2 [The Eastern Land and the Western Heaven](#) Fan Zhang, 2024-01-23 This book sheds light on the structure of “a unity with diversity” developed in the Qing imperial formation (1636–1912) by a case study of the Qing-Tibetan encounters in the eighteenth century. By analyzing historical and ethnographical materials, the book investigates the translation of Chinese histories and stone inscriptions into Tibetan, the transformation of the landscapes at Mount Wutai and Lhasa, and the transplantation of Chinese deities and medical practices to Tibet. It demonstrates the processes in which the cosmopolitan interlocutors reified imperial integrity while expressing their diverse longings and belongings. It concludes that the Qing’s rule over its cultural others was neither simply Sinicizing nor colonizing, but a translational process in which multivocalic actors shared narratives, landscapes, and practices, while the emperor and tantric masters performed cosmic power over humans and metahumans. This book cuts across the fields of anthropology, history, Chinese studies, and Tibetan studies. It reflects on the concepts of sovereignty and ethnicity, and it also extends the methodological horizon of historical anthropology.

2 [Photon Upconversion Nanomaterials](#) Fan Zhang, 2014-12-11 This book introduces the latest advances made in both fundamental studies and potential applications of upconversion nanomaterials, particularly in the field of high-resolution in vitro bioanalysis and in vivo imaging. This book starts with the synthesis and characterization, and focuses on applications ranging from materials science to biology. Above all, it describes cutting-edge advances in upconversion nanophosphor (UCNP)-based applications in multiplexed encoding, guest delivery and release systems, photodynamic therapy (PDT), solar cells, photocatalysis and so on. The major barriers that currently prevent UCNPs from being used in mainstream applications are also presented in detail.

2 [Building and Negotiating Religious Identities in a Zen Buddhist Temple](#) Fan Zhang, 2019-06-27 This book explores the practices in a Zen Buddhist temple located in Northwest Ohio against the backdrop of globalization. Drawing on the previous studies on Buddhist modernization and westernization, it provides a better understanding of the westernization of Buddhism and its adapted practices and rituals in the host culture. Using rhetorical criticism methodology, the author approaches this temple as an embodiment of Buddhist rhetoric with both discursive and non-discursive expressions within the discourses of modernity. By analyzing the rhetorical practices at the temple through abbots’ teaching videos, the temple website, members’ dharma names, and the materiality of the temple space and artifacts, the author discovers how Buddhist rhetoric functions to constitute and negotiate the religious identities of the community members through its various rituals and activities. At the same time, the author examines how the temple’s space and settings facilitate the collective the formation and preservation of the Buddhist identity. Through a nuanced discussion of Buddhist rhetoric, this book illuminates a new rhetorical methodology to understand religious identity construction. Furthermore, it offers deeper insights into the future development of modern Buddhism, which are also applicable to Buddhist practitioners and other major world religions.

2 [The Investment Opportunities and Risks of the Belt and Road Initiative](#) Fan. Zhang Zhang (Lisa.), Lisa Zhang, 2023-07 The Belt and Road Initiative (BRI) is an ambitious infrastructure construction program designed and financially supported by the Chinese government. It spans the globe and is active in about 150 countries, affecting the international order, government policies, and ordinary people’s daily lives. The BRI uses a version of China’s domestic development model, set in an international environment. Using a wealth of documents, cases, multi-country input-output models, and a project database created by the authors, this book provides a complete picture of the BRI: its benefits, risks, and implications. The book explores the institutional roots of the problems of the BRI (including debt problems), argues that the debt problem is a soft budget constraint problem, and discusses the redesign and reorganising of its future versions. This book aims to help policymakers, researchers, students, and everyone interested in political science, economics, and country-specific research to understand and rethink the advantages and risks of the BRI.

2 [The Institutional Evolution of China](#) Fan Zhang, 2018-09-28 China’s recent evolution is not only a story of extraordinary economic growth but also a story of great institutional change. Fan Zhang challenges traditional theory to explain the real origins of China’s reform, the political and economic forces driving it, and the reasoning behind its stagnation. The institutional re-arrangement of government and market has been crucial in this marketization process. Using a wealth of documents and cases, Zhang provides a detailed analysis of China’s institutional changes over the past 40 years, focusing on the government-market relationship. A theoretical framework is presented to explain the targets and incentives of government and business firms in a bureaucratic-market system, which promoted economic growth, but also fostered corruption and resulted in a re-centralisation of the system. Using an index of marketization in China since 1978, Zhang shows that overall, market expansion has continued but with diminishing marginal gains. The government control of financial resources that had previously been relaxed in the early years of reform has been enhanced to some extent as a result of the changing institutional environment. Policy makers dealing with China-related policies, researchers and postgraduate students in political science, economics and Chinese studies will find this book a compelling exploration of the current and constant cooperation and conflict between government and market.

