Diverse Beauty Alexi Lubomirski,2016 England-born, New York-based photographer Alexi Lubomirski has become an established name within the fashion industry, shooting for such publications as Harper's Bazaar, Vogueand GQ, and working with cover stars such as Charlize Theron, Gwyneth Paltrow, Natalie Portman, Jennifer Lopez and Nicole Kidman, to name but a few. It was after shooting Lupita Nyong'o, however, that Lubomirski was struck by the homogeneity of the subjects he'd been hired to shoot professionally. Often when he submitted a list of models he was interested in shooting, responses would range along the lines of we love her, but..., her hair is a problem, she is too dark or she is too light to make a statement. In Diverse Beauty, Lubomirski aims to move beyond the underrepresentation of women from a range of ethnicities in fashion media. The volume compiles his photographs of beautiful women of every color, size, age and sexual orientation in a celebration of beauty that adds dimension to the standards so omniscient in Western fashion magazines and advertisements. This handsome volume of cinematic fashion portraiture--featuring such subjects as Lupita Nyong'o, Rashida Jones, Salma Hayek, Demi Lovato, Anja Rubik, Jennifer Lopez, Chanel Iman, Hari Nef, Isabella Rossellini, Tyra Banks and Rosie Huntington-Whiteley, among many others--is also a small step in the direction of changing societal norms.

MECHANICAL ENGINEERING, ENERGY SYSTEMS AND SUSTAINABLE DEVELOPMENT -Volume V Konstantin V. Frolov,Oleg N. Favorsky, R.A. Chaplin and Christos Frangopoulos,2009-04-15 Mechanical Engineering, Energy Systems and Sustainable Development theme is a component of Encyclopedia of Physical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Mechanical Engineering, Energy Systems and Sustainable Development with contributions from distinguished experts in the field discusses mechanical engineering - the generation and application of heat and mechanical power and the design, production, and use of machines and tools. These five volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.

**Experimental Analysis of Nano and Engineering Materials and Structures** E.E. Gdoutos,2007-12-06 This volume contains two-page abstracts of the 482 papers presented at the latest conference on the subject, in Alexandroupolis, Greece. The accompanying CD contains the full length papers. The abstracts of the fifteen plenary lectures are included at the beginning of the book. The remaining 467 abstracts are arranged in 23 tracks and 28 special symposia/sessions with 225 and 242 abstracts, respectively. The papers of the tracks have been contributed from open call, while the papers of the symposia/sessions have been solicited by the respective organizers.

**Mayoral Collaboration under Nazi Occupation in Belgium, the Netherlands and France, 1938-46** Nico Wouters,2016-09-26 This book explores the role of mayors in navigating the realities of living and governing under Nazi occupation. In Western Europe under Nazi occupation, mayors of villages and cities were forced into strategic cooperation with the occupier. Mayors had to provide good governance, mediate between occupier and populations, maintain personal legitimacy, and build local consensus. However, as national systems underwent authoritarian reform and collaborationists infiltrated administrations, local governments were gradually turned into instruments of Nazi control and repression. Nico Wouters uses rich new archival data to compare the realities of local government in three countries. Looking at topics such as food supply, public order and safety, forced labour, the repression of resistance, the persecution of the Jews and post-war purges, this book redefines our knowledge of collaboration, resistance and accommodation during Nazi occupation.

**The Virtual Fields Method** Fabrice Pierron,Michel Grédiac,2012-03-21 The Virtual Fields Method: Extracting Constitutive Mechanical Parameters from Full-field Deformation Measurements is the first and only one on the Virtual Fields Method, a recent technique to identify materials mechanical properties from full-field measurements. It contains an extensive theoretical description of the method as well as numerous examples of application to a wide range of materials (composites, metals, welds, biomaterials etc.) and situations(static, vibration, high strain rate etc.). Finally, it contains a detailed training section with examples of progressive difficulty to lead the reader to program the VFM. This is accompanied with a set of commented Matlab programs as well as with a GUI Matlab based software for more general situations.

