Magnetic Resonance and Its Applications Vladimir I. Chizhik, Yuri S. Chernyshev, Alexey V. Donets, Vyacheslav V. Frolov, Andrei V. Komolkin, Marina G. Shelyapina, 2014-04-08 The book is devoted to the description of the fundamentals in the area of magnetic resonance. The book covers two domains: radiospectroscopy and quantum radioelectronics. Radiospectroscopy comprises nuclear magnetic resonance , electron paramagnetic resonance, nuclear quadrupolar resonance, and some other phenomena. The radiospectroscopic methods are widely used for obtaining the information on internal (nano, micro and macro) structure of objects. Cinematic Cold War Tony Shaw, Denise J. Youngblood, 2014-08-15 The Cold War was as much a battle of ideas as a series of military and diplomatic confrontations, and movies were a prime battleground for this cultural combat. As Tony Shaw and Denise Youngblood show, Hollywood sought to export American ideals in movies like Rambo, and the Soviet film industry fought back by showcasing Communist ideals in a positive light, primarily for their own citizens. The two camps traded cinematic blows for more than four decades. The first book-length comparative survey of cinema's vital role in disseminating Cold War ideologies, Shaw and Youngblood's study focuses on ten films—five American and five Soviet—that in both obvious and subtle ways provided a crucial outlet for the global debate between democratic and communist ideologies. For each nation, the authors outline industry leaders, structure, audiences, politics, and international reach and explore the varied relationships linking each film industry to its respective government. They then present five comparative case studies, each pairing an American with a Soviet film: Man on a Tightrope with The Meeting on the Elbe; Roman Holiday with Spring on Zarechnaya

Street; Fail-Safe with Nine Days in One Year; Bananas with Officers; Rambo: First Blood Part II with Incident at Map Grid 36-80. Shaw breathes new life into familiar American films by Elia Kazan and Woody Allen, while Youngblood helps readers comprehend Soviet films most have never seen. Collectively, their commentaries track the Cold War in its entirety—from its formative phase through periods of thaw and self-doubt to the resurgence of mutual animosity during the Reagan years—and enable readers to identify competing core propaganda themes such as decadence versus morality, technology versus humanity, and freedom versus authority. As the authors show, such themes blurred notions regarding propaganda and entertainment, terms that were often interchangeable and mutually reinforcing during the Cold War. Featuring engaging commentary and evocative images from the films discussed, Cinematic Cold War offers a shrewd analysis of how the silver screen functioned on both sides of the Iron Curtain. As such it should have great appeal for anyone interested in the Cold War or the cinematic arts.

Losing Military Supremacy Andrei Martyanov, 2018-06-04 Marytanov explains why and how the US armed forces have lost the military supremacy they thought they once had and how Russia, which supposedly had been defeated in the Cold War, succeeded not only in catching up with USA, but actually surpassing it in many key domains such as long range cruise missiles, diesel-electric submarines, air defenses, electronic warfare, air superiority and many others. Andrei Martyanov's book is an absolute 'must read' for any person wanting to understand the reality of modern warfare and super-power competition. THE SAKER While exceptionalism is not unique to America, the intensity of their conviction and its global ramifications are. This view of its exceptionalism has led the US to grossly misinterpret—sometimes deliberately—the causative factors of key events of the past two centuries. Accordingly, the wrong conclusions have been derived, and very wrong lessons learned. Nowhere has this been more manifest than in American military thought and its actual application of military power. Time after time the American military has failed to match lofty declarations about its superiority, producing instead a mediocre record of military accomplishments. Starting from the Korean War the United States hasn't won a single war against a technologically inferior, but mentally tough enemy. The technological dimension of American "strategy" has completely overshadowed any concern with the social, cultural, operational and even tactical requirements of military (and political) conflict. With a new Cold War with Russia emerging, the United States enters a new period of geopolitical turbulence completely unprepared in any meaningful way—intellectually, economically, militarily or culturally—to face a reality which was hidden for the last 70+ years behind the curtain of never-ending Chalabi moments and a strategic delusion concerning Russia, whose history the US viewed through a Solzhenitsified caricature kept alive by a powerful neocon lobby, which even today dominates US policy makers' minds. Martyanov's former Soviet military background enables deep insight into the fundamental issues of warfare and military power as a function of national power—assessed correctly, not through the lens of Wall Street "economic" indices and a FIRE economy, but through the numbers of enclosed technological cycles and culture, much of which has been shaped in Russia by continental warfare and which is practically absent in the US.
