A Windows NTTM Guide to the Web Richard Raucci,2011-06-27 NT as an Operating System

Microsoft developed Windows NT as an alternative to Unix. The company sees it as a part of its overall Enterprise Computing plan. It scales up from basic 486 systems to high-end RISC systems from companies like Digital, NEC, and PC vendors offering PowerPC systems for NT. The basic operating system consists of a user interface shell (similar in appearance to Windows 3.1 for NT 3.1 to 3.5, and changing to look and feel more like Windows 95 for NT 4.0) designed to run 32-bit programs. This makes it ideal for the multi media nature of Web browsers, and for the heavy-duty requirements of a Web server. There are a number of elements in the OS that are special to NT. These include the control panels and administrative support tools relating to NT's services and support mechanisms. TCP/IP is included for Internet access through traditional networks. You can also connect from Windows NT Workstation via MS Remote Access to any Internet Access Provider supporting PPP. Basic requirements for Windows NT Workstation are a 486 system with at least 8 MB of RAM, although 16 MB is recommended. The client software needed to connect to a corporate server is included, as is the Remote Access software mentioned earlier.

The Ridiculously Simple Guide To Safari Scott La Counte, 2020-11 ★★ Surf the Internet with the Safari web browser ★★ The Internet browser wars are heating up. No, this isn't a history book of Netscape and Internet Explorer! This is about the browser that's giving Chrome and Firefox a run for their money: Safari. The latest version of Safari has features that you have come to love on Chrome (like translation, extensions, and customized start pages). Safari has also added some amazing features that protect your privacy online. This book will walk you through the newest features while also showing you how to do the things that you may not

know about...like reader view, security key authentication, and Apple Pay. It will also cover continuance-so you know how to surf on your computer and pick up where you left off on your iPhone or iPad. If you're ready to make the switch and want to make sure you understand all of the features, then read on!

Internet Explorer Construction Kit For Dummies Clayton Walnum, 2004-11-05 You've heard the saying, "If you want something done right, do it yourself." Actually, most Internet browsers are done right. Chances are, you're comfortable with yours. Yet, you may want to build your own. You don't have to start from scratch—you can start with the Browser Construction Kit on the CD-ROM that

comes with Internet Explorer Construction Kit for Dummies. Best of all, there's no programming required. Whether you personalize your browser or build one just for your business, you can include features and functions not available with traditional browsers, including:

- Log file: a list of all Web sites visited
- Alarm: an audible or popup alarm that signals the end of the time period used with the countdown timer
- Lock: prevents the custom browser from further browsing
- Approved list: list of Web sites to which browsing is limited
- Spy: screen captures taken once a minute
- Popular sites: a list of the most-visited sites

You can make your browser G-rated. That's great if you have curious kids and are concerned about adult sites and Internet safety or simply want to limit their browsing time. The ability to limit access to specific sites also comes in handy if you own a business and want customers in your store to be able to browse your online catalog, but not to comparison shop! Written (and more importantly, programmed) by Clayton Walnum, author of *Standard C++ Bible* and many other computer books, *Internet Explorer Construction Kit For Dummies* takes you step-by-step through:

- Adding borders to give your browser a graphical theme
- Using window skin to add an image to your window's background
- Making the bar scene —assembling the toolbar, designing the menu bar, pulling together the status bar, and customizing the address bar
- Creating buttons and icons

In addition to your Browser Construction Kit, the bonus CD-ROM includes several sample projects you can create, sample graphics for creating custom buttons and skins, and an evaluation version of *Paint Shop Pro8* so you can get down to work. You even have everything you need to create a browser with themed graphics, choosing from animal, art, music, sea, sports, or more. Have fun creating your own personalized, custom-built browser. That way, it will be done just right for you!

Netscape™ for Macintosh® Richard Raucci, 2012-12-06 Netscape has captured the lion's share of the Web browser market. Its advanced features make it the premier Internet navigation tool

This book will show you how to set up and configure Netscape, as well as a variety of other Web Browsers for the Macintosh, including NCSA MacMosaic, PLUSMosaic, MacWeb, and NetShark. As well as providing an up-to-date snapshot of some of the best web sites around, the author also includes an introduction to Netscape 2.0 for the Macintosh and illustrates some of its powerful new features.