*Residual Stress, Thermomechanics & Infrared Imaging and Inverse Problems, Volume 6* Antonio Baldi,Sharlotte L. B. Kramer,Fabrice Pierron,John Considine,Sven Bossuyt,Johan Hoefnagels,2020-01-22 Residual Stress, Thermomechanics & Infrared Imaging and Inverse Problems, Volume 6 of the Proceedings of the 2019 SEM Annual Conference & Exposition on Experimental and Applied Mechanics, the sixth volume of six from the Conference, brings together contributions to this important area of research and engineering. The collection presents early findings and case studies on a wide range of areas, including: Test Design and Inverse Method Algorithms Inverse Problems: Virtual Fields Method Residual Stresses: Measurement, Uncertainty & Validation Residual Stresses: Eigenvalues, Modeling, & Crack Growth Material Characterizations Using Thermography Fatigue, Damage & Fracture Evaluation Using Infrared Thermography

**Molecular Plant Breeding** Yunbi Xu,2010 Recent advances in plant genomics and molecular biology have revolutionized our understanding of plant genetics, providing new opportunities for more efficient and controllable plant breeding. Successful techniques require a solid understanding of the underlying molecular biology as well as experience in applied plant breeding. Bridging the gap between developments in biotechnology and its applications in plant improvement, Molecular Plant Breeding provides an integrative overview of issues from basic theories to their applications to crop improvement including molecular marker technology, gene mapping, genetic transformation, quantitative genetics, and breeding methodology.

*Belgian Cinema* Marianne Thys,Cinémathèque royale de Belgique,1999 The recent centenary of the motion picture prompted the Belgian Royal Film Archive to compile an encyclopedia of the history of Belgian film. The country has produced a considerable cinematic output over the past hundred years, with a total of some 1,500 titles, including every imaginable genre, from documentaries to war films, romantic dramas, slapstick, animation, art movies and experimental films. This book is published in collaboration with the Royal Film Archive. The book contains a broad survey of 100 years of Belgian cinema history, from masterpieces of silent filmmaking to recent highlights like the 1992 film Daens. This comprehensive, easy-to-use, and attractively illustrated reference work is an important scholarly addition to all serious film libraries.

*Human Ressources for Startups* Willy Braun,2019-03-28 HR For Startups is a book designed for founders, managers, and investors of fast-growing companies. Based on extended interviews of 30+ experts, co-founders, CHROs, headhunters, CEOs, COOs, coaches, and VCs, it offers concrete tools and frameworks to put in place in a startup or scaleup. The book also provides several concepts and references to think about the different HR challenges and design the best solutions. Human resources doctrine needs to be fully tailored to a specific company, its industry, its people, and its DNA. Somebody's solution may become your problem and your flawed policy could become somebody's solution. The conclusion could be paralysis: if there is no one-size-fits-all solution, why bother looking for answers? What became my conviction is different: you cannot rely on ready-to-install procedures, but you can learn from principles, from mistakes and successes to design your own solution.

**Craniofacial Anomalies** Rebecca A. Eder,1995-04-27 Developmental Perspectives on Craniofacial Problems presents a developmental approach to psychological research on craniofacial anomalies. Craniofacial anomalies represent one of the most commonly occurring birth defects, and although recent surgical advances have been substantial, little has changed in over forty years with regard to the assumption that facial disfigurement must result in psychological problems. This book advances current understanding of the psychological impact of craniofacial anomalies by reevaluating the prevailing view in light of the most current

perspectives and findings in developmental psychology. Distinguished scholars have applied their expertise in social, emotional, and personality development to understanding the psychological development of children with craniofacial anomalies, covering a wide range of topics in developmental psychology.