2 [China’s Urbanization and the World Economy](#) Fan Zhang, 2014-04-25 Urbanization has become a new driving force in China’s development. Through China’s urbanization process, China’s role in the world economy will change from the world’s major workshop to one of the world’s central markets. The increase in demand tr

2 [Intelligent Image and Video Compression](#) Fan Zhang, David Bull, 2021-04-07 Intelligent Image and Video Compression: Communicating Pictures, Second Edition explains the requirements, analysis, design and application of a modern video coding system. It draws on the authors’ extensive academic and professional experience in this field to deliver a text that is algorithmically rigorous yet accessible, relevant to modern standards and practical. It builds on a thorough grounding in mathematical foundations and visual perception to demonstrate how modern image and video compression methods can be designed to meet the rate-quality performance levels demanded by today’s applications and users, in the context of prevailing network constraints. David Bull and Fan Zhang have written a timely and accessible book on the topic of image and video compression. Compression of visual signals is one of the great technological achievements of modern times, and has made possible the great successes of streaming and social media and digital cinema. Their book, Intelligent Image and Video Compression covers all the salient topics ranging over visual perception, information theory, bandpass transform theory, motion estimation and prediction, lossy and lossless compression, and of course the compression standards from MPEG (ranging from H.261 through the most modern H.266, or VVC) and the open standards VP9 and AV-1. The book is replete with clear explanations and figures, including color where appropriate, making it quite accessible and valuable to the advanced student as well as the expert practitioner. The book offers an excellent glossary and as a bonus, a set of tutorial problems. Highly recommended! --Al Bovik An approach that combines algorithmic rigor with practical implementation using numerous worked examples explains how video compression methods exploit statistical redundancies, natural correlations, and knowledge of human perception to improve performance Uses contemporary video coding standards (AVC, HEVC and VVC) as a vehicle for explaining block-based compression Provides broad coverage of important topics such as visual quality assessment and video streaming

2 [Tethered Space Robot](#) Panfeng Huang, Zhongjie Meng, Jian Guo, Fan Zhang, 2017-11-06 Tethered Space Robot: Dynamics, Measurement, and Control discusses a novel tethered space robot (TSR) system that contains the space platform, flexible tether and gripper. TSR can capture and remove non-cooperative targets such as space debris. It is the first time the concept has been described in a book, which describes the system and mission design of TSR and then introduces the latest research on pose measurement, dynamics and control. The book covers the TSR system, from principle to applications, including a complete implementing scheme. A useful reference for researchers, engineers and students interested in space robots, OOS and debris removal. Provides for the first time comprehensive coverage of various aspects of tethered space robots (TSR) Presents both fundamental principles and application technologies including pose measurement, dynamics and control Describes some new control techniques, including a coordinated control method for tracking optimal trajectory, coordinated coupling control and coordinated approaching control using mobile tether attachment points

2 [The Storm](#) Fan Zhang, 2013-04-16 Born in a beautiful coastal town in Northern China, naive and warm-hearted Jiang Fan leaves the comforts of her hometown behind in search of her childhood friend, Xue Ning, who mysteriously disappeared and traveled to Hong Kong. Despite Jiang’s best efforts, Xue is nowhere to be found. Jiang becomes acquainted with local law-enforcement officers who, touched by Jiang and Xue’s childhood stories, offer their assistance. Yet they soon discover a terrifying fact; Xue’s fate lies in the hands of Hong Kong’s elite criminal society, the Gang. Meanwhile, Jiang’s emergence as a business prodigy attracts the attention of the criminals. Using Xue as bait, the Gang lures Jiang to the dark side, and her friends soon become targets of assassination. With no choice, Jiang must toe a fine line between good and evil to save those she holds dear. She alone must stare down the barrel of the gun. (Chinese Language Novel)

2 [Ultra Low-Power Integrated Circuit Design for Wireless Neural Interfaces](#) Jeremy Holleman, Fan Zhang, Brian Otis, 2010-10-29 This book will describe ultra low-power, integrated circuits and systems designed for the emerging field of neural signal recording and processing, and wireless communication. Since neural interfaces are typically implanted, their operation is highly energy-constrained. This book introduces concepts and theory that allow circuit operation approaching the fundamental limits. Design examples and measurements of real systems are provided. The book will describe circuit designs for all of the critical components of a neural recording system, including: amplifiers which utilize new techniques to improve the trade-off between good noise performance and low power consumption. Analog and mixed-signal circuits which implement signal processing tasks specific to the neural recording application: detection of neural spikes Extraction of features that describe the spikes Clustering, a machine learning technique for sorting spikes Weak-inversion operation of analog-domain transistors, allowing processing circuits that reduce the requirements for analog-digital conversion and allow low system-level power consumption. Highly-integrated, sub-mW wireless transmitter designed for the medical implant communications service (MICS) and ISM bands.

