Sensitivity Analysis: Matrix Methods in Demography and Ecology Hal Caswell, 2019-04-02 This open access book shows how to use sensitivity analysis in demography. It presents new methods for individuals, cohorts, and populations, with applications to humans, other animals, and plants. The analyses are based on matrix formulations of age-classified, stage-classified, and multistate population models. Methods are presented for linear and nonlinear, deterministic and stochastic, and time-invariant and time-varying cases. Readers will discover results on the sensitivity of statistics of longevity, life disparity, occupancy times, the net reproductive rate, and statistics of Markov chain models in demography. They will also see applications of sensitivity analysis to population growth rates, stable population structures, reproductive value, equilibria under immigration and nonlinearity, and population cycles. Individual stochasticity is a theme throughout, with a focus that goes beyond expected values to include variances in demographic outcomes. The calculations are easily and accurately implemented in matrix-oriented programming languages such as Matlab or R. Sensitivity analysis will help readers create models to predict the effect of future changes, to evaluate policy effects, and to identify possible

evolutionary responses to the environment. Complete with many examples of the application, the book will be of interest to researchers and graduate students in human demography and population biology. The material will also appeal to those in mathematical biology and applied mathematics.

Family secrets and school secrets entwine in an engaging new novel from the author of *You Remind Me of You*, and *Splintering*. Sometimes when life haunts you, you're better off becoming the ghost. Emil Simon feels invisible enough. He counts as a nonentity at his elite preparatory school and makes barely a dent in his father's thoughts. When his older brother runs away, he entrusts Emil with a master key to Caramoor Academy. Soon Emil is sneaking into the school at night to explore ... and falling for a faculty daughter who sneaks in for reasons of her own. This is a novel about living with disappearances... and willing yourself to appear.

Samuel Mockbee and the Rural Studio Samuel Mockbee,2003 The architect and teacher Samuel Mockbee, founder of Auburn University's Rural Studio, was an idealist who put into action one of the boldest programs in contemporary architecture. Mockbee led his students in the design and construction of homes, community centers and other essential structures in Hale County, Alabama--one of the poorest counties in the United States. Mockbee believed that architecture could play a determining role in combating the brutalities of poverty. He inspired students to create vanguard designs and utilize an array of innovative, cost-effective building materials that included scraps of carpet baled into rectangular building blocks. This combination of ingenuity and enterprise informed the unique character of Mockbee's undertaking. *Samuel Mockbee and the Rural Studio* appraises Mockbee's unique contribution, assessing how he believed that architecture, practiced as a community-oriented undertaking, could transform

the social environment.
