*Systems Engineering and Analysis of Electro-Optical and Infrared Systems* William Wolfgang Arrasmith,2018-10-08 Electro-optical and infrared systems are fundamental in the military, medical, commercial, industrial, and private sectors. Systems Engineering and Analysis of Electro-Optical and Infrared Systems integrates solid fundamental systems engineering principles, methods, and techniques with the technical focus of contemporary electro-optical and infrared optics, imaging, and detection methodologies and systems. The book provides a running case study throughout that illustrates concepts and applies topics learned. It explores the benefits of a solid systems engineering-oriented approach focused on electro-optical and infrared systems. This book covers fundamental systems engineering principles as applied to optical systems, demonstrating how modern-day systems engineering methods, tools, and techniques can help you to optimally develop, support, and dispose of complex, optical systems. It introduces contemporary systems development paradigms such as model-based systems engineering, agile development, enterprise architecture methods, systems of systems, family of systems, rapid prototyping, and more. It focuses on the connection between the high-level systems engineering methodologies and detailed optical analytical methods to analyze, and understand optical systems performance capabilities. Organized into three distinct sections, the book covers modern, fundamental, and general systems engineering principles, methods, and techniques needed throughout an optical system's development lifecycle (SDLC); optical systems building blocks that provide necessary optical systems analysis methods, techniques, and technical fundamentals; and an integrated case study that unites these two areas. It provides enough theory, analytical content, and technical depth that you will be able to analyze optical systems from both a systems and technical perspective.

**Southern Writers at Century's End** Jeffrey J. Folks,James A. Perkins,2021-12-14 Since the end of World War II, the South has experienced a greater awareness of growth

and of its accompanying tensions than other regions of the United States. The rapid change that climaxed with the war in Vietnam, the Cold War, civil rights demonstrations, and Watergate has forced the traditional South to come to terms with social upheaval. As the essays collected in *Southern Writers at Century's End* point out, southern writing: since 1975 reflects the confusion and violence that have characterized late-twentieth-century public culture. These essays consider the work of twenty-one of the foremost southern writers whose most important fiction has appeared in the last quarter of this century. As the region's contemporary writers have begun to gain a wide audience, critics have begun to distinguish what Hugh Holman has called the fresh, the vital, and the new in southern literary culture. *Southern Writers at Century's End* is the first volume to take an extensive look at the current generation of southern writers. Authors considered include: James Lee Burke, Fred Chappell, Robert Drake, Andre Dubus, Clyde Edgerton, Richard Ford, Kaye Gibbons, John Grisham, Barry Hannah, Mary Hood, Josephine Humphreys, Randall Kenan, Richard Marius, Bobbie Ann Mason, Cormac McCarthy, Tim McLaurin, T.R. Pearson, Lee Smith, Anne Tyle,r Alice Walker, and James Wilcox.