 **RECENT ADVANCES IN THE MOLECULAR GENETICS AND PRECISION MEDICINE OF LUNG CARCINOMA** MEHDI PIROOZNIA,XIAOGANG WU,JONATHAN N. BELLA,FAN ZHANG,DRAGANA JOVANOVIC,2024-01-25 Lung Carcinoma is the 2nd most common cancer worldwide, with more than 2.2 million cases recorded globally in the year 2020, as well as 1.8 million deaths. It is the most common cancer in men and the 2nd most common cancer in women, with an estimated lifetime risk of developing the disease of 1 in 15 for men and 1 in 17 for women. Whilst being the most prevalent cancer, it is important to note that smoking is the single biggest risk factor for developing lung cancer, with over 70% of cases being estimated to have been caused by tobacco smoke, and excessive smoking potentially leading to as much as a 25x increase in the likelihood of the disease developing. Mortality rates have been steadily dropping globally due to declining smoking rates, especially in younger generations who are now more aware of the potential dangers, but also because of the increasing advancements being made in our understanding of the disease. Improved screening methods mean many more cases are now caught earlier than they would otherwise have been, and our ever-advancing ranges of treatments can begin earlier than they could have previously. Recent advances in sequencing technology, computational approaches, and our biological understanding of lung cancer have revolutionized how we diagnose, prognosticate, and treat lung carcinoma. Genetic studies into this disease have revealed a plethora of information which can be used to combat the cancer, such as novel biomarkers and gene signatures, as well as opening the door to more of a ‘personalized medicine’ approach.

 **ADDING CHINA TO THE GLOBAL PROJECTION MODEL** PATRICK BLAGRAVE,PETER ELLIOTT,MR.ROBERTO GARCIA-SALTOS,DOUGLAS HOSTLAND,MR.DOUGLAS LAXTON,FAN ZHANG,2013-12-19 We extend the Global Projection Model (GPM) to include a separate block for China. China plays an important role in shaping global economic outcomes, given its sheer size and trade integration with other key economies, its demand for commodities, and its policies. Also, the Chinese economy has several unique features which differentiate it from the rest of emerging Asia. These features (the use of multiple monetary-policy instruments and a managed-floating exchange-rate policy) mean that a separate treatment of China allows for a better consideration of China, as well as how the rest of emerging Asia behaves.

 **DOES UNCERTAINTY MATTER? : A STOCHASTIC DYNAMIC ANALYSIS OF BANKABLE EMISSION PERMIT TRADING FOR GLOBAL CLIMATE CHANGE POLICY** FAN ZHANG,2007 ABSTRACT: EMISSION PERMIT TRADING IS A CENTERPIECE OF THE KYOTO PROTOCOL WHICH ALLOWS PARTICIPATING NATIONS TO TRADE AND BANK GREENHOUSE GAS PERMITS UNDER THE FRAMEWORK CONVENTION ON CLIMATE CHANGE. WHEN MARKET CONDITIONS EVOLVE STOCHASTICALLY, EMISSION TRADING PRODUCES A DYNAMIC PROBLEM, IN WHICH ANTICIPATION ABOUT THE FUTURE ECONOMIC ENVIRONMENT AFFECTS CURRENT BANKING DECISIONS. IN THIS PAPER, THE AUTHOR EXPLORES THE EFFECT OF INCREASED UNCERTAINTY OVER FUTURE OUTPUT PRICES AND INPUT COSTS ON THE TEMPORAL DISTRIBUTION OF EMISSIONS. IN A DYNAMIC PROGRAMMING SETTING, A PERMIT PRICE IS A CONVEX FUNCTION OF STOCHASTIC PRICES OF ELECTRICITY AND FUEL. INCREASED UNCERTAINTY ABOUT FUTURE MARKET CONDITIONS INCREASES THE EXPECTED PERMIT PRICE AND CAUSES A RISK-NEUTRAL FIRM TO REDUCE EX ANTE EMISSIONS SO AS TO SMOOTH OUT MARGINAL ABATEMENT COSTS OVER TIME. THE CONVEXITY RESULTS FROM THE ASYMMETRIC IMPACT OF CHANGES IN COUNTERFACTUAL EMISSIONS ON THE CHANGE OF MARGINAL ABATEMENT COSTS. EMPIRICAL ANALYSIS CORROBORATES THE THEORETICAL PREDICTION. THE AUTHOR FINDS THAT A 1 PERCENT INCREASE IN ELECTRICITY PRICE VOLATILITY MEASURED BY THE ANNUALIZED STANDARD DEVIATION OF PERCENTAGE PRICE CHANGE IS ASSOCIATED WITH AN AVERAGE DECREASE IN THE ANNUAL EMISSION RATE BY 0.88 PERCENT. NUMERICAL SIMULATION SUGGESTS THAT HIGH UNCERTAINTY COULD INDUCE SUBSTANTIALLY EARLY ABATEMENTS, AS WELL AS LARGE COMPLIANCE COSTS, THEREFORE IMPOSING A TRADEOFF BETWEEN ENVIRONMENTAL BENEFITS AND ECONOMIC EFFICIENCY. THE AUTHOR DISCUSSES POLICY IMPLICATIONS FOR DESIGNING AN EFFECTIVE AND EFFICIENT GLOBAL CARBON MARKET.