**Charte des droits fondamentaux de l'Union européenne** Fabrice Picod,Sébastien van Drooghenbroeck,2017-12-21 Le 1er décembre 2009, entré en vigueur le traité de Lisbonne. Par ce biais, la Charte des droits fondamentaux acquiert la valeur contraignante pleine et entière dont elle s’était vu initialement privée lors de sa proclamation par le Parlement européen, le Conseil et la Commission, le 7 décembre 2000. En moins de vingt années, l’application de la Charte a conduit à la production d’une jurisprudence abondante et complexe, tant à l’égard des droits et libertés qu’elle consacre – songeons par exemple au principe non bis idem, à la matière de la protection des données à caractère personnel, ou encore à l’interdiction des discriminations –, qu’en lien avec les clauses transversales qui en gouvernent l’interprétation et la mise en œuvre : délimitation de son invocabilité vis-à-vis des actes étatiques, lien avec la Convention européenne des droits de l’Homme et articulation avec la protection constitutionnelle des droits et libertés. Une synthèse de cet acquis, et des perspectives qu’il laisse entrevoir, a paru utile, voire indispensable. Le présent ouvrage s’y emploie sous la forme d’un commentaire article par article, systématique, de la Charte des droits fondamentaux de l’Union européenne du 7 décembre 2000, telle qu’adaptée le 12 décembre 2007 à Strasbourg, à laquelle l’article 6 du traité sur l’Union européenne confère la même valeur juridique que les traités constitutifs. Chaque commentaire intègre les références doctrinales et jurisprudentielles les plus récentes et les plus pertinentes sur les sujets traités, et opère les renvois aux autres instruments de protection des droits de l’Homme susceptibles d’offrir un éclairage à la Charte. Issu des efforts conjugués d’une équipe franco-belge, cet ouvrage croise les regards des universitaires, des chercheurs et des praticiens, à l’image du public auquel il est destiné.

The Original Bondage Fairies Kondom,2006-07-12 The story continues...The Bondage Fairies are called Hunters. They have to be at least 100 years old to become a Hunter and are caretakers of the forest. It is their duty to protect and nurture all the little critters in the woods be it mammal, fowl, reptilian, or insectoid. Meet Pamila and Pfil. These two horny little Bondage Fairies have no restraint and along with their care for all-things-natural usually wind up having crazy wild sex with all the creatures of the woods including themselves. In this volume...3 evil fairies have given imprisoned Pfil a powerful aphrodisiac to sexually torture our favorite fairie girl. It is here that Pfil finds a new friend in a male fairie that helps Pfil get through her insanely lustful ordeal. Meanwhile Pamila is off in another part of the forest making it with a bat. If she only knew how much Pfil needed her help right now. Creator Kondom brings us into his fetishistic world of love, lusty graphic sex, and two darn cute little fairies.

**Industrial Mathematics** C. R. MacCluer,2000 This book provides a concise, single-source survey of all the mathematics most useful in industry today-- particularly modeling and the unit \$. Each chapter begins with a brief review of some relevant mathematics; then introduces the industrial extension of this same material via typical real-world applications. The power of interweaving analytic with computing methods during problem solving is demonstrated throughout and MATLAB code is integrated into the flow of the narrative. A chapter on Technical Writing--covering formal technical reports, memos, progress reports, executive summaries, problem statements, overhead projector presentations--shows how to best present mathematical data in a variety of situations. Statistical Reasoning. Monte Carlo Methods. Data Acquisition and Manipulation. The Discrete Fourier Transform. Linear Programming. Regression. Cost Benefit Analysis. Microeconomics. Ordinary Differential Equations. Frequency Domain Methods. Partial Differential Equations. Divided Differences. Galerkin's Method. Splines. A handbook or reference for Engineers, Project Managers, Mathematical Consultants, Statisticians for a quick study of mathematical issues that may arise in the workplace.

Behavioral Inhibition Koralý Pérez-Edgar,Nathan A. Fox,2018-09-22 This book examines three decades of research on behavioral inhibition (BI), addressing its underlying biological, psychological, and social markers of development and functioning. It offers a theory-to-practice overview of behavioral inhibition and explores its cognitive component as well as its relationship to shyness, anxiety, and social withdrawal. The volume traces the emergence of BI during infancy through its occurrences across childhood. In addition, the book details the biological basis of BI and explores ways in which it is amenable to environmental modeling. Its chapters explore the neural systems underlying developmental milestones, address lingering questions (e.g., limitations of studying BI in laboratory settings and debatable benefits of self-regulatory processes), and provide recommendations for future research. Key areas of coverage include: Animal models of behavioral inhibition. Social functioning and peer relationships in BI. Attention mechanisms in behavioral inhibition. BI and associative learning of fear. Behavioral inhibition and prevention of internalizing distress in early childhood. The relations between BI, cognitive control, and anxiety. Behavioral Inhibition is a must-have resource for researchers, clinicians, scientist-practitioners, and graduate students across such fields as developmental psychology, psychiatry, social work, cognitive and affective developmental neuroscience, child and school psychology, educational psychology, and pediatrics.
