand the ideas, concepts and elements of incorporating gamification into learning.

Electrical Characterization of Silicon-on-Insulator Materials and Devices Sorin Cristoloveanu, Sheng Li, 2013-11-27 Silicon on Insulator is more than a technology, more than a job, and more than a venture in microelectronics; it is something different and refreshing in device physics. This book recalls the activity and enthusiasm of our SOI groups. Many contributing students have since then disappeared from the SOI horizon. Some of them believed that SOI was the great love of their scientific lives; others just considered SOI as a fantastic LEGO game for adults. We thank them all for kindly letting us imagine that we were guiding them. This book was very necessary to many people. SOI engineers will certainly be happy: indeed, if the performance of their SOI components is not always outstanding, they can now safely incriminate the relations given in the book rather than their process. Martine, Gunter, and Y. S. Chang can contemplate at last the amount of work they did with the figures. Our SOI accomplices already know how much we borrowed from their expertise and would find it indecent to have their detailed contributions listed. Jean-Pierre and Dimitris incited the book, while sharing their experience in the reliability of floating bodies. Our families and friends now realize the SOI capability of dielectrically isolating us for about two years in a BOX. Our kids encouraged us to start writing. Our wives definitely gave us the courage to stop writing. They had a hard time fighting the symptoms of a rapidly developing SOI allergy.

Integrated Learning for ERP Success Karl M. Kapp, William F. Latham, Hester Ford-Latham, 2016-04-19 The results are in. The evidence has been analyzed. Research shows that the lack of enterprise-wide training is the biggest reason for ERP implementation failures. It is the single most important precursor to achieving success. *Integrated Learning for ERP Success* is the

first resource to offer a specifically defined, comprehensive method for planning, delivering, and evaluating ERP training efforts. It even includes formulas for determining training return on investment. The Learning Requirements Planning (LRP) process presented involves a six-step enterprise-level instructional design model that when implemented correctly assures success. If you would rather have a root canal than oversee an ERP implementation, you are not alone. But like avoiding a root canal, avoiding ERP implementation only causes more pain. This book eases the implementation pain. It shows you how a formal plan for learning will increase the productivity of the ERP implementation team, shorten overall implementation time, and substantially decrease implementation costs. It also provides a discussion on how an ERP implementation can be used as a catalyst for lifelong organizational learning. Implementing an ERP system can cost three to ten times the actual software purchase price. You can't afford to waste money or time in the areas of ERP education. Integrated Learning for ERP Success shows you how to create learning-focused ERP implementations that provide substantial savings and the competitive advantage.

Visual Language for Designers Connie Malamed, 2011-10
Within every picture is a hidden language that conveys a message, whether it is intended or not. This language is based on the ways people perceive and process visual information. By understanding visual language as the interface between a graphic and a viewer, designers and illustrators can learn to inform with accuracy and power. In a time of unprecedented competition for audience attention and with an increasing demand for complex graphics, Visual Language for Designers explains how to achieve quick and effective communications. New in paperback, this book presents ways to design for the strengths of our innate mental capacities and to compensate for our cognitive limitations. Visual Language for Designers includes: —How to organize graphics for quick perception —How to direct the eyes to essential information —How

to use visual shorthand for efficient communication —How to make abstract ideas concrete —How to best express visual complexity —How to charge a graphic with energy and emotion

Learning in 3D Tony O'Driscoll, Karl M. Kapp, 2009-12-30 Praise for Learning in 3D Learning is the key to our future and powerful learning will result from immersive, interactive, and creative 3D designs. Tony O'Driscoll and Karl Kapp have written a disruptive book about a disruptive technology that we all need to explore. This is a must read! Elliott Masie, chair, The Learning CONSORTIUM Karl Kapp and Tony O'Driscoll are, amazingly, both the best theorists and practitioners in using virtual worlds in every type of educational venue. Many will love their vision, but I am more hooked on their practicality and hand-holding. Clark Aldrich, author, Learning Online with Games, Simulations, and Virtual Worlds: Strategies for Online Instruction Kapp and O'Driscoll nailed it. The right balance of case studies, theories and practical advice for any organization pursuing the use of virtual worlds for learning. If you are interested in virtual worlds for learning and collaboration, this book is for you. David A. Manning, managing partner, Performance Development Group The big contribution of Learning in 3D is that it provides research informed guidance and practical tips and techniques for using 3D virtual environments to achieve real business results...the case studies are outstanding. Lisa Clune, president, Kaplan EduNeering As the world makes its way through a period of significant change, Learning in 3D couldn't come at a better time. Today, organizations and individuals are being challenged to make the most of learning collaboratively. This book stimulates our thinking on how to maximize the impact of technology, while providing a practical blueprint with 'revolutionary' examples of how to bring a new dimension to learning. John Malitoris, regional managing director, Duke Corporate Education Tony O'Driscoll and Karl Kapp remind us that learning is the fourth dimension and the one that really counts in collaboration. A must-read for the future of learning in

environments virtual and otherwise. Cathy Davidson, Ruth F. DeVarney Professor of English at Duke University and co-director HASTAC/MacArthur Foundation Digital Media and Learning Competition.

