Connected Empires, Connected Worlds Robert S.G. Fletcher,Benjamin Mountford,Simon J. Potter,2022-06-01 Connected Empires, Connected Worlds: Essays in Honour of John Darwin contains diverse essays on the expansion, experience, and decline of empires. The volume is offered in honour of John Darwin's contribution to the study of empire and its endings. Written by his former students and colleagues, the book's chapters discuss topics from the nineteenth, twentieth, and twenty-first centuries. While each author has contributed according to their expertise, they also reflect on how John's ideas and approaches continue to stimulate new work in disparate fields. Touching on the experience of empire in Europe, Africa, Asia and Australasia, the authors have engaged with concepts from across Darwin's writings, including his earlier work on decolonisation, 'decline', and 'the dynamics of territorial expansion'. As such, the work in this volume operates across a number of different scales of analysis: from case studies of transnational communities, state formation and military intervention, to imperial politics, inter-imperial comparison, and global historical frameworks. The chapters in this book were originally published as a special issue of The Journal of Imperial and Commonwealth History.

Empire's Labor Adam Moore,2019-11-15 In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. Empire's Labor brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited from around the world. It also, Moore demonstrates, has social, economic, and political implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of third country national (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military. Thanks to generous funding from UCLA and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellopen.org) and other repositories.

Dust Bowls of Empire Hannah Holleman,2018-11-20 A profound reinterpretation of both the Dust Bowl on the U.S. southern plains and its relevance for today The 1930s witnessed a harrowing social and ecological disaster, defined by the severe nexus of drought, erosion, and economic depression that ravaged the U.S. southern plains. Known as the Dust Bowl, this crisis has become a major referent of the climate change era, and has long served as a warning of the dire consequences of unchecked environmental despoliation. Through innovative research and a fresh theoretical lens, Hannah Holleman reexamines the global socioecological and economic forces of settler colonialism and imperialism precipitating this disaster, explaining critical antecedents to the acceleration of ecological degradation in our time. Holleman draws lessons from this period that point a way forward for environmental politics as we confront the growing global crises of climate change, freshwater scarcity, extreme energy, and soil degradation.

Empire's Mobius Strip Stephanie Malia Hom,2019-09-15 Italy's current crisis of Mediterranean migration and detention has its roots in early twentieth century imperial ambitions. Empire's Mobius Strip investigates how mobile populations were perceived to be major threats to Italian colonization, and how the state's historical mechanisms of control have resurfaced, with greater force, in today's refugee crisis. What is at stake in Empire's Mobius Strip is a deeper understanding of the forces driving those who move by choice and those who are moved. Stephanie Malia Hom focuses on Libya, considered Italy's most valuable colony, both politically and economically. Often perceived as the least of the great powers, Italian imperialism has been framed as something of colonialism lite. But Italian colonizers carried out genocide between 1929-33, targeting nomadic Bedouin and marching almost 100,000 of them across the desert, incarcerating them in camps where more than half who entered died, simply because the Italians considered their way of life suspect. There are uncanny echoes with the situation of the Roma and migrants today. Hom explores three sites, in novella-like essays, where Italy's colonial past touches down in the present: the island, the camp, and the village. Empire's Mobius Strip brings into relief Italy's shifting constellations of mobility and empire, giving them space to surface, submerge, stretch out across time, and fold back on themselves like a Mobius strip. It deftly shows that mobility forges lasting connections between colonial imperialism and neoliberal empire, establishing Italy as a key site for the study of imperial formations in Europe and the Mediterranean.

Empire's New Clothes Paul Street,2015-12-03 As Obama nears the middle of his first-term as president Paul Street assesses his performance against the expectations of his supporters. While mainstream journalists have noted discrepancies between Obama's original vision and reality, Paul Street uniquely measures Obama's record against the expectations of the truly progressive agenda many of his supporters expected him to follow. Taken together, the list of Obama's weakened policies is startling: his business-friendly measures with the economy, the lack of support for the growing mass of unemployed and poor, the dilution of his health reform agenda, the passage of a record-setting Pentagon budget, and escalation of US military violence in Afghanistan, Pakistan, Yemen, and Somalia. Street's account reveals these and many other indications of how deeply beholden Obama is to existing dominant domestic and global hierarchies and doctrines.

The Policy of the Entente Keith M. Wilson,1985-01-31 This book presents a realistic assessment of British priorities in the years before 1914.

British Concepts of Heroic "Gallantry" and the Sixties Transition Matthew J. Lord,2021-05-03 This book examines the relationship between concepts of heroic gallantry, as projected by the British honours system, and the sociocultural, political, military and international transitions of the supposed Sixties cultural revolution. In so doing, it considers how a conservative, hierarchical and state-orientated concept both evolved and endured during a period of immense change in which traditional assumptions of deference to elites were increasingly challenged. Covering the period often defined as The Long Sixties, from 1955-79, this study concentrates on four distinct transitions undergone by both state and non-state gallantry awards, including developments within the welfare state, class and gender discrimination, counterinsurgency and decolonisation. It ultimately sheds fresh light upon the importance of postwar decades to the continued evolution of concepts of gallantry and heroism in British culture using a range of underexplored government and media archives. It will be of interest to scholars, students and general researchers of heroism in modern Britain, the Sixties revolution, postwar military history and both the social and political evolution of British honours, decorations and medals.

Urban Empires Edward Glaeser,Karima Kourtit,Peter Nijkamp,2020-09-23 We live in the 'urban century'. Cities all over the world - in both developing and developed countries - display complex evolutionary patterns. Urban Empires charts the backgrounds, mechanisms, drivers, and consequences of these radical changes in our contemporary systems from a global perspective and analyses the dominant position of modern cities in the 'New Urban World'. This volume views the drastic change cities have undergone internationally through a broad perspective and considers their emerging roles in our global network society. Chapters from renowned scholars provide advanced analytical contributions, scaling applied and theoretical perspectives on the competitive profile of urban agglomerations in a globalizing world. Together, the volume traces and investigates the

economic and political drivers of network cities in a global context and explores the challenges over governance that are presented by mega-cities. It also identifies and maps out the new geography of the emergent ‘urban century’. With contributions from well-known and influential scholars from around the world, Urban Empires serves as a touchstone for students and researchers keen to explore the scientific and policy needs of cities as they become our age’s global power centers.
