And We Came Outside and Saw the Stars Again Ilan Stavans, 2020-08-11 In this rich, eye-opening, and uplifting digital anthology, dozens of esteemed writers, poets, and artists from more than thirty countries send literary dispatches from life during the pandemic. Net proceeds benefit booksellers in need. As our world is transformed by the coronavirus pandemic, writers offer a powerful antidote to the fearful confines of isolation: a window onto lives and corners of the world beyond our own. In Mauritius, a journalist contends with denialism and mourns the last days of summer, lost to the lockdown. In Paris, a writer struggles to protect his young son from fear. In Chile, protesters who prevailed against tear gas and rubber bullets are now halted by a virus. In Queens, after thirteen-hour shifts in the ER, a doctor dons running shoes and makes the long jog home. And We Came Outside and Saw the Stars Again takes its title from the last line of Dante's *Inferno*, when the poet and his guide emerge from hell to once again behold the beauty of the heavens. In that spirit, the stories, essays, poems, and artwork in this collection--from beloved authors including Jhumpa Lahiri, Mario Vargas Llosa, Eavan Boland, Daniel Alarcón, Jon Lee Anderson, Claire Messud, Ariel Dorfman,

and many more--detail the harrowing experiences of life in the pandemic, while pointing toward a less isolated future. Together, they comprise a profound global portrait of the defining moment of our time, and send a clarion call for solidarity across borders. Our literary culture depends on bookstores--and those irreplaceable sources of conversation and community, of inspiration and solace, have been decimated by the lockdown. Net proceeds from *And We Came Outside and Saw the Stars Again* will go to the Book Industry Charitable Foundation, which helps the passionate booksellers we readers depend upon.

Practical Augmented Reality Steve Aukstakalnis, 2016-09-08 The most comprehensive and up-to-date guide to the technologies, applications and human factors considerations of Augmented Reality (AR) and Virtual Reality (VR) systems and wearable computing devices. *Practical Augmented Reality* is ideal for practitioners and students concerned with any application, from gaming to medicine. It brings together comprehensive coverage of both theory and practice, emphasizing leading-edge displays, sensors, and DIY tools that are already available commercially or will be soon. Beginning with a Foreword by NASA research scientist Victor Luo, this guide begins by explaining the mechanics of human sight, hearing and touch, showing how these perceptual mechanisms (and their performance ranges) directly dictate the design and use

of wearable displays, 3-D audio systems, and tactile/force feedback devices. Steve Aukstakalnis presents revealing case studies of real-world applications from gaming, entertainment, science, engineering, aeronautics and aerospace, defense, medicine, telerobotics, architecture, law enforcement, and geophysics. Readers will find clear, easy-to-understand explanations, photos, and illustrations of devices including the Atheer AiR, HTC Vive, DAQRI Smart Helmet, Oculus (Facebook) CV1, Sony PlayStation VR, Vuzix M300, Google Glass, and many more. Functional diagrams and photographs clearly explain how these devices operate, and link directly to relevant theoretical and practical content. Practical Augmented Reality thoroughly considers the human factors of these systems, including sensory and motor physiology constraints, monocular and binocular depth cues, elements contributing to visually-induced motion sickness and nausea, and vergence–accommodation conflicts. It concludes by assessing both the legal and societal implications of new and emerging AR, VR, and wearable technologies as well as provides a look next generation systems.

Adoption of Innovation Alexander Brem, Éric Viardot, 2015-04-10 This edited volume brings together academics from both innovation and marketing fields to explore the additional value for companies that can be generated with the innovations in marketing and the marketing of innovations. If ideas need to reach the marketplace, then marketing strategies, concepts and tools - such as the continuous development of new product and services - become vital for their success. On the other hand, marketing management is influenced by innovation as illustrated by the way social media and Internet have revolutionized the traditional marketing-mix. Such linkages between innovation and marketing research need to be much stronger as companies have to convince internal and external stakeholders to achieve successful innovation strategies. State-of-the-art research output from different perspectives would suit the needs of a researcher as well as the company CEO alike.

Liver Transplantation and Hepatobiliary Surgery Umberto Cillo, Luciano De Carlis, 2020 In the past, liver resections and liver transplantations were performed by different surgical teams, with very little interplay between the

two. However, the evolution toward more complex operations called for an increasingly intense interaction between these surgical techniques: split liver and living donor liver transplantation have become popular in the transplant community, utilizing the Couinaud segmental anatomy in a very sophisticated way, while portal and arterial resection and reconstruction have become indispensable methods for treating Klatskin tumors infiltrating the hepatic hilum. This book offers a complete overview of the connections between liver transplantation and hepatobiliary surgery. It focuses on ex situ techniques for resection of tumors at the suprahepatic confluence, with or without venous reconstruction, and on total vascular exclusion of the liver with the aid of a venovenous bypass that should be a surgical option for referral centers in hepatopancreatobiliary surgery. By taking into consideration the development of minimally invasive liver surgery, it will introduce readers to a variety of new perspectives such as: vascular exclusion techniques with or without extracorporeal circulation, hemodynamic implications and lessons learned from liver transplant surgery, and technical details on pediatric transplantation and its informative role in modern biliary tract surgery. .

Now, Debbie deepens our shadow work and shows how our shadow side holds the key to our happiness. Each of us has a shadow that whispers stories of our own self-defeating fears