Young Masculinities Stephen Frosh, Ann Phoenix, Rob Pattman, 2017-04-29 How do boys see themselves? Their peers? The adult world? What are their aspirations, their fears? How do they feel about their own masculinity? About style, 'race', homophobia? About football? This book examines aspects of 'young masculinities' that have become central to contemporary

social thought, paying attention to psychological issues as well as to social policy concerns. Centring on a study involving in-depth exploration, through individual and group interviews, the authors bring to light the way boys in the early years of secondary schooling conceptualise and articulate their experiences of themselves, their peers and the adult world. The book includes discussion of boys' aspirations and anxieties, their feelings of pride and loss. As such, it offers an unusually detailed set of insights into the experiential world inhabited by these boys - how they see themselves, how girls see them, what they wish for and fear, where they feel their 'masculinity' to be advantageous and where it inhibits other potential experiences. In describing this material, the authors explore questions such as the place of violence in young people's lives, the functions of 'hardness', of homophobia and football, boys' underachievement in school, and the pervasive racialisation of masculine identity construction. Young Masculinities will be invaluable to researchers in psychology, sociology, gender and youth studies, as well as to those devising social policy on boys and young men. STEPHEN FROSH is Professor of Psychology at Birkbeck College, University of London, and previously Consultant Clinical Psychologist and Vice Dean in the Child and Family Department at the Tavistock Clinic, London. He is the author of numerous academic papers and several books, including *For and Against Psychoanalysis*, *Sexual Difference: Masculinity and Psychoanalysis*, *Identity Crisis: Modernity, Psychoanalysis and the Self* and *The Politics of Psychoanalysis*. He is joint author, with Danya Glaser, of *Child Sexual Abuse* and co-editor with Anthony Elliott of *Psychoanalysis in Context*. ANN PHOENIX is Senior Lecturer in Psychology, Open University. Her books include *Standpoints and Differences* (with Karen Henwood and Chris Griffin), *Crossfires: Nationalism, Racism and Gender in Europe* (with Helma Lutz and Nira Yuval-Davies), and *Black, White or Mixed Race?* (with Barbara Tizard). ROB PATTMAN is Lecturer in Sociology at the University of Botswana. He has taught sociology

in sixth form colleges and institutions of higher education in Britain and southern Africa, and published articles on whiteness, gender identities, sex and AIDS education and social theory.

Environmental Barrier Coatings Kang N. Lee ,2020-12-29

The global increase in air travel will require commercial vehicles to be more efficient than ever before. Advanced engine hot section materials are a key technology required to keep fuel consumption and emission to a minimum in next-generation gas turbines.

Ceramic matrix composites (CMCs) are the most promising material to revolutionize gas turbine hot section materials technology because of their excellent high-temperature properties. Rapid surface recession due to volatilization by water vapor is the Achilles heel of CMCs. Environmental barrier coatings (EBCs) is an enabling technology for CMCs, since it protects CMCs from water vapor. The first CMC component entered into service in 2016 in a commercial engine, and more CMC components are scheduled to follow within the next few years. One of the most difficult challenges to CMC components is EBC durability, because failure of EBC leads to a rapid reduction in CMC component life.

Key contributors to EBC failure include recession, oxidation, degradation by calcium-aluminum-magnesium silicates (CMAS) deposits, thermal and thermo-mechanical strains, particle erosion, and foreign object damage (FOD). Novel EBC chemistries, creative EBC designs, and robust processes are required to meet EBC durability challenges. Engine-relevant testing, characterization, and lifing methods need to be developed to improve EBC reliability. The aim of this Special Issue is to present recent advances in EBC technology to address these issues. In particular, topics of interest include but are not limited to the following: • Novel EBC chemistries and designs; • Processing including plasma spray, suspension plasma spray, solution precursor plasma spray, slurry process, PS-PVD, EB-PVD, and CVD; • Testing, characterization, and modeling; • Lifing.
