Epic Measures Jeremy N. Smith, 2015-04-07 Moneyball meets medicine in this remarkable chronicle of one of the greatest scientific quests of our time and the visionary mastermind behind it. Medical doctor and economist Christopher Murray began the Global Burden of Disease study to gain a truer understanding of how we live and how we die. While it is one of the largest scientific projects ever attempted—as breathtaking as the first moon landing or the Human Genome Project—the questions it answers are meaningful for every one of us: What are the world's health problems? Who do they hurt? How much? Where? Why? Murray argues that the ideal existence isn't simply the longest, but the one lived well and with the least illness. Until we can accurately measure global health issues, we cannot understand what makes us sick or do much to improve it. Challenging the accepted wisdom of the WHO and the UN, the charismatic and controversial health

maverick has made enemies—as well as some influential friends, including Bill Gates who gave Murray a \$100 million grant. Told with novelistic verve by acclaimed journalist Jeremy N. Smith, the story of Murray's lifelong determination to understand how we live and die encompasses wars and famines, presidents and activists, billionaires and billions of people worldwide living in poverty. It shows the human side of scientific revolutions and of revolutionary scientists—their breakthroughs and setbacks, their genius and their flaws, their champions and their critics—as they strive to bring the news of their findings to the world. This transformational effort is far from over, but the story of its genesis and impact is already an epic tale.

*System Failure* Joe Zieja, 2019-09-17 War is spreading through the galaxy—and it's becoming abundantly clear that there's an outside force at play in this explosive and hilarious new installment of the Epic Failure series that reads like Catch-22 meets David Weber. With the galaxy thrown into chaos by mutual breaches of the Two Hundred Years' peace, what seemed like an isolated incident on the Thelicosas/Merida border has become an epidemic. In the midst of this chaos, the Thelicosan and Meridan fleets on their respective borders have come to a sort of tense peace after the events in Book II but now it's clear: somebody wants war. And it's not the Free Systems of the galaxy. No. It's a mom-and-pop convenience store gone galactic. It's the purveyors of balloons and nachos and supplies for bowling lanes. It's the company that made the droids and a large part of the technology that all of the Free Systems are using in their militaries. It's Snaggardirs. And they want to snag it all.

Initiating the Communication Lucia Spicuzza, 2016 In 2006, McKesson Technologies sued Epic Systems for inducing infringement of its `898 patent by licensing MyChart software to healthcare providers. The McKesson `898 patented invention allows patients, doctors, and healthcare providers to access an

interactive communication system through a cloud-based platform that contains a personalized web page with useful information about and for each patient. Epic's MyChart is a software program licensed to healthcare providers: these providers can choose whether to offer MyChart software as an option for their patients, and patients can decide to communicate with the provider by logging on to the healthcare provider's MyChart web page. Although the parties settled the suit, this case study invites students to consider the issues raised.
