The New Law of Land Registration Elizabeth Cooke,2003-09-17 This book is an examination of the law of land registration in England and Wales, in the light of the Land Registration Act 2002, and in particular at the way land registration is influenced by, and in turn influences, the evolution of land law as a whole. It examines the legal problems that have arisen in connection with land registration and considers the effect of the 2002 statute, drawing extensively upon the law in other jurisdictions and considering possibilities for future development. This is a book which will be essential reading for students, their teachers, and practitioners who will have to grapple with the intricacies of the new Act when it comes into force.

Urban Land Dieter D. Genske,2013-03-14 Urban land is an environmental key topic considering the increasing urbani sation of our world. The amounting pressure on resources especially in the urban environment demand awareness across technical and political sectors and solid concepts for workable solutions. This book will address those people, who are key in coping with the challenges of sustainable urban land use management: Professionals in the growing field of urban land recycling and graduate students from different disciplines including urban planning, environmental sciences and geotechnics. Processes that lead to urban land degradation include the extraction of resources, their transformation into goods, the production of waste and conflicts in the allocation of land. Industrial soil pollution, soil sealing and urban sprawl pose serious challenges to resource management in urban environments. The possible implications are not necessarily restricted to the urban area but do have feedback into the countryside. The reduction of arable land in urban peripheries often causes enhanced pressure on back-country natural ecosystems such as forests, grass- and wetlands. Urban land recycling especially in the developing world is to be seen in the context of poverty alleviation and sustainable development. Ifwe don't get a proper sustainable use of urban land, as well as of water and other natural resources that relate to them, sustainable development will not be reached.

Land Matters Tembeka Ngcukaitobi,2021-04-15 Why has land reform been such a failure in South Africa? Will expropriation without compensation solve the problem? What can be done to get the land programme back on track? In Land Matters, Tembeka Ngcukaitobi tackles the past, present and future of the land question in South Africa. Going back in history, he shows how Africans' communal systems of landownership were used by colonial rulers to deny that Africans owned the land at all. He explores the effects of the Land Acts, Bantustans and forced removals. And he evaluates the ANC's policies on land throughout the struggle years, during the negotiations of the 1990s, and

in government. Land Matters unpacks the government’s achievements and failures in land redistribution, restitution and tenure reform, and makes suggestions for what needs to be done in future. The book also explores the power of chiefs, the tension between communal landownership and the desire for private title, the failure of the willing-seller, willing-buyer approach, women and land reform, the role of banks, and the debates around amending the Constitution. Steering clear of the simplistic and polarising terms of the land debate, Ngcukaitobi argues for a return to the nuanced constitutional requirements of justice and equity in South Africa’s land policy. Thoughtful and provocative, Land Matters sheds light on one of the most topical, complex and urgent issues in South Africa today.
