CYBERCRIME VICTIMISATION Dr. V. Henry Jerome, 2021-05-26 Cyber space is used as a platform to commit many criminal activities. Due to the novel characteristics of the new cyberspace such as anonymity, inter-connectivity, ambiguity, ability to shrink time and space and expansion, crimes in it create a special process of victimisation and a special category of victims. It is in this background the readers are invited to read through the pages of this study. This study also has made an attempt to find out what happens to the victims of cybercrime in terms of impact and reporting behaviour. "This book brings out the nature of cybercrime victimisation among college students. The research is going to be very useful for all the people who are interested in reducing the number of cybercrime in their areas, especially in college campuses. I heartily appreciate the author for having ventured into such important research and for publishing it now so that the readers will learn the intricacies of cybercrime victimisation process and the ways of supporting the cybercrime victims". **Handbook of Research on Applied Social Psychology in Multiculturalism** Christiansen, Bryan,Chandan, Harish C.,2021-06-18 Social psychology is the scientific study of how the thoughts, feelings, and behaviors of individuals are influenced by the actual, imagined, and implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method, while the terms thoughts, feelings, and behaviors refer to the psychological variables that can be measured in humans. Moreover, the notion that the presence of others may be imagined or implied suggests that humans are malleable to social influences even

when alone, such as when watching videos or quietly appreciating art. In such situations, people can be influenced to follow internalized cultural norms. Social psychology deals with social influence, social perception, and social interaction. The research in this field deals with what shapes our attitudes and how we develop prejudice. The Handbook of Research on Applied Social Psychology in Multiculturalism explores social psychology within the context of multiculturalism and the way society deals with cultural diversity at national and community levels. It will cover major topics of social psychology such as group behavior, social perception, leadership, non-verbal behavior, conformity, aggression, and prejudice. This book will deal with social psychology with a direct focus on how different cultures can coexist peacefully by preserving, respecting, and even encouraging cultural diversity, along with a focus on the psychology that is hindering these efforts. This book is essential for researchers in social psychology and the social sciences, activists, psychologists, practitioners, researchers, academicians, and students interested in how social psychology interacts with multiculturalism.

*Global Perspectives on Press Regulation, Volume 2* Paul Wragg, András Koltay, 2024-02-22 In this ground-breaking two-volume set, world-leading experts produce a rich, authoritative depiction of the world's press, its freedom, and its limits. We want press freedom but we also want freedom from the press. A powerful press may expose corrupt government or aid it. It may champion citizens or

unfairly attack them. A vulnerable press may lack supporters and succumb to conformity. It may resist, and overcome tyranny. According to common belief, press freedom involves social responsibilities to equip public debate and render government transparent. Is this attitude valid given that the press is usually a private, commercial actor? Globally, the health, authority, and viability of the press varies dramatically. These patterns do not conform to traditional divisions between North and South, East and West. Instead, they are much more complex. How do we measure successful press regulation? What concessions can the state and/or society demand of the press? What constitutes the irreducible core of press freedom? The contributions in Volume 1 look at key jurisdictions in Europe; whereas Volume 2 goes beyond Europe to analyse the situation in key jurisdictions in Asia, Africa, the Americas and Oceania. Each volume can be used independently or as part of the complete set. This work will be incredibly valuable to policy makers and academics who seek to capture the global picture for the purposes of effecting change.

Tech Panic Robby Soave, 2024-04-02 From award-winning journalist and author of the “methodical, earnest, and insightful” (The Guardian) *Panic Attack*, an examination of recent kneejerk calls to regulate Big Tech from both sides of the aisle. Not so long ago, we embraced social media as a life-changing opportunity to connect with friends and family all across the globe. Today, the pendulum of public opinion is swinging in the opposite direction as Facebook, Twitter, Google, YouTube, Instagram, TikTok, and similar sites are being accused of corrupting our democracy, spreading disinformation, and fanning the flames of hatred. We once marveled at the revolutionary convenience of ordering items online and having them show up on our doorsteps overnight. Now we fret about Amazon outsourcing our jobs overseas or

building robots to do them for us. With insightful analysis and in-depth research, Robby Soave offers “a refreshing dose of sanity and common sense about big tech” (David French, author of *Divided We Fall*) and explores some of the biggest issues animating both the right and the left: bias, censorship, disinformation, privacy, screen addiction, crime, and more. Far from polemical, *Tech Panic* is grounded in interviews with insiders at companies like Facebook and Twitter, as well as expert analysis by both tech boosters and skeptics—from Mark Zuckerberg to Josh Hawley. You will learn not just about the consequences of Big Tech, but also the consequences of altering the ecosystem that allowed tech to get big. Offering a fresh and crucial perspective on one of the biggest influences of the 21st century, Soave seeks to stand athwart history and yell, Wait, are we sure we really want to do this?
