Optical and Wireless Convergence for 5G Networks Abdelgader M. Abdalla,Jonathan Rodriguez,Issa Elfergani,Antonio Teixeira,2019-10-07

The mobile market has experienced unprecedented growth over the last few decades. Consumer trends have shifted towards mobile internet services supported by 3G and 4G networks worldwide. Inherent to existing networks are problems such as lack of spectrum, high energy consumption, and inter-cell interference. These limitations have led to the emergence of 5G technology. It is clear that any 5G system will integrate optical communications, which is already a mainstay of wide area networks. Using an optical core to route 5G data raises significant questions of how wireless and optical can coexist in synergy to provide smooth, end-to-end communication pathways. Optical and Wireless Convergence for 5G Networks explores new emerging technologies, concepts, and approaches for seamlessly integrating optical-wireless for 5G and beyond. Considering both fronthaul and backhaul perspectives, this timely book provides insights on managing an ecosystem of mixed and multiple access network communications focused on optical-wireless convergence. Topics include Fiber-Wireless (FiWi), Hybrid Fiber-Wireless (HFW), Visible Light Communication (VLC), 5G optical sensing technologies, approaches to real-time IoT applications, Tactile Internet, Fog Computing (FC), Network Functions Virtualization (NFV), Software-Defined Networking (SDN), and many others. This book aims to provide an inclusive survey of 5G optical-wireless requirements, architecture developments, and technological solutions.

Computational Science and Its Applications - ICCSA 2004 Antonio Laganà, Marina L. Gavrilova, Vipin Kumar, Youngsong Mun, C.J. Kenneth Tan, Osvaldo Gervasi, 2004-05-21 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems. For this reason Computational Science, though originating from the need to solve the most challenging problems in science and engineering (computational science is the key player in the fight to gain fundamental advances in astronomy, biology, chemistry, environmental science, physics and several other scientific and engineering disciplines) is increasingly turning its attention to all fields of human activity. In all activities, in fact, intensive computation, information handling, knowledge synthesis, the use of ad-hoc devices, etc. increasingly need to be exploited and coordinated regardless of the location of both the users and the (various and heterogeneous) computing platforms. As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications (ICCSA 2004) held in Assisi, Italy, May 14–17, 2004.

Tudo pelo trabalho livre! Trabalhadores e conflitos no pós-abolição Robério Santos Souza, 2011-01-01 Robério Souza aborda a vida dos trabalhadores ferroviários (negros, em sua maioria) no período pós-abolição e nos anos iniciais do período republicano. Acompanha a luta pelos direitos e conquistas sociais, os movimentos trabalhistas, os conflitos e a organização da classe. Apesar de ter como ponto de partida o contexto baiano, na construção da estrada de ferro da Bahia ao São Francisco, esta obra traz reflexões globais sobre o fim do escravismo e a liberdade dos trabalhadores.

The Oracle of Night Sidarta Ribeiro, 2021-08-17 A groundbreaking history of the human mind told through our experience of dreams—from the earliest accounts to current scientific findings—and their essential role in the formation of who we are and the world we have made. What is a dream? Why do we dream? How do our bodies and minds use them? These questions are the starting point for this unprecedented study of the role and significance of this phenomenon. An investigation on a grand scale, it encompasses literature, anthropology, religion, and science, articulating the essential place dreams occupy in human culture and how they functioned as the catalyst that compelled us to transform our earthly habitat into a human world. From the earliest cave paintings—where Sidarta Ribeiro locates a key to humankind’s first dreams and how they contributed to our capacity to perceive past and future and our ability to conceive of the existence of souls and spirits—to today’s cutting-edge scientific research, Ribeiro arrives at revolutionary conclusions about the role of dreams in human existence and evolution. He explores the advances that contemporary neuroscience, biochemistry, and psychology have made into the connections between sleep, dreams, and learning. He explains what dreams have

taught us about the neural basis of memory and the transformation of memory in recall. And he makes clear that the earliest insight into dreams as oracular has been elucidated by contemporary research. Accessible, authoritative, and fascinating, *The Oracle of Night* gives us a wholly new way to understand this most basic of human experiences.

Millenarian Vision, Capitalist Reality Todd A. Diacon,1991-08-29 Why did a millenarian movement erupt in the Brazilian interior in 1912? Setting out to answer this deceptively simple question, Todd A. Diacon delivers a fascinating account of a culture in crisis. Combining oral history with detailed archival research, *Millenarian Vision, Capitalist Reality* depicts a peasant community whose security in economic, social, and religious relations was suddenly disrupted by the intrusion of international capital. Diacon shows how a “deadly triumvirate” comprised of foreign capital, state power, and local bosses engineered a land tenure revolution that threatened smallholders’ subsistence, sparking rebellion among the *Contestado* peasants. Unlike most analysis of millenarian movements, Diacon combines a material analysis with a careful exploration of the movement’s millenarian ideology to demonstrate how a particular combination of external and internal forces produced a crisis of values in the *Contestado* society. Such a crisis, Diacon concludes, gave a special power to the millenarian vision that promised not only outward reform, but inner salvation as well. This work offers a significant contribution to the literature of millenarian movements, popular religion, peasant rebellions, and the transition to capitalism in Brazil.

Neutrosophic Sets and Systems, Vol. 37, 2020. Special issue: Impact of neutrosophy in solving the Latin American's social problems

Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, Said Broumi, The main objective of this special issue is to divulge the applicability of the Neutrosophic Theory and to explore the possibilities and advantages of neutrosophic tools, through both the presentation of thorough research and case studies in solving social problems in Latin America. The best presentations discussed at the III International Congress of Educational Research and University Innovation, turned into papers, show us the capacity for socialization of neutrosophic knowledge and its link with this science of validation and consolidation of scientific knowledge. This publication with authors from 11 countries that we place in the hands of the international scientific community, constitutes an example of how in Latin America the Neutrosophy is contributing to complex solutions based on the results of scientific research carried out by teachers and students committed to the social responsibility of continuing to progress for the benefit of humanity.

New Neoliberalism and the Other Giuseppe Cocco, Bruno Cava, 2018-02-19 This book proposes a shift in the very concept of neoliberalism as an ambivalent product of subjectivity. It is not resolved in dichotomies between the included and excluded, interior and exterior, capitalist and noncapitalist. Neoliberalism operates in blurred lines, through flexible structures, and amid internal gradients and varying tensions.
