Science, Technology, and National Policy Thomas Kuehn,Alan L. Porter,2019-06-30 Science, Technology, and National Policy is the first collection of essays to deal with technology as it relates to, and is influenced by, public policy-making. Bringing together twenty-five of the most significant papers on this topic, the editors seek to provide a broad perspective, to sample the full spectrum of core concerns in technology policy, and to stimulate critical thinking. Part One treats the social, political, economic, and international concerns that affect technology policy. Part Two examines how different government institutions deal with technology, including the federal executive, Congress, courts, and state and local governments. Ideal for professional and course use, this volume offers an excellent framework for discussing and coming to terms with these complex issues.

Our Media, Not Theirs Robert W. McChesney,John Nichols,2011-01-04 Our Media, Not Theirs! The Democratic Struggle Against Corporate Media examines how the current media system in the United States undermines democracy, and what we can do to change it. McChesney and Nichols begin by detailing how the media system has come to be dominated by a handful of transnational conglomerates that use their immense political and economic power to saturate the population with commercial messages. Further, the authors provide an analysis of the burgeoning media reform activities in the United States, and outline ways we can structurally change the media system through coalition work and movement-building: the tools we need in order to battle for a better media.

The European Handbook of Media Accountability Tobias Eberwein,Susanne Fengler,Matthias Karmasin,2017-11-08 In recent years, the Leveson Inquiry in Great Britain, as well as the EU High-Level Group on Media Freedom and Pluralism, have stirred heated debates about media accountability and media self-regulation across Europe. How responsible are journalists? How well-developed are infrastructures of media self-regulation in the different European countries? How much commitment to media accountability is there in the media industry – and how actively do media users become involved in the process of media criticism via social media? With contributions from leading scholars in the field of journalism and mass communication, this handbook brings together reports on the status quo of media accountability in all EU members states as well as key countries close to Europe, such as Turkey and Israel. Each chapter provides an up-to-date overview of media accountability structures as well as a synopsis of relevant research, exploring the role of media accountability instruments in each national setting, including both media self-regulation (such as codes of ethics, press councils, ombudspersons) and new instruments that involve audiences and stakeholder groups (such as media blogs and user comment systems). A theoretically informed, cross-national comparative analysis of the state of media accountability in contemporary Europe, this handbook constitutes an invaluable basis for further research and policy-making and will appeal to students and scholars of media studies and journalism, as well as policy-makers and practitioners.

Buddhism, the Internet, and Digital Media Gregory Price Grieve,Daniel Veidlinger,2014-09-19 Buddhism, the Internet and Digital Media: The Pixel in the Lotus explores Buddhist practice and teachings in an increasingly networked and digital era. Contributors consider the ways Buddhism plays a role and is present in digital media through a variety of methods including concrete case studies, ethnographic research, and content analysis, as well as interviews with practitioners and cyber-communities. In addition to considering Buddhism in the context of technologies such as virtual worlds, social media, and mobile devices, authors ask how the Internet affects identity, authority and community, and what effect this might have on the development, proliferation, and perception of Buddhism in an online environment. Together, these essays make the case that studying contemporary online Buddhist practice can provide valuable insights into the shifting role religion plays in our constantly changing, mediated, hurried, and uncertain culture.

Language, Identity and Cycling in the New Media Age Patrick Kiernan, 2017-09-21 This book examines how identities associated with cycling are evoked, narrated and negotiated in a media context dominated by digital environments. Arguing that the nature of identity is being impacted by the changing nature of the material and semiotic resources available for making meaning, the author introduces an approach to exploring such identity positioning through the interrelated frameworks of Systemic Functional Linguistics and Multimodal Analysis, and illustrates how this happens in practice. The book is divided into three parts, each of which focuses on a different aspect of identity and media environment. Part I considers celebrity identities in the conventional media of print and television. Part II investigates community and leisure / sporting identity through an online cycling forum, while Part III examines corporate identity realised through corporate websites, consumer reviews and Youtube channels. This unique volume will appeal to students and scholars of discourse analysis, applied linguistics and the world of cycling.

Inside Lightroom 2 Richard Earney, 2012-11-12 If you're comfortable using the basic features of Lightroom, but really want to push the envelope with this powerful software, 'Inside Lightroom' by acclaimed photographer and Lightroom Beta-tester Richard Earney is a must-have. Bypassing the obvious features covered in a variety of existing Lightroom books, Richard focuses on customizing Lightroom to suit your workflow. For example, he covers using presets to automate the way Lightroom deals with photos, optimizing your Lightroom workflow for your own hardware and preferences. He covers sophisticated calibration techniques, helping you render your pictures accurately both onscreen and in print. Basically -- the hidden information for this powerful software. Unlike the other 'guides' on the market, this book doesn't tell you what you already know. Instead, it focuses on what you don't. 'Inside Lightroom' also showcases the brand-new features of the software, available only in Lightroom 2.0, so if you have recently upgraded from Lightroom 1, this book will help you reap the benefits of your investment. Practical, jargon-free and full of stunning images, Richard Earney's book should be on the shelf of every Lightroom user.

The Routledge Companion to Media and Poverty Sandra L. Borden, 2021-07-19 Comprehensive and interdisciplinary, this collection explores the complex, and often problematic, ways in which the news media shapes perceptions of poverty. Editor Sandra L. Borden and a diverse collection of scholars and journalists question exactly how the news media can reinforce (or undermine) poverty and privilege. This book is divided into five parts that examine philosophical principles for reporting on poverty, the history and nature of poverty coverage, problematic representations of people experiencing poverty, poverty coverage as part of reporting on public policy and positive possibilities for poverty coverage. Each section provides an introduction to the topic, as well as a broad selection of essays illuminating key issues and a Q&A with a relevant journalist. Topics covered include news coverage of corporate philanthropy, structural bias in reporting, representations of the working poor, the moral demands of vulnerability and agency, community empowerment and citizen media. The book's broad focus considers media and poverty at both the local and global levels with contributors from 16 countries. This is an ideal reference for students and scholars of media, communication and journalism who are studying topics involving the media and social justice, as well as journalists, activists and policy makers working in these areas.
